Introduction

Rationale behind the book

This book is the result of many years of teaching university-level courses on translation between Arabic and English by the authors to both native English and Arabic speakers.

It is important to state from the outset what this book is *not*. It is *not* a grammar book or composition manual. Nor is it a treatise on translation theory or a historical overview of Arabic-English translation. Rather, it is intended to explain and illustrate various questions that are of relevance to the translator who works between these two languages. It focuses on common errors made by students and translation practitioners in general, with an emphasis on the microstructural linguistic elements of the translation process. The clear practical intent, however, does not mean that the *A to Z* is devoid of theory or that it does not play a part in translation. In fact, theory is everywhere and the way in which the translation mechanisms and processes are discussed is rooted in a solid theoretical basis.

One of the questions that any author needs to ask is whether their book fills an existing gap in the market. The answer in the case of the A to Z is that it fills several.

Firstly, it is a much-needed addition to the field of Arabic/English translation where there is a dearth of resources.

Secondly, while the overwhelming majority of existing works concentrate on one translation direction, the A to Z is – very much like the scripts that are used in it – bidirectional inasmuch as it addresses problems relating to both Arabic-English and English-Arabic translation. Naturally, the inevitable consequence is that some entries may be more relevant to native speakers of either Arabic or English. However, it would be wrong to presume that this is a misguided attempt to be all things to all people. Indeed, even if the native speaker of the language may not need assistance with the correct usage of this or that idiomatic expression, s/he will benefit from guidance on how to translate it into the Target Language. What is more, the aim is never to discuss grammatical points per se, but only in relation to their difficulty in translation. Indeed, there are plenty of grammar books available for those whose appetite has been whetted for more detail on grammatical items.

Thirdly, rather than dealing with themes or processes, the A to Z focuses on specific translation problems, each of which is carefully contextualized and illustrated for the

most part by authentic examples culled from contemporary literature and the media from various Arab countries.

Fourthly, the approach is one of comparative analysis, with a discussion of grammatical, lexical and semantic aspects being viewed through the prism of translation in order to offer the reader guidance on correct and idiomatic usage.

Translation is all about making choices, and there is rarely only one solution; usually, the same idea may be expressed in a variety of ways. Hence, the examples in the book often contain multiple translations of a given source text.

Target readership and aims of the book

The intended readership of the A to Z are university-level students of translation and professional translators, alike. And while it was originally designed for those whose mother tongue is either Arabic or English and who possess advanced proficiency in their non-native language, it can be used by others who have attained the required aptitude in both these languages.

More specifically, the book is aimed at:

- developing and honing users' ability and skills in translating between Arabic and English;
- enhancing idiomatic expression in both languages;
- raising awareness of the pitfalls specific to Arabic/English translation;
- increasing competency by providing the appropriate strategies for effective translation.

How to use the book

The design and layout of the book are in keeping with the overall aims and the alphabetic arrangement of all entries in the A to Z ensures ease of use both as a manual and as a reference work for the practice of Arabic-English-Arabic translation.

Whereas the reader is expected to have a basic knowledge of grammatical concepts, specialized linguistic terminology has been kept to a minimum. The practical pedagogic aim of the A to Z also underlies the fact that all examples are fully vowelled whereas the imperfect stem vowels are added in brackets to Form I verbs. e.g. (i).

Naturally, any selection is, to some degree, subjective, as well as being limited by practical constraints and some readers may lament the absence (or inclusion) of this or that point. Valid though such criticism may be, it is important to stress that in choosing the entries, the authors were guided by their classroom experience.

Although, in theory, readers may decide to work their way through the book from beginning to end, the layout is conducive to it being used as a reference work for specific issues, or to 'dip into'. As such, it is eminently suited for both independent and classroom use. In the latter context, teachers may, for instance, choose to

concentrate on certain items that may be relevant to a text that is being discussed in class.

Finally, a word about language variety. When dealing with a diglossic language such as Arabic, the question that arises is, of course, which kind of Arabic. This is not the place to enter into this highly complex issue; suffice it to say that the language exemplified in this book is Modern Standard Arabic, i.e. the formal normative variety of the language as it is used today in formal writing by educated native speakers. As a result, we have eschewed dialectisms and regionalisms. The English variety employed in the book is formal British English, though relevant comments are provided regarding North American usage when necessary.

In addition to our students, both past and present, many of whose challenging questions we have attempted to answer, the authors would like to thank Jack Wesson for his meticulous feedback on the manuscript.

Durham, Sharjah, January 2013

Abbreviations/acronyms

In English, it is common to abbreviate words. One generally makes a distinction between **abbreviations** and **acronyms** in that the latter can be read as words. Consider the difference between 'ETA' (expected time of arrival) and 'NATO' (North Atlantic Treaty Organization). In the former, each letter is pronounced separately (/i: -ti: -ei/), whereas the latter is read as /neitou/. Whilst acronyms are generally capitalized, abbreviations tend to be in lower case, except if they involve proper nouns or technical terms. e.g. 'FAO' (Food and Agricultural Organization'), 'DNA' (deoxyribonucleic acid).

In some cases, acronyms become so 'naturalized' in the language that their acronymic origins have been forgotten and, consequently, they appear in lowercase. e.g. 'laser' (< 'LASER', Light Amplification by Stimulated Emission of Radiation), 'radar' (< 'RADAR', Radio Detection And Ranging).

Acronyms are often added with suffixes. e.g. <u>yuppie</u> ('young upwardly mobile professional'), <u>dinky</u> ('double income with no kids [yet]').

A particular type of abbreviation is so-called 'clipping', which is also known as 'truncation', and involves the cutting of one or more syllables from a word (usually at the end). Whilst some are part of informal usage (e.g. doc, 'document'), several have gained independent status. e.g. ad (advertisement), lab (laboratory), sub (submarine), deli (delicatessen <shop>), demo (demonstration), zoo (zoological gardens), fax (facsimile), cab (cabriolet), bus (omnibus).

In principle, abbreviations are unknown in Classical Arabic, even if there are some examples like ('to say مُسلَّى اللهُ عَلَيْهِ وسلَّم) or (to say مُسلَّى اللهُ عَلَيْهِ وسلَّم) or ('Ye عَوْلُ ولا فُوهُ إلا بالله (to say مُسلَّى الله عَلَيْهِ وسلَّم) or (the prophet Muhammad. Western-style abbreviations and acronyms are a very recent invention under the influence of English. e.g. (PO Box'). They remain quite rare and are generally restricted to media Arabic. e.g. الله ('AFP', the news agency Agence France Presse), الله (OPEC), الله (NATO), الله (RPG', rocket-propelled grenade'). As a result, when translating English acronyms into Arabic, it is always safer to give the full form.

There are no examples of 'clipping' in Arabic.

Above/over

Although both mean higher than, they cannot be used interchangeably; above tends to refer to a position along a vertical scale, with over denoting movement, while also being used with numbers, expressions of quantity or measurement. In Arabic, the preposition and the comparative (for numbers and quantities) are the usual translations of these terms. e.g.

"She is above suspicion."

"We're standing 200 metres above the ground."

"His intelligence is above average."

"His success was above all expectations."

"She is over sixty (years old)."

"He weighs over 75 kilograms."

"The aircraft flew **over** our house."

"This dress cost me over three hundred pounds."

"Throw (f. sg.) the ball over the wall!"

إِرْمِي الكرَةَ فَوْقَ الحائِطِ

→ NOTE: the following figurative expressions: 'to rise/be above (something)' and 'get over (something/someone), meaning 'to disregard' and 'overcome (e.g. problems, crisis), respectively. e.g.

"We got over our difficulties and made it through the exams."

تَغَلَّبْنا عَلَى صِعابِنا وَنَجَحْنا في الامْتحاناتِ ... قَهَرْنا/ذَلَّلْنا/اجْتَرْنا صِعابِنا

"You have to rise above his insults if you want to work here."

يَنْبَغِي لَكَ تَجَاوُزُ إِهاناتِهِ إِذا أَرَدْتَ الْعَمَلَ هُنا

Adverbs

As English and Arabic have different linguistic structures, it stands to reason that it is nigh-on impossible to expect a one-to-one correspondence in the translation of various grammatical categories and/or parts of speech.

Arabic 'adverbs' can come in the following forms:

- 1. particles. e.g. Lii 'only';
- 2. indeclinable nouns ending in -u. e.g. 🚉
- 3. indefinite accusative nouns: ﴿ حَدْمُ , 'very', حَدْمُ , 'how'.

When talking about the translation of adverbials, the following issues are of importance:

- the type of adverbial;
- the composition of the adverbial (one or several words);
- the equivalent in the other language;
- the position of the adverbials in the sentence.

Types

The most frequent types of adverbs are:

1. Adverbs of Manner

These express the way in which something is done. e.g.

```
"You must leave quickly."

يَجِبُ أَنْ تُغَادِرَ بِسُرْعَةٍ

"They were working efficiently."

كَانُوا يَعْمَلُونَ بِكَفَاءَةٍ
```

English adverbs of manner generally end in '-(ic)(al)ly', whereas they are placed after the Direct Object or after the verb (if there's no Object).

In Arabic, English adverbs of manner can be rendered in a variety of ways:

• Indefinite noun in the accusative;

- Indefinite adjective in the accusative;
- Prepositional phrases introduced by or &, followed by an indefinite noun (often a verbal noun);
- The following compound prepositional phrases (followed by an indefinite noun):
 - ('in the manner of').
 - بشکل/علی شکل ('in the form of').
 - ('in the method of').
 - يصفّة ('in the quality of').

فَعَلْناهُ مَعاً

"We did it together."

ذاكَرْتُ/اسْتَذْكَرْتُ دُرُوسِي جَيِّدا

"I studied my lessons well."

لا أُحِبُّ السَّفَرَ بِالطَّائرةِ بِشَكْل عامً

"Generally (speaking), I don't like to travel by plane."

هذه مُشْكِلةٌ في دُوَلِ الْخَلِيجِ بِصِفةٍ حاصَّةٍ

"This is a problem, particularly in (Arabian) Gulf countries."

كَانُوا يَتَظاهَرُونَ ضِدَّ الحُكُومةِ بِطَرِيقةِ عَلَيَّةٍ

"They were demonstrating openly against the government."

خَرَجَتِ الأُستاذَةُ عَلَى عَجَل/بِسُوْعَةِ

"The teacher left in a hurry."

قَرَأْتُ الكِتابَ بِإهْتِمام

"I read the book with interest."

☞ NOTE: Arabic adverbs of manner are placed after the Direct Object or after the verb (in the absence of an Object).

The most typical and traditional method to express manner in Arabic is, however, through a circumstantial clause (الخال) or cognate accusative (الفَعُول المُطْلَق).

A. The circumstantial clause (اخال)

Deriving its name from the fact that it describes the state (حال) of the subject as an action is performed, the *hāl* is most often formed with an indefinite participle in the accusative case. Alternatively, the same idea can be rendered through j (the so-called), which is followed either by a **pronoun** (if it involves a nominal sentence²), or with a perfect³ tense (verbal sentences). e.g.

"He sat down despondently."

"He listened to music while he was dancing."

B. The cognate accusative (مَفْعُولٌ مُطْلَقٌ)

This involves a construction containing the verbal noun (مَصْدَرُ) of the main verb, which is further modified adjectivally (with the adjective agreeing in gender and number with the verbal noun). e.g.

"I protested vehemently"

"The party wants to participate fully in secular society."

2. Place adverbials

These express where something takes place and in English are usually found after the object, otherwise after the verb. If it co-occurs with an adverb of manner in the sentence, the adverb of place should follow that of manner. e.g.

"He was killed with a knife [MANNER] in London [PLACE]."

Unlike adverbs of manner, those of place can also be placed in sentence-initial position – usually for emphasis. e.g.

"In Beirut, the Prime Minister met with the other members of the Alliance."

In Arabic, place adverbials occur only rarely in sentence-initial positions; most frequently they are found in **medial** positions, i.e. after the verb or after the subject when it is explicit. e.g.

"Last year, Mansur was in France."

"Fatima was living here."

"The President arrived at Marrakech airport yesterday."

"Nesreen waited for him at the station gate, but he was in the arrivals hall."

3. Time adverbials

These express when an action or event takes place and are usually found in the same places as the adverbs of place, i.e. either at the very beginning of the sentence or at the end, with the former position being the one used in case of emphasis. e.g.

"My aunt was there before the war."

"He yesterday arrived in Paris."

When time adverbials co-occur with adverbials of manner and place, the usual order is: MANNER + PLACE+ TIME. e.g.

"He sent the message by post [MANNER] from Brussels [PLACE] two weeks ago [TIME]."

"Ahmed will travel to Baghdad tomorrow."

In Arabic, time adverbials usually occur after the verb or the subject (if it is explicit). e.g.

"The minister delivered a speech yesterday in Cairo."

However, they can equally be found after the object or in sentence-final position. e.g.

"The Ministry of Infrastructure decided to raise petrol prices by 6% as from midnight on Sunday."

When time adverbials co-occur with adverbials of manner and place in Arabic, the usual order is: VERB/explicit SUBJECT + TIME + PLACE. e.g.

"The UN today organizes the Economic Conference in the Jordanian resort of Aqaba."

When adverbs of time co-occur with adverbs of manner and place in Arabic, the usual order is: VERB/explicit SUBJECT + TIME + PLACE + MANNER

"The minister today arrived in Cairo carrying an important letter."

"My son left this morning for University to attend the inaugural lecture by the new professor."

4. Adverbs of frequency

These express how many times the action conveyed by the verb takes place and in English are usually found between the subject and verb, except in the case of the verb 'to be', which they follow. If the verb is complex, i.e. consists of an auxiliary or modal, and a main verb, the adverb of frequency is placed after the first verb form. e.g.

"They **regularly** eat out."

"I was always honest with you."

"You should never have agreed to this."

☞ NOTE: when the auxiliary is 'used to' or 'have' used as a main verb the frequency adverb is usually placed after the verb/explicit subject. e.g.

"I never used to worry."

"She always treats her friends gently."

The Arabic adverbs of frequency are usually found after the verb or the subject (if it is explicitly stated). e.g.

"I sometimes go to the museum in the centre of town."

For adverbs of degree, see separate entries on 'Nearly', 'Quite', 'Hardly/Scarcely/Barely/Just'

- 1. "adverbial" is used in preference to "adverb" if it involves phrases, rather than a single word.
- 2. "nominal sentence" here refers to its use in Arabic grammar, i.e. a sentence/clause that begins with a noun, rather than a finite verb.
- 3. In this book, "perfect" will be used to denote المُضارِعُ المُنصوبُ, "subjunctive" for المُضارِعُ المُنصوبُ and "jussive" for المُضارِعُ المَجرُومُ

Advise/advice

Note the difference in spelling between the verb **to advise** and the noun **advice**, which is uncountable in English and, therefore, there is no "advices"! The usual Arabic word for "advice", نصائح (pl. نصائح) is countable, which may lead to mistranslations of a sentence such as:

"I'd like to give you some advice." (NOT *advices!)

Of particular interest are cases which involve numbers. e.g.

"He gave me five pieces of advice (NOT *advices!) before I left."

The verb *advise* is followed by **OBJ+TO+INF** in English, while the Arabic counterpart, (i), is followed by the complementizer if e.g.

"What would you advise (or recommend) me to drink after supper?"

Affect/effect

To affect is "to have an effect on". Confusingly, there is also a verb to effect, which means "to bring about", "to achieve". The former should be rendered in Arabic by the latter by + (u) + VN. e.g.

"The economic crisis severely **affected** many European countries which will suffer from its effect in many areas."

"The new manager effected basic changes in this company."

- ☞ NOTE: to affect (+ NOUN) also has another, less commonly used meaning of 'to feign, pretend', which can be rendered in Arabic in one of two ways:
 - ı. Form VI (تَفاعَلَ) verb. e.g.

"She affects (= feigns) ignorance of his mistakes." تَتَجاهَلُ غَلَطاتِهِ

2. the following verbs: تَكُلُّفُ or تَصَنَّعَ، تَظَاهَرَ، ادْعَى e.g.

"He affected a headache in order not to go to the party."

"She affected weakness until I (had) left the room."

"He affected/feigned loss of memory."

After/afterwards

This set may pose some confusion in translation as a result of contrastive usage in English and Arabic. "After" is a preposition which means "following the appointed time, event, ...", whereas "afterwards" is an adverb meaning 'subsequently'. In Arabic, however, both may be rendered by ** or ** or ** or ** or ** e.g.

"The accident happened after his arrival."

"When will he meet you? Before the meeting or afterwards (NOT *after!)?" (OR: "Before or after the meeting?")

"I'll see you afterwards (NOT *after!)."

"Afterwards, we spent two weeks in the capital."

Another cause of negative interference is the fact that is used in Arabic where English requires in. e.g.

"We will go there **in** (NOT *after!) two hours' time." سَنَذْهَبُ إِلَى هُناكَ بَعْدَ ساعَتَيْن

Agreement

This word denotes the way some words change when they occur with others; for instance, when a feminine singular noun is modified by an adjective in Arabic, the latter normally must also be put in the feminine, as a result of which it is said to 'agree' with the noun. We are concerned here with some special cases involving verb-subject agreement and noun-adjective agreement.

Verb-subject agreement

As there is no gender in English, verbs agree with their subjects only in **number**, i.e. whether it is singular or plural. Whilst this is pretty straightforward in the majority of cases, there is one important group of exceptions: **collective** nouns referring to groups of people. In this instance, both singular and plural are possible, depending on the meaning, of course.

In practice, the verb agrees with the **logical** subject (the actual or implied referents), rather than the **grammatical** subject (the grammatical form).

Consider, for instance, the following two sentences:

"The police are chasing the criminals."

"The police is a fine body of men."

In both cases, the subject is the same ('the police'), but in the first sentence the stress is on the constituent components, that is, the individual policemen who do the chasing. In the second, the emphasis is on the organization.

The same applies to other words which refer to groups of people, such as government, committee, group, family, company, family, government, jury, school, staff, team, union. e.g.

"The government have agreed upon a new tax increase."

"The government consists of ten ministers."

"The average family spends a quarter of the income on food."

"His family have invited us for dinner."

"The committee was set up twenty years ago amidst a crime wave."

"The committee have put forward new proposals to reduce crime."

"The United Nations have sent in relief aid."

"The United Nations is a charitable organization."

Occasionally, misuse may lead to ambiguity. e.g.

"The **team is** coming to our city." [= The team come to our city to play] يَأْتِي الفَريقُ إلى مَدِينَتِنا

"The **team are** coming to our city." [= the members of the team are coming to the city.]

The same emphasis on the logical subject also explains why clearly plural nouns take a singular verb if they refer to one single entity. e.g.

"The United States has decided to pull out of the Kyoto Protocol."

In Arabic, there is always agreement with their **grammatical subject**, except with collectives that refer to nationalities, which are always masculine plural, such as ('the Arabs') and, الانكليز ('the English'). e.g.

"In the pre-Islamic period, the Arabs spoke many dialects."

"The English considered themselves important after Faisal ascended the throne of Iraq."

In some cases, generic collective nouns are rendered idiomatically as plurals in Arabic. e.g.

"The opposition stressed that the country needs to reform itself."

"The intelligentsia have played a key role in the revolution."

"The poor and the rich are bracing themselves for the worst."

Some English nouns (many of them denoting sciences) with a plural form are always regarded as a **singular** grammatically. e.g.

athletics در القُوى القُول القُول القُول القَامِينَاتِ المعالمات الم

"Athletics is very useful for people."

"Economics was among my favourite subjects at University."

"The news about the front was not very good."

"Measles is easily cured in children these days."

"Politics is very often not logical."

"The physics of speech is essential knowledge for every linguist."

"Statistics is not often used in literature."

BUT:

"The unemployment statistics (= figures) are extremely bad as a result of the credit crunch."

A related case is that of so-called **summation plurals**, i.e. nouns that exist only in the plural and typically denote an item of clothing or an instrument consisting of two parts: e.g. 'scissors' (مِقَاصُّ), 'pliers' (مِقْراضُ), 'trousers' (سِرُوالُ). In English, they always agree with a plural verb, whereas in Arabic they tend to correspond to singular nouns, as the respective translations of the above nouns. e.g.

"These scissors are very sharp."

The unit nous of summation plurals is usually formed with 'a pair of: e.g. 'five pairs of trousers', خَمْسَةُ سَرَاوِيلَ

Measurements and figures may be singular when the quantity referred to is a unit. Otherwise, the plural is used. e.g.

"Three years is a long time."

"Three-fifths of people drive recklessly."

As the translations of the above sentences reveal, Arabic verbs agree in number with the grammatical subject, albeit with the following exceptions:

i. plural nouns referring to non-human entities are feminine singular grammatically; e.g.

"The houses were clean."

ii. when the verb precedes the subject, as it usually does in formal writing, the former is always in the singular, even if the subject is in the **dual** or **plural** (but agrees with it in **gender**). e.g.

"The lecturers (m.) left and headed for the airport."

"The two girls travelled to France."

This rule also applies to complex verb forms, that is, when an auxiliary verb is used, such as it, in which case the latter is in the singular, but the main verb is in the plural (or dual) as it **follows** the subject. e.g.

"The girls were eating in class."

Dual

One of the frequent mistakes when translating between Arabic and English arises from the mistranslation of the dual, either by using a plural for an English dual reference, or, conversely, by 'overspecification' in English. e.g.

"The men walked into the restaurant; one had a beer, whilst the other ordered a sandwich."

In this example, the translator is, of course, tempted to translate the first 'men' by however, as it becomes clear later on in the sentence that there are only two, the dual must be used in Arabic.

On the other hand, when translating from Arabic into English, the overuse of 'the two...' or 'both' often results in a repetitive and awkward style. In English, it is more idiomatic to use a plural when there is a succession of duals in Arabic. e.g.

"The two workers arrived at the hotel and then **they** went to the factory. The next day **they** started their new jobs."

'Covert gender'

Despite having a feminine form, i.e. ending in , some Arabic words denote males. In addition to masculine proper nouns (e.g. أُسَامَة), there are a number of so-called 'cryptomasculine' nouns, such as عَالِمَة ('caliph'), عَالِمَة ('great scholar') and رُحَالة ('inveterate traveller'). In these cases, **logical** agreement prevails over the grammatical one. e.g.

"The great scholar may win the world prize."

The rule applies to:

i. masculine nouns that take a feminine-marked plural. e.g. عَلَيْهَ ('students'). This is particularly relevant for borrowings from European languages, many of which take sound feminine endings. e.g. ثرات ('Lords') بَرْاتُات ('Parliaments'). e.g.

"The Lords left the banquet and returned to the House."

NOTE: the plural of borrowings ending in ه such as الشتُودِيُو NOTE: الشتُودِيُو هات، كازِينُو/كازِينُوهات، بيانُو/بيانُوهات، فِيدِيُو/فِيدِيُوهات، سينارِيُو الشَّودِيُوهات، كيلُو/كِيلُوهات.

- ii. feminine words that are not marked for gender, i.e. that do not have i. These include:
- Female proper nouns. e.g. نَوال Female proper nouns.
- nouns denoting females: أَغْنَة , 'mother'; عُرُوس , 'bride'; مَرُوس , 'daughter'; أَغْنة , 'sister';
- parts of the body that come in pairs. e.g. هـ ('hand'), اُذِن ('ear'); e.g.

"His leg was wounded."

→ NOTE the following that are masculine, despite being part of a set of two body parts:

َ (pl. مِرْفَق (pl. مِرْفَق (pl. مِرْفَق (pl. مِرْفَق), 'eyebrow'; مَرْافِقُ (pl. مِرْفَق), 'temple'.

• names of cities (both Arab and non-Arab!) and tribes as the words مَدِينة and respectively, are considered to be implied; e.g.

"Tunis flourished during the Middle Ages."

"The Shammar (tribe) spread across southern Iraq."

names of countries (notable exceptions being: النُبْنان، العِراق المَغْرِب، الأُرْدُنَ، السُّودان، e.g.

"Egypt is suffering from an acute economic crisis."

"Lebanon witnessed many changes in the course of its long history."

The following miscellaneous set of words:

```
, Earth'; (أراض pl.) أَرْض
پر (pl. بئار , well';
, wine'; (خُمُور .pl.) خَمْر
(pl. ذلاء، أَذْل، دلاء، أَذْلاء), 'bucket';
(pl. أَسْنان), 'tooth';
'hyena'; رضِباع، أَضْبُع pl. ضَبُع
(pl. فُورُوس), 'axe';
; 'paunch', (کُرُوش pl.) کُرْش
; soul'; (أنفُوس، أَنْفُس. [pl. نَفْس
          ([أستاه .[pl. إأستاه backside;
'yl. حُرُوب), 'war';
          دار (pl. دیار), 'house';
          ; uterus'; (أَرْحام .pl) رَحِم
          (sun'; شُمُوس), 'sun'
(pl. عُصِي، أعْص (stick';
          ; cup'; (كُونُوس، كتَاس. þl.) كَأْس
          (pl. نغل), 'sandal'; 'sandal';
          'fire', (نیران .pl.) نار
```

e.g.

كانَتِ الدَّارُ قَذِرةً

"The house was dirty."

إِنْدَلَعْتِ الحَرْبُ الأَهْلِيَّةُ قَبْلَ سَنَتَيْنِ

"The civil war started two years ago."

سَتَغْرُبُ الشَّمْسُ بَعْدَ ساعَة

"The sun will set in an hour's time."

اشْتَعَلَت النَّارُ بِدُونَ أَيَّةٍ ذَرِيعَةٍ/سَبَبِ

"Fire broke out without any reason."

Some Arabic nouns can have either masculine or feminine gender. e.g.

```
'state, condition' أَحُوال (pl. إَأَحُوال): 'state,
'rabbit': (أَرانَبُ pl.) أَرْنَب
;'knife) <sub>:(سَكاكينُ .[pl]</sub> سِكَين
'road': (سُئِل، أَسْبِلة .pl) سَبِيل
'sky: (سَماوات .pl.) سَماء
'road' :(طُرُق، طُرُقات .pl) طَريق
'scorpion' :(عَقارِبُ .pl. عُقْرَب
'spider' : (عَناكبُ جا)عَنْكُبُوتِ
'bag': (أُكْياس .pl.) كيس
'ship' :(مَراكبُ .pl) مَرْكَب
'spirit' :(أَرْواح .pl) رُوح
            'finger': (أصابعُ إصبَع
'stairs' : (سَلا لَمُ إِي [pl. سُلَّم
'shop' :(دَكاكِينُّ .pl.) دُكَّانَ
'market': (أَسْوِ اق [pl.) سُو ق
'eagle': (أَعْقُب، عقْبان .pl.) عُقاب
'neck': (أَعْناق pl.) عُنْق
            'liver'): (أَكْباد pl.) كبُد
'tongue': (أَلْسُن، أَلْسِنة .pl) لِسان
            'salt): 'salt) مِلْح
```

"The country attained a high level of development."

"Arab countries excel at educational performance in the developing world, second only to Latin America."

Some nouns have a 'double' gender, linked to specific meanings. e.g.

(pl. غَجائِز), 'old woman/man'. e.g.

"The old man/woman is on a hunger strike to death."

In contemporary usage, however, خروس tends to be treated as a masculine, while عروس generally denotes 'bride', with خروس being the common word for 'bridegroom'.

Another set of 'double-gendered' noun-adjectives are those patterned on i.e.g.

When there is contextual ambiguity, the feminine marker i, or a feminine noun may be added. e.g.

"The dead woman fell to the ground."

Quantifiers

With words denoting an amount, i.e. **quantifiers** such as كُلّ، أَغْلَبُ، عَالِب، أَغْلَيْه، أَعْلَى مُعْطَم and مُعْن مُعْلَم، the verb agrees with the quantified noun in gender and number, except when there is a pronominal suffix, in which case (masculine singular) agreement occurs with the quantifier (except عُلُ if its meaning is 'all of', rather than 'every'). In English, a plural verb is necessary in all cases. e.g.

"All students will attend the lecture."

"All women oppose the new law."

"Every table must include the examination venues."

"Every sheet contains the names of the employees."

"All of them will travel tomorrow."

"Some of them (fem.) are not Tunisian."

"Most of them do not take part in the elections."

'Number'

In English, the word 'number' is plural if it is preceded by "a", and singular when preceded by "the". In Arabic, agreement is with the modified noun. e.g.

"A number of students are working here."

"The number of people in debt in this country is very large."

The translations of the above examples reveal that in Arabic the **grammatical subject** once again prevails.

'Or/nor'

In English, if the parts of subjects joined by 'or' or 'nor' are singular, then the verb is singular. When they are all plural, then the verb is also plural. However, if there is a

mixture of plural and singular forms, then the verb agrees with that which is clos(er) (est). With personal pronouns, the latter rule also applies. e.g.

"Neither John nor I am late."

"Peter or Mary should do it."

"The teacher or the administrators **have** to notify students of any changes to the examination time-table."

"Either she or you are late."

In some cases, this may give rise to some awkward constructions, and careful users of English would probably rephrase the last sentence to:

"Either she is late, or you are."

Similarly, if the second/last element is the only singular one, most English-speakers would have the verb agree with the plural(s) in practice. e.g.

"The children or their teacher have left the keys."

In Arabic the above sentences do not pose any grammatical problems for the most part in view of the VSO order, i.e. the sentence-initial verb is in the singular, agreeing in gender with the **first** subject.

Noun-adjective agreement

Most of the elements mentioned above in relation to verb-agreement apply to noun-adjective agreement, which, too, is essentially determined by whether or not the noun refers to humans or non-humans, though, of course position does not have an effect since in Arabic the adjective always *follows* the noun it modifies.

Covert gender

The issue of covert gender mentioned in respect of verb agreement rules also, of course, has an impact on noun-adjective agreement. e.g.

```
,الشُّوقُ الْحُرَّةُ
                                              Duty Free market
,الدَّارُ الآخرةُ
                                              the Afterlife
إلحَرْبُ العالَيَّةُ
                                      World War
إطلاق نار كثيف
                                              fierce (gun) fire
,الأرْضُ ٱلْمُقَدَّسَّةُ
                                              the Holy Land
,تُونُسُ الخَضْراءُ
                                      Tunis 'the Verdant'
,حَلَبُ الشَّهْبَاءُ
                                              Aleppo 'the Grey'
,دمَشْقُ الفَيْحاءُ
                                              Damascus 'the Fragrant'
```

- NOTE: القُدْسُ القَدِيمُ Old Jerusalem, BUT القُدْسُ القَدِيمُ Jerusalem 'the Noble'!

Some adjectives agree with either masculine or feminine verbs and nouns. e.g.

```
بَلَدُودٌ
بَلَدُودٌ, 'dogged'
(grateful'
مَسُورٌ, 'patient'
عمِّي/عمَّتِي صَبُورٌ جِدًّا
"My uncle/aunt is very patient."
```

Others in a number of fixed expressions remain unmarked for gender. e.g.

```
'doting mother' أَمَّ حَنُونٌ/رَوَومٌ 'doting mother' . خَرُبٌ ضَرُوسٌ . حَرُبٌ ضَرُوسٌ
```

Arabic has a number of adjectives that are inherently feminine, i.e. they can only apply to women, yet are masculine in form, and thus never take the feminine marker قد وي المولى ('pregnant'), عاقِر ('menstruating'), عاقِي ('barren, sterile'), عاقِل ('barren'), عاقِل ('divorced'). e.g.

```
اَمْرَأَةٌ عَاقِرٌ, 'a barren woman'
إَمْرَأَةٌ حَامِلٌ, 'a pregnant woman'
```

☞ NOTE:

- 1. نساءُ حَواملُ, 'pregnant women'(!)
- 2. the other word for 'pregnant' only has a feminine form:

Quantifiers

When a quantifier is used, there is agreement with the specified **noun**, rather than with the quantifier. e.g.

"All the new books contained illustrations."

"We watched some foreign films."

Whereas in English students may be asked 'to leave their bags outside', their Arabic counterparts will be told to leave their bags outside', their fact that in English, the fact that each student has a bag necessitates a plural, whereas in Arabic the emphasis is on the fact that each student has one bag, with the use of the plural implying that they have several bags (at least more than one) each.

"They had a funny look on their faces."

"They will go to the final negotiation round with presents in their suitcases."

All (of)/each/every

In English, 'all' can be followed either by an indefinite or definite plural noun, whereas 'all of' can only be followed by a definite noun. When 'all' means 'the entirety, totality' or is used with a pronoun, it is followed by 'of' + definite noun. e.g.

"All (of) (the) students protested against the new law."

"All workers who were there voted against the strike."

"All the wood had been burnt."

"All of us attended the lecture by the Dean of the Faculty."

Note the use of 'all' as a noun, as in the following example:

"All he could do was admit to the crime, and accept the punishment."

This is mirrored in Arabic, where 'all' is usually expressed by the noun is, which, too, can be followed by a preposition, i.e. Note that when is means 'all (of)', it is always followed by a **definite plural noun** (or a pronoun). e.g.

"He spoke with all of the participants."

"All of you have to attend the conference."

"All of the students with learning disabilities are full members of society and have to be helped by all of us."

→ NOTE that when is in the subject of a subsequent verb, the latter is in the plural if the quantified noun is human (also see AGREEMENT). e.g.

"All the demonstrators rejected the government demands and are calling for civil disobedience."

In addition to the Arabic also employs the following to express totality or entirety:

• مجيع الطَّلابِ construction. e.g. إضافة construction. e.g. إضافة students'

- NOTE: بنيخ is also used with the article to denote 'all people' – whereas in the indefinite accusative it means 'all together', فعياً e.g. e.g.

everyone knows that.' الجَمِيعُ يَعْلَمُ ذلكَ

'he protects all of our sons.'

• اجْمَعُ (note the superlative form!) denotes 'whole', 'in its entirety' (fem. أَجْمَعُونَ, جُمَع اللهِ ; pl. جَمْعاأُ). It is used as an adjective and is thus found in post-modifier position. e.g.

'the whole Western world' ,العالَمُ الغَرْبِيُّ أَجْمَعُ

- NOTE: بأجمعه, 'in its entirety'. e.g.

يُسافِرُونَ بأَجْمِعِهم /جَمِيعاً

'All of them are travelling.'

'Baghdad is the most beautiful city in the whole world.'

• اضافة (note the feminine form!) occurs as the first element in an إضافة e.g. إضافة (all areas'

- NOTE: the adverb is means 'all without exception', 'collectively'. e.g.

"This law includes all students."

• أقطة, 'all together', 'all without exception', 'every single one'. e.g.

"The biggest army in the whole world"

• مانتره, 'entirely', 'all (of) ', 'every single one'. e.g.

"All of them went to the museum."

• 'in its entirety'. e.g.

"All (of) France said 'No' to the President."

• ملت, 'completely', 'wholly. e.g.

"The lion completely ate the gazelle, with hide and hair."

• محدافيو، 'all of it', 'without exception. e.g.

"The law will be applied in its entirety."

☞ NOTE: the use and translations of the following expressions with 'all':

"All in all, I think we're better off without him."

عَلَى الْعُمُومِ نَحْنُ في وَضْعِ أَفْضَلَ بِدُونِهِ all along (= 'throughout') e.g. 'All along, they thought that we wouldn't agree.' كَانُوا يَعْتَقَدُونَ دائماً بِأَنَّنَا لَنْ نُو افقَ كَانُوا يَعْتَقَدُونَ طَوالَ الوَقْتَ أَنَّنَا لَنْ نُوافَقَ one and all (= 'every single one'). e.g. "It is important to make this clear to one and all." مِنَ اللَّهِمِّ أَنْ نُوَضِّحَ هذا لِكُلِّ واحِدٍ مِنْهُم مِنَ الْأَهْمِيَّةِ بِمَكَأَنِ أَنْ نُوَضَّحَ هذا لِكُلِّ واحِدٌ مِنْهُم all alone (= 'all by -self'). e.g. "He was left there all alone/all by himself." تُركَ هُناكَ وَحُدَهُ تُركَ هُناكَ وَحِيداً

all the better (= 'so much the better'). e.g.

"All the better, if she doesn't tell him the truth." إِنَّ مِنَ الأَفْضَلِ أَلاَ تُخْيِرَهُ بِالْحَقِيقَةِ

Allow/permit/let

All three verbs imply the *giving of consent* for something. The difference centres mainly on grammatical usage:

- (1) both to allow (more common) and to permit can be followed by OBJECT + TO+INFINITIVE, and take an -ING FORM when there is no personal object;
- (2) In case of an impersonal passive, only to permit is used;
- (3) only to allow can be used with adverb particles;
- (4) To let, which is also the least formal of the three, is followed by an object + bare infinitive (never -ING!) and cannot be used in the passive, in which case it is replaced by to allow.

In Arabic, however, all three are generally rendered by £ e.g.

(1)

"We do not allow/permit people to smoke."

"We do not allow smoking."

(2)

"It is not permitted to eat on the premises."

"The rules do not permit cheating."

(3)

"The dog was not allowed out after 6 p.m."

(4)
"I cannot **let** this happen to the company."

لا أَسْمَحُ/لَنْ أَسْمَحَ أَنْ يَحْدُثَ هذا للشَّرِكَةِ

"This cannot be allowed to happen."

لا يُمْكِنُ السَمَاحُ لهذا بأَنْ يَحْدُثَ لا يُمْكِنُ أَنْ نَسْمَحَ لهذا بأَنْ يَحْدُثَ لا يُمْكِنُ لأَحَدِ أَنْ يَسْمَحَ لهذا بأَنْ يَحْدُثَ

Already/just/yet

These adverbs often cause problems to translators from English to Arabic since the rendering of the concepts they convey is often achieved through periphrastic constructions rather than adverbs, as is the case in English.

The tenses used with these adverbs pose another problem. In English they tend to be used with the **present perfect**. e.g.

"I have already done this."

لَقَدْ سَبَقَ وَأَنْ فَعَلْتُ هذا

"He has just arrived." (US: 'He just arrived')

لَقَدْ وَصَلَ تَوّا

Yet is the equivalent of already in negative and interrogative sentences. e.g.

"Have you seen her yet?"

هَلْ رَأَيْتَهَا بَعْدُ ؟

"I have not read the book yet."

الْمُ أَقُولُ الكِتَابَ بَعْدُ / لِحَدِّ الآنَ / إلى الآنَ

لَمْ نَذْهَبْ إِلَى الْعُطْلَةِ بَعْدُ لَمْ نَحْصَلْ عَلَى إِجازِ تِنَا/عُطْلَتِنا بَعْدُ

If the sense is 'earlier than expected', already, rather than yet, should be used. e.g.

"Have you **already** finished the dishes?" ﴿ قَالُونَ عَمْنُ الْأَطْبَاقِ؟ هِلَ إِنْتَهَيْتَ مِن غَسْلِ الأَطْباقِ؟

In Arabic, no distinctions are made whether the sentence is negative or interrogative, whereas the tense tends to be the perfect. The constructions are as follows:

'already': (لَقَد) VERBAL NOUN

PERFECT (ْلَقَد) سَبَقَ لَهُ أَن

'just':

لِتَوَّهِ رَحْدَ

الآن

في الحال

'not yet':

بَعْدُ + jussive + لَمْ

e.g.

لَقَدُ سَبَقَ لَها زِيارَةُ الْمُتْحَفِ لَقَدْ سَبَقَ لَها أَنْ زِارَتِ الْمُتْحَفَ

"She has already visited the museum."

لَمْ يَأْتِ بَعْدُ

"He has not come yet."

وَصلُوا لِتَوَّهِم

"They have just arrived."

بَدَأَتْ هَجَمَاتُ تَحالُفِ المُعارَضَةِ تَواً فَإِنْسَحَبَ الحِزْبُ الحاكِمُ مِن الإِنْتِخابات

"The attacks from the opposition coalition have (only) just started and the ruling party has withdrawn from the elections."

خَرَجَ مِنْ المُكْتَبِ الآن

"He has just (now) left the office."

In some cases, no adverbial is used in the translation of already. e.g.

سَيَكُونُونَ قَدْ زارُوا الْمُتْحَفّ (في الْوَقْتِ الَّذِي نَصِلُ فِيهِ)

"They will have already visited the museum [by the time we arrive]."

رُبَّمَا/يُمْكِنُ أَنْ يَكُونُوا قَدْ زارُوا الْمُتْحَفَ (لأَنَّهُمْ وَصَلُوا أَمْس)

"They could already have visited the museum [because they arrived yesterday]."

مِنَ الْمُوَكِّدِ أَنَّهُمْ زارُوا الْمُتْحَفَ (لأَنَّهُمْ كانُوا عَلَى عِلْمٍ بِمِكانِهِ)/(لأَنَّهُمْ كانُوا يَعْلَمُون مكانَهُ) "They must already have visited the museum [since they knew where it was]."

When already means 'previously', the Arabic translation is either سابقاً or سابقاً or سابقاً e.g.

"They have already visited the museum (e.g. during their first visit)."

Note that **just** can be added with **only**, in which case it conveys a sense of reluctance or defence. e.g.

"She's only just set foot in the company; you can't expect her to know everything yet!"

Also note the following idiomatic non-temporal uses of just:

"She's just as intelligent as her brother."

"The coffee's just right - neither too hot, nor to cold."

"That's just [= exactly/precisely] what I wanted to say."

"I'm just so tired."

"Just imagine!"

"Just don't let him get to you!"

"That takes just as long."

هذا يَأْخُذُ/يَسْتَغَرِقُ الْمُدَّةَ نَفْسَها

"Just because of what you said I won't do it!"

نَظَراً لِمَا قُلْتَه فَإِنَّنِي لَنْ أَفْعَلَ ذَلِكَ لَنْ أَ فْعَلَ ذَلِكَ لا لِشَيئ إلا لأنَك قُلْتَ بِهِ (قُلْتَه)

Although/though/albeit

Although and **though** both mean **despite**, but the former can never appear at the end of a sentence. **Though** is more informal, and is often found with **even**. It can also appear at the end of a sentence (= 'however'). **Albeit** means 'even though', and only occurs in the middle of the sentence. e.g.

"Cold though it was, we still managed to finish the football game."

"He is a successful, albeit arrogant, young man."

"Although they were poor, all the kids all got an excellent education."

"Even though I arrived on time, there was nobody else there."

Depending on the context, these are rendered in a variety of ways in Arabic:

Pronoun Preposition Negative particle perfect (+ قَد) imperfect + إِنَّ هُنَاكَ سَ/سَوْفَ	*فُ	Noun +	بِالرَّغْمِ مِنْ أَنَّ
		Noun+	بِرَغْمِ أَنَّ
		Noun +	رَغْمَ أَنَّ رَغْمَ
		Noun+	لَكِنَّ
- 5-76		Noun+	مَعَ أَنّ
Pronoun +	+ إِلاَّ أَنَّ		
Demonstrative +		Noun +	عَلَي الرَّعْمِ
Accusative noun			
is فَ is optional in all optional in all cases except إِنَّ and وَكُدْ before			

e.g.

"Despite his difficult circumstances, he was still able to excel in his duties."

"Even though/although the exam was difficult, I answered all the questions."

"Despite his illness he decided to attend the meeting."

"Even though/although I did not save a lot of money, I will be able to go to the Middle East."

"Even though/although he loves his country, he emigrated to America."

Among/between

"She was sitting between John and Mary."

"I was walking among the crowd, trying desperately to find my daughter."

"Sarah will be among the contestants in the race."

"The President was among those present at the reception held at the Royal Palace."

"The team was selected from among their midst."

"You can find it somewhere among those papers."

- NOTE: only 'between' can be used in expressions involving time and numbers, and is translated into Arabic as ا (في) ما يَنْ بَيْنَ . e.g.

"I visited him **between** the 10th and 15th of March of last year."

"We received between \$200 and \$300 for those old books."

تَسَلَّمْنا ما بَيْنَ 200 وَ 300 دُولارِ أَمْرِيكِيٍّ لِهِذِهِ الكُتُبِ القَدِيمَةِ

"Direct Foreign Investment in Egypt increased by 41.4% between 1994 and 1998."

قَدْ حَقَّقَتْ الاِسْتِثْماراتُ الأَجْنَبِيَّةُ الْمُباشِرَةُ في مِصْرَ زِيادَةً قَدْرُها %41.4 فِيما بَيْنَ العامَيْنِ المَالْيَيْنِ 1994 و 1998

"They sold between ten and fifteen shirts at that shop on Saturday."

باعُوا ما بَيْنَ عَشَرَةِ وَخَمْسَةِ عَشَرَ قَمِيصاً في ذلِكَ الْمَحَلِّ

Amount/number

Though these two nouns are increasingly used interchangeably, it is important to note that **amount** can only be used with uncountables (mass nouns), while **number** applies to countables. This is largely mirrored in Arabic, with sie being used for **number** and for **amount**. e.g.

"The **number** of cars on the road has increased dramatically over the past ten years."

"People in the UK consume five times the **amount** of tea, milk and sugar that is used in the rest of the European Union."

(إِنَّ) anna (أَنُّ) in (إِنَّ) inna (إِنَّ)

The above particles have a number grammatical peculiarities that cause problems in translation.

and if are part of a set known as if and her sisters' (the others are الله 'as if' and 'perhaps'2) because they share a number of features, most important of which is the fact that they turn the subject noun accusative, whereas a pronoun must be added if the subject is not overt; in other words, they cannot be followed immediately by a verb.

in Classical Arabic, it was used to introduce sentences that did not start with a verb; in MSA, it tends to be used as a sentence-initial intensifier – either with a noun or pronoun – and is then often translated as 'indeed'. From a grammatical point of view, the becomes (in the accusative), whereas the remains in the nominative. e.g.

"They indeed believe that the end justifies the means."

"The door is open."

→ NOTE: that when the subject is separated from the particle by a place adverbial, it remains in the ACCUSATIVE. e.g.

"There is a driver in the train."

this particle introduces if-clauses in CONDITIONAL SENTENCES

both are complementizers, that is to say, they introduce clauses and are the equivalent of the English 'that'. One of the problems when translating that-clauses from English to Arabic is the fact that the choice of and depends on the verb with which they occur, unlike in English where 'that' is used with all verbs. Generally speaking, tends to occur with verbs of perception (e.g. 'to believe', 'to feel', 'to hear', 'to know', 'to read', 'to think'), while is found after verbs expressing ability, hope, expectation.

Unfortunately, in many cases things are not as simple or predictable as that, as can be seen from the following list which contains some of the frequently encountered verbs that collocate with each:

In some cases, verbs collocate with both نا and نا e.g. ('it could be that').

The difference in usage between نا and نا also affects prepositional phrases. e.g.

Č	('it is possible that')
	مِن الْمُتَوَقَّع ('it is hoped that')
أَنَّ	مِن المُعْرُوف ('it is known that')

Also see 'Can/May/Might'

☞ NOTE:

1. The verb following is in the SUBJUNCTIVE, the verb with is in the IMPERFECT. e.g.

"I knew that he was eager to see her."

"He swore that he would withdraw his complaint."

2. can also be used as a complementizer, but **only** with the verb ('to say'), in which case it introduces indirect speech. e.g.

"The Minister said that the country was under attack by the remnants of the militia belonging to the former regime."

3. When the verb is negated, the negative particle \(\) and \(\) are often contracted to \(\) e.g.

يَجِبُ أَنْ لا/أَلاَّ تُدَخِّنَ

"You must not smoke."

4. Some of these verbs require a preposition before of e.g.

"She doubted whether he would fulfil his promise."

"The Prime Minister recognized/acknowledged that the government had failed in its duty."

5. The same complementizer can govern several items. e.g.

"We have to recognize our mistakes, correct them and learn from them."

"He said that the meat, vegetables and coffee were cold."

6. Some Arabic verbs allow for a construction with a verbal noun (with عالم)) as an alternative to the الحالة clause. e.g.

"He'll be able to/can write the letter at the airport."

7. While in English 'that' can often be left out, it must always be included in Arabic. e.g.

"He denied (that) the team's defeat would ruin their chances in the final."

8. The Arabic clause introduced by often needs to be translated by an infinitive in English. e.g.

"I wanted to tell her that he loved her."

"We agreed to rebuild Egypt on a solid basis."

"He decided to abolish the new controversial law."

9. English subordinate clauses sometimes need to be rendered by a prepositional phrase including a verbal noun in Arabic. e.g.

"She assured me that she was sincere [of her sincerity]."

Like الله ('but'), which marks contrast between two clauses, must also be followed by a noun or pronoun, while its variant, نخر is the form used with a verb. e.g.

"I know he is a thief but I forgave him his crimes."

Anymore/no more/no longer/any longer

All three adverbials denote cessation of an activity or non-availability of something and the difference between them is primarily one of grammatical usage: anymore (or any more) and any longer should only be used with negatives, whereas no more and no longer occur only with affirmative verbs. The usual Arabic construction is through the negative of the verb [1.6]. i.e. [1.6].

"You (m. pl.) are no longer responsible for our actions."

"You (m. pl.) are no longer responsible for our actions."

"She is no longer interested in going on the trip with us."

"She is no longer interested in going on the trip with us."

أ تُعُدُ تُرْغَبُ فِي الذَّهَابِ مَعَنَا إِلَى الرِّحُلةِ

"We couldn't stand it any longer."

أ تُعُد تَتَحَمَّلُ/نُطِيقُ هذا

"I no longer have anything left in life."

[= "I don't have anything left in life (any more)."/

"I have nothing left in life any more."]

In some cases, however, the same meaning is conveyed in Arabic by a content verb or adverbial. e.g.

"She will not be able to get my help anymore." لَنْ تَتَلَقَّى مُسَاعَدَةً مِنِي بَغْدَ الآنَ/لَنْ أُساعِدَها أَكثَرَ مِنْ هذا

لَمْ يَبَقَ لِي شَيْعٌ فِي الْحَياة

"She won't be able to do it any more in three years' time."

لَنْ تَسْتَطِيعَ أَنْ تَفْعَلَ ذلِكَ بَعْدَ ثلاثِ سَنَواتٍ

"There is **no more** milk left in the fridge."

"He can't look at her any longer."

"I can't take his ridiculous behaviour anymore."

☞ NOTE: TO BE + no more/longer means 'to die'. e.g.

"He is no more."

Only no more can also be used to express degree. e.g.

"You have **no more** claim to the truth than anybody else, so get off your high horse."

"She isn't any more interested in pyramids than I am in gardening!"

any more (always written in two words!) can also mean 'not more of something'. e.g.

"We do not need any more regulations; we've got too many already!"

Appeal/appal

Despite being similar in form, these two verbs actually mean almost the direct opposite: to appeal refers to an attraction, while to appal denotes shock. e.g.

"This idea rather appeals to me."

"We were appalled at/by what we found out."

"They were appalled to discover what she had done."

In terms of translation, the following points merit mention:

1. The usual Arabic verb to render 'appeal' is Note that it requires an object pronoun suffix. e.g.

2. In English, 'to appal' tends to appear only in the passive voice, whereas the usual Arabic translation involves the participles مُريع مَرُوع مُرُوع مُرُعب مُرعب or adjectives such as هائل or فَظِيع e.g.

[&]quot;His behaviour was appalling."

[&]quot;We were appalled at/by his behaviour."

Appreciable/appreciative

This set is often confused for obvious reasons. They should, however, be carefully distinguished: when you are **appreciative** (or **appreciatory**) **of** something, it means that you appreciate it, i.e. think highly of it. As for **appreciable**, this is, in fact, synonymous with 'noticeable', 'clear'. e.g.

"Whenever I've spoken to her, she was always very **appreciative** of what I'd done for her."

"There is an appreciable difference in the analysis of the data".

Approval/disapproval

There are a number of idiomatic expressions in which approval/disapproval is expressed in English. However, these are not always easily translatable in Arabic, not least because of cultural reasons. For instance, in English it is customary to couch a negative point in a vaguely positive-sounding construction, which in many cases cannot be translated literally into Arabic, where approval is often expressed much more succinctly. The following are some of the commonly used expressions and phrases that may be encountered.

Approval

Medium

"That seems a good idea."

"I think we can go along with these arrangements."

"I'm happy to leave it to you."

"We're in agreement on this issue."

"There seems to be a consensus on this point."

Strong

"I'm in complete agreement."

أَنا مُتَّفِقٌ مَعَكَ تَمَاماً أَنا أَتَّفِقٌ مَعَكَ تَمَاماً أَنا مُوافِقٌ عَلَى ما تَقُولُ تَمَاماً أَنا أُوافقُكَ الرَّأي تَمَاماً أَوافقُ عَلَى ما تَقُولُ تَمَاماً أَوافقُ عَلَى ما تَقُولُ تَمَاماً

"I couldn't agree more."

-أَنا مُوافِقٌ عَلَى ما تَقُولُ تَمَاماً

"I'm with you all the way on this."

أَنَا مَعَكَ عَلَى طُولِ الخَطِّ أَنا أُوَيِّدُكَ في هذا الأَمْرِ

"You're right there."

أَنْتَ مُحِقٌّ في هَذِهِ النُّقُطةِ

"You've hit the nail right on the head."

لَقَدْ أَصَبْتَ عَيْنَ الْحَقِيقة لَقَدْ أَصَبِتَ اللَّحَزَّ "I'm completely in favour of that." أَنا أُوْيَدُ ذِلِكَ تَمَاماً

"I've absolutely no objection."

لَيْسَ لَدَيَّ أَيُّ إِعْتِراضِ

Disapproval

Introducing Disapproval

"I don't want/wish to be negative, but ..."

... لَا أُرِيدُ أَنْ أَكُونَ سَلْبِياً وَلكِنَّ ...

"I accept the need for ..., but ..."

... أَنا أَقْبَلُ بِأَنَّ هُناكَ حاجةٌ إلى ... ولكنَّ ... أَنا أُقَدِّرُ بِأَنَّ الوَضْعَ/المُوْقِفَ/الأَمْرَ يَحْتاجُّ إِلَى ... ولكِنَّ ...

"I appreciate your point of view, but ..."

أَنا أَقَدُّرُ وُجْهِةَ نَظَرِكَ وَلٰكِنَّ ...

It's not that I've got anything against it, but ..."

لَيْسَ لَدَيَّ شَيٌّ ضِدَّهُ /لَيْسَ عِنْدِي أَيُّ شَيٍّ ضِدَّهُ وَلَكِنَّ ...

"I appreciate that, and while I don't agree with it, I'll take it into account."

أَفْهَمُ ذَلِكَ وَسَوْفَ أَنْظُرُ إِلَيْهِ/آخُذُهُ بِعَيْنِ الإعْتِبارِ بِالرَّعْمِ مِن أَنَّنِي لا أُوافِقُ عَلَيْهِ لا أُوافِق عَلَيْهِ وَلَكِنِّي سَأَنْظُرُ فِي الأَمْرِ مَرَّةً أُخْرَى أنا أُقَدِّرُ وُجْهِةَ نَظَرِكَ بِالرَّعْمِ مِن أَنَّنِي لا أُوافِقُك عَلَيْهِ وأَعِدُكَ بِأَنَّنِي سَأَنْظُرُ فِي المَسْأَلَةِ مَرَّةً أُخْرَى

"I agree up to a point, but ..."

أنا أَتَّفِقُ مَعَكَ/ أَنا مَعَكَ إلى حَدٍ ما وَلٰكِنَّ ...

"I see your point but ..."

أُقَدِّرُ وُجْهِةَ نَظَرِكَ وَلَكِنَّ ...

"I see what you're getting at but ..."

أَعْرِفُ ما تُرِيدُ الوُصُولَ إلَيْهِ وَلكِنَّ ...

"I suppose/presume you're right but ..."

لَعَلَّكَ عَلَى حَقٌّ ولكِنَّ ...

لَوُبَّمَا كُنْتَ مُحَقّاً وَلَكِنَّ ...

أَظُنُّكَ عَلَى حَقٌّ وَلَكَنَّ ...

"I fail to see the relevance."

لا أَسْتَطِيعُ أَنْ أَرَى صِلةً/إِرْتِباطاً لا أَرَى أَنَّ هُناكَ إِرْتِباطاً/صِلةً بَيْنَ هذا وذاكَ

"Although there's a lot to say for it ..."

مَعَ أَنَّنا نَسْتَطِيعُ أَنْ نَقُولَ الكَثِيرَ بِشَأْنِ ذَلِكَ وَلكِنّ ... هُناكَ إِيجَابِياتٌ كَثِيرةٌ في هذا المُؤضُوع ولكِنّ ...

"I'm sorry, but I really don't think that's such a good idea."

آسِف فَأَنا لا أَعْتَقِدُ أَنَّ هذِهِ فِكُرةٌ جَيِّدةٌ

"I understand the motive for broaching the subject, but ..."

Mild

"I'm sorry, but that's not really practical."

"I think you're missing the point."

"That's quite debatable."

"I'm afraid I'm not very happy about that."

"I'm sorry, but I have reservations about that."

"I suspect that we're faced with a moot point."

"Don't get me wrong, but ..."

"Don't misunderstand me, but ..."

"I'm sure we both want to avoid a situation where ..."

"I appreciate your position, but I'm afraid we cannot go along with this."

"If you look at it closely, you will see that it must be reviewed."

"I'm afraid that this kind of thing is not my cup of tea."

"We mustn't jump to conclusions."

"We shouldn't rush into anything."

"I can't say I'm (very) impressed."

Strong

"I really can't accept that."

"I'm absolutely/completely against that."

"That's out of the question."

"That's just not on!"

هذا غَيْرُ مُمْكِنِ أَبَداً لا يُمْكِنُ قُبُولُ هَذَا أَبَداً هذا غَيْرُ مَقْبُول لا يُمْكِنُ هذا أَبَداً

"I disagree completely."

أَنَا لا أَتَّفِقُ مَعَ ذَلِكَ أَبَداً أَنَا أَخْتَلِفُ مَعَكَ ثَمَاماً

"You've got it all wrong!"

أَنْتَ مُخْطِئٌ تَمَاماً لَقَدْ أَسَأْتَ فَهْمَ الأَمورِ

Arab/Arabic/Arabian

'Arab' is a noun which refers to someone of Arab origin; as an adjective it demotes things referring to Arabs. 'Arabic' can only denote the language, whereas 'Arabian' refers to things (not people!) related to the Arabian Peninsula (Arabian Gulf). In Arabic, however, the same form is used in all three cases, though for *Arabian* the adjective خليج العربي ('Gulf') is often used, as in English the phrase 'Persian Gulf' should be avoided!). e.g.

"Arab history is very rich in powerful rulers."

"I bought an Arabic book on Islamic Spain."

"Arabian horses are famous all over the world for their speed and grace."

"The remaining part will be exported to **Gulf** markets, especially to Oman and Kuwait."

Note that a phrase like مُو خَلِيجِي is most correctly translated as "He comes/is from the (Arabian) Gulf."

When it comes to architecture, can still be used in Arabic, but should in most cases be rendered by 'Islamic' in English for idiomatic reasons. e.g.

"Islamic architecture spread in the Middle Ages."

As/because/since/for

The following conjuncts introduce reason clauses in English;

- as
- because
- since
- seeing that (in view of the fact that ...)
- now that (it being the case that ...)
- for
- in as much as

All either *precedes* or *follows* the main clause, while **for** usually follows the main clause. In Arabic, the following reason clause introductors are used:

إذْ

"The government decided to abandon its policy **because** the impact on the region was going to be very dangerous."

/pronoun suffix/demonstrative. e.g.

"I was late at the exam because of the rain."

"Moving between countries has become easy **because** of the availability of means of transport."

"She failed in her assignment because of him."

"I can't travel today because of this cold weather."

pronoun suffix/demonstrative. e.g. اضافة + يفغل

"The Euro fell back against the dollar **because** of fears regarding the Italian debts." تَراجَعَ اليُورُو أَمامَ الدُّولار بِفِعْلِ تَخاوفَ من الدُّيُونِ الإيطالِيَّةِ

+ NOUN/PRON. e.g.

"He won't travel tomorrow because/seeing that he's ill."

"They can't come in as/since we're not ready yet!"

"She doesn't want to come in **since/as/because** she feels that you insulted her." لا تُريد الدُّخُولَ لائها تَشْعُرُ بانَّكَ قَد أَهَنْتَها

"Don't blame me, for it wasn't my decision to come to this hotel." لا تَلُمْنِي لَأَنَّ إِخْتِيارَ هذا الفُنْدُقِ لَمْ يَكُنْ قَراري

+ NOUN/PRON. e.g.

"The judge sentenced the accused since the crimes against him had been proved."

"Exposure to the sun is very important, but it must be limited **inasmuch as** it is a double-edged sword."

+ NOUN/PRON. e.g.

"I know what's been happening to them, because they're always writing to me."

... فَ + NOUN/PRON. e.g.

"As he's very ill, he won't attend the meeting tomorrow."

"As the weather is nice, I'll go to the park."

"Now that/since/as I'm here, I might as well help you prepare dinner."

... فَ/فَقَدُ NOUN/PRON. e.g.

"I decided to postpone my departure because of the bad weather conditions."

e.g. عَلَى ذَلِك

"The number of poor people in developing countries has risen and, as a result, rich countries have to increase their humanitarian assistance.

.e.g. لِذَلِكَ

"The train was late and because of this/as a result I had to take the bus."

e.g. مَنْ جَرّاءِ (أَنَّ)

"According to media sources, the prisoners died because of fierce torture."

+ NOUN/PRON. e.g.

"Seeing that/as/since you have helped me in the past, I'll not tell the boss that you didn't show up for work this morning."

: NOUN/PRON. e.g. عَلَى ذِمَّةِ

"The court decided to jail the defendant for four days for the purpose/ because of the investigation."

- Also see 'Since/For/During'

As for

For reasons of style or emphasis, the subject of a verb is put in sentence-initial positions and is often introduced by 'as for'. In Arabic, the *topic* (the fronted object) is introduced by 's, whereas the *comment* (the part of the sentence commenting on it) is preceded by 's, which is not translated into English. e.g.

"As for the security services, they crushed the revolution without hesitation." أُمَّا قُوَّات الأَمْن فَقَمَعَت النَّوْرَة بدُون تَرَدُّد

"As for her, she will never go against her father's wishes."

Note that one can also achieve the same effect without the connective if by preposing the subject with the addition of a resumptive pronoun affixed to the verb. In English, the translation of this construction often includes the use of 'only'. e.g.

"You encounter a man as generous as he (is) only rarely in life."

As if/as though

Both 'as if' and 'as though' mean as it would be if, and are often (though not exclusively) used with past tenses to denote present meaning. In Arabic, both are rendered by . e.g.

"It's as if/though she didn't want me to leave." كَانَتْ وَكَانَهَا لا تُريدُنِي أَنْ أَذْهَبَ

In 'unreal' comparisons, the subjunctive form of the verb 'to be', i.e. were, is used instead of the past tense was, with the latter being reserved for real comparison. In practice, this means that you use the simple past form when the comparison is not contrary to fact. The usual Arabic construction here is ... though is also found. e.g.

"They were talking about him **as if/though** he were present. [he died] كَانُوا يَتَكَلَّمُونَ عَنْهُ كَمَا لَوْ كَانَ حَاضِراً

"They looked at me **as if/though** I were a criminal." [I'm not a criminal] كَانُوا يَنْظُرُونَ لِي وَكَأَنِّي مُجْرِمٌ

"She was talking to him as if/though she was about to hit him." [she could hit him]

كانَتْ تَنْظُرُ إِلَيْهِ وَكَأَنَّها عَلَى وَشْكِ أَنْ تَضْرِبَهُ

As/like

In a number of contexts, these two adverbs may be used interchangeably in English; however, with a finite clause (one containing a verb) only **as** should be used, with **like** being restricted to nouns. A similar phenomenon may be observed in Arabic where and are used only with nouns, and with verbs. e.g.

"Like you, I love travelling to Middle Eastern countries."

"As my mother said, you should go to the hairdresser's."

"Do as you're told."

"As it is, they have been studying for five hours and they still have a lot to do.

"The Member of Parliament was appointed **as** the new manager of the company." عُيَّنَ عُضْوُ مَجْلِس النُّوابِ مُدِيراً جَدِيداً للشَّرِكةِ

Sometimes, they can be used contrastively. Consider, for instance, the difference in meaning between these two contexts, which is also reflected in the choice of words in Arabic. e.g.

"He works **as** a painter." [it is his job] الله يَعْمَلُ رَسَّاماً

"He works **like** a painter." [his method of working is like that of a painter] يَعْمَلُ مِثْلَ الرَّسام

As long as

In Arabic this is rendered by which can be followed either by a verb, noun, or adverb, ... with the continuation clause often being introduced by ... e.g.

"As long as he doesn't resign, the protest will continue." ما دامَ رئيساً فَإِنَّ الاحْتِجاجاتِ مُسْتَمِرَّةً

"As long as he works for this company, his financial situation will improve." ما دام يَعْمَلُ فِي هذه الشَرِكَةِ، فَإِنَّ حَالَتَهُ المَادِيةَ سَتَتَحَسَّنُ

"As long as there is work there, our dreams will not be shattered." ما دامَتْ هُناكَ فُرَصٌ لِلعَمَل فَإِنَّ أَحْلامَنا لَنْ تَتَبَخَّرَ

"As long as they are in power, they are entitled to issue laws." ما دامُوا في الحُكْم يَحِقُّ لَهُم إِصْدارُ قَوانِينَ جَدِيدةٍ

"Muslims shouldn't be blamed for taking care of themselves, as long as they strive towards justice to others."

لا يَنْبَغِي أَنْ يُلامَ الْمُسْلِمُونَ إِذا إِهْتَمُّوا بِمَصالِحِهِم ما دامُوا حَرِيصِينَ عَلَى تَحْقِيقِ العَدالةِ لِغَيْرهِم

As much as

This expression means 'in the same measure as' or 'to the same extent as' and is rendered in Arabic by the prepositional phrases فقر ما which are usually followed by a verb (in the perfect or imperfect), or عقد المعادة ال

'God takes as much as He gives.'

'I hate you as much as I love you.'

☞ NOTE: When the noun is a countable, the expression becomes **as many** ... **as.** e.g.

"There are as many positive as negative aspects."

As soon as

This expression is subject to a number of constraints in terms of the tenses that can be used in English:

- i. PRESENT SIMPLE ... FUTURE SIMPLE
 - ii. PRESENT SIMPLE ... PRESENT SIMPLE (intention, narrative)
- iii. PAST SIMPLE ... PAST SIMPLE

In Arabic, it is rendered by the following:

		+ SUBJ.	ِمُجَرَّدِ أَن
		+ IMPERF./ PERF.	للَّاح
		+ SUBJ.	ما كادَ أَنْ
+PREF.	+ حَتَّى	+ IMPERF.	لَمْ يَكَدُ
		+ PERF.	ما إِنْ

e.g.

"As soon as they finished unpacking, they left to explore the city." مِعْجَرِّدِ أَنْ أَفْرَغُوا حَقائبَهُم ذَهَبُوا لاِسْتِكْشافِ/لِلاسْتِطْلاعِ عَلَى اللَّدِينةِ

"As soon as he gives me the money, I'll give him the keys to the house." سَأَعْطِيهِ مِفْتَاحَ الْبَيْتِ حَالَا يُعْطِيني الْمَالَ

"He came in and as soon as he saw me there, he fled through the garden." دَخَلَ البَيْتَ ولَكِنَّهُ مَا كَادَ أَنْ يَر انِي حَتَّى هَرَبَ عَن طَرِيقِ الْحَدِيقةِ

"As soon as they'd finished work, they packed their bags and left." لَمْ يَكَادُوا يَنْتَهُونَ مِن العَمَل حَتَّى حَزَمُوا حَقائِبَهُم وغادَرُوا "As soon as I read the letter, I realized its importance."

ما إِنْ قَرَأْتُ الرِّسالةَ حتَّى أَدْرَكْتُ خُطُورتَها

As well as

This phrase is synonymous with *in addition to* or *not only*. When it is used with a verb, the **-ING** form is usually used. It is placed either before or after the additive noun. The Arabic translations include the following:

"As well as learning how to swim, he has been taking Dutch lessons"

"John passed the driving test, as well as Duncan."

(= "John passed the driving test, and Duncan did as well."

"Both John and Duncan passed the driving test."

"John passed the driving test, as did Duncan."

"John passed the driving test, and Duncan did, too.")

نَحَحَ جُونَ في امْتِحانِ السَّياقة /القِيادةِ وَكَذَّلِكَ دُنْكُنَ نَحَحَ جونِ في امْتِحانِ السِّياقة /القِيادةِ وَنَحَحَ دَنكَن أَيْضاً نَحَحَ كُلُّ مِن جَونَ ودنكن في امْتِحانِ السِّياقة /القِيادةِ نَحَحَ جونَ في امْتِحانِ السِّياقة /القِيادةِ كَما نَحَحَ جُونَ نَحَحَ جون في امْتِحانِ السِّياقة /القِيادةِ وَنَحَحَ دنكن كَذَلِكَ

NOTE: observe the difference in meaning between:

"She writes, as well as acting on the stage." [she writes, whereas she also works as an actress.]

and

"She writes as well as she acts." [her writing is as good as her acting]

As well can also mean 'too', but is used only post-nominally. e.g.

"You shouldn't be angry with him, everyone else forgot to do it as well." يَجِبُ آَنْ لا تَغْضَبَ مِنْهُ لاَنَّ الآخَرِينَ نَسُوۤا آَنْ يَفْعَلُوهُ (ذلك) أَيْضاً

However, when preceded by 'may' or 'might', as well means 'with the same effect', in which case it is rendered in Arabic as من المُنتَّخْسَن أَنْ e.g.

"You might as well give him the photographs since I don't need them anymore." مِن الْمُسْتَحْسَن أَنْ تُعْطِيَهُ الصُّورَ لاَتَّنِي لَمْ أَعُدْ أَحْتاجُ إِلَيْها

→ NOTE: Do not confuse the above phrase with the comparative as well, meaning 'as good as':

"She plays tennis just as well." (= she is as good a tennis player as she is, for instance, an ice-skater.)

إِنَّهَا بارِعةٌ في لُعْبَةِ التَّنْسِ كَذَلِكَ تَلْعَبُ التَّنِسَ بِبَرَاعةٍ مُمَاثَلةٍ لـ ...

Auxiliary verbs

Arabic has a series of 'auxiliary' verbs, which, though not behaving exactly like, for instance, the English 'do' or 'have', do share some of the latter's 'helper' role in the sense that they tend to co-occur with other verbs and very rarely by themselves. In some cases, these verbs have a completely different meaning when used as a main verb. e.g. 'to begin to' (auxiliary)/'to take'. In terms of construction, they have in common that the subject tends to be placed between the auxiliary and 'main' verb. The verbs may be divided into a number of categories, according to meaning:

1. Inchoative verbs

These verbs denote the start of an activity:

	(u) أُخَذَ
	(a) أَصْبَحَ
IMPERFECT	(u) بَدَأَ
	(u) جَعَلَ
	(u) صارَ

"His behaviour had begun to attract the attention of his colleagues."

"The teacher started to shout when he noticed that none of the students had done their homework."

بَدَأَ الْلَدَرِّسُ يَصْرُخُ عِنْدَما أَدْرَكَ أَنَّ جَمِيعَ الطُّلابِ لَمْ يُوَّدُّوا وَاجِبَهُم جَعَلَ اللَّدَرِّسُ يَصْرُخُ عِنْدَما أَدْرَكَ أَنَّ لا أَحَدَ مِن الطُّلابِ أَدَّى واجِبَهُ أَصْبَحَ اللَّدَرِّسُ يَصْرُخُ عِنْدَما أَذْرَكَ أَنَّ لا أَحَدَ مِن الطُّلابِ أَدَّى واجِبَهُ

"The Arabs will make new concessions." سَأَجْعَلُ الْعَرَبَ يُقَدِّمُونَ تَنازُلاتِ جَدِيدةِ

2. Possibility and probability

	يُمْكِنُ ('it is possible')
	('it is permissible, possible')
	('it is probable')
	('it is to be expected that')
+ أُنْ + SUBJUNCTIVE	(it is held to be probable') يُرَجَّحُ
VERBAL NOUN + + أَنْ يَكُونَ قَد + PREF (probability of a past event)	
	مِنَ الجَائزِ
	مِنَ الْمُكِنِ
	مِنَ الْمُتَوَقَّعِ
	مِنَ المُحْتَمَلِ
	مِنَ الْمُوَمَّلِ

e.g.

مِا زالَ أَمَامَكَ وَقْتٌ طَويِلٌ، يُمْكِنُكَ أَنْ تُسافِرَ بِالسَّيَّارِةِ أَوْ بِالقِطارِ

"You still have a lot of time; you can either go by car or by train."

/يُرَجَّحُ أَنَّ الجَبْهةَ الإِسْلامِيَّةَ لَنْ يَكُونَ لَها وُجُودٌ كِحِزْبٍ يُرَجَّحُ أَنَّ لا يَكُونَ للجَبْهةِ الإِسْلامِيَّةِ وجودٌ كَحِزْبٍ

"The Islamic Front will probably not exist as a party."

"It is likely/expected that Muhammad will go to America."

"It is possible that I'll go to Egypt next year."

"It's possible he went to Egypt last year."

"I can't find him anywhere; maybe/it is possible that he's asleep in his room."

"It is expected/anticipated that the American president will pay a visit to the Middle East twice a year."

"It is probable that the crisis will continue."

"It is to be hoped that the teachers will have returned to their classrooms."

NOTE: possibility can also be expressed in the following ways:

imperfect. e.g.

"My brother may arrive today."

followed by either a nominal or verbal phrase. e.g.

"He may be in his office in the morning."

followed by a perfect (with present/future meaning). e.g.

رُبُمَا سافَرَ إلى بارِيس "He **may** travel to Paris./Perhaps, he'll travel to Paris."

3. Imminence

IMPERF. + SUBJ. أنْ. +	کاد/یَکاد
	أَوْشَكَ/يُوشِكُ عَلَى
SUBJ. أَنْ +	عَلَى وَشْكِ
	عُسُى

In addition to verb clauses with 'almost' or 'nearly' (q.v.), these verbs are translated into English by means of the following:

	on the brink of	
	on the verge of	+ ING
TO BE	on the point of	+ IIVG
	close to	
	about	+ TO INF.

[&]quot;He was on the point of leaving." يُوشِكَ عَلَى الرَّحِيل

"He was on the verge of accepting the job offer." كَانَ عَلَى وَشُكِ أَنْ يَقْبَلَ الوَظِيفَةَ

"The company had been on the brink of ratifying the deal."

كانَت الشَّرِكةُ قَدْ أَوْشَكَت عَلَى إِبْر ام الصَّفَقةِ

"He almost cried when he heard the news about her death."

كانَ عَلَى وَشْكِ أَنْ يَبْكِي عِنْدَما سَمِعَ خَبَرَ وَفاتِها

"He can almost not believe that the artist left the festival."

يَكَادُ لا يُصَدِّقُ أَنَّ الفَنَّانَ غادَرَ المَهْرَجانَ

"Things nearly took a turn for the worse when my brother lost his job."

NOTE: when is used with a negative particle, it means 'barely, scarcely' (q.v.). e.g.

"He had barely finished the exam when he fainted."

Finally, there is the 'dummy' verb القُومُ) الله + VN, whose closest equivalent in English is 'to effect, to carry out' and is a very popular construction in Media Arabic. It may be rendered in a variety of ways in English, including by omission. e.g.

قامَ بواجبهِ

"He did his duty."

قامَ بِالتَّمْرِينِ

"He completed the exercise."

قامَ براجُراءِ هذا البَحْثِ

"He carried out/conducted this research."

قامَ بِتَوْصِيَةٍ لزَمِيلِهِ

"He provided a reference to his colleague."

قامَ بِتَنْظِيمِ مُظاهَرَةٍ

"He organized a demonstration."

"The policeman proceeded with the arrest of the thief."

"He effected a restructuring of the company."

"He achieved great success."

"He wrote the article."

- Also see 'To Become', 'Keep On ...'; 'Obligation'; 'Hardly ...'

(أَمْ) am (أَوْ) AW

Both these conjunctions translate as 'or', but is preferred in questions. e.g.

"We'll drink juice or coffee."

"Do you write or draw with charcoal?"

"We'll drink juice, coffee or milk."

→ NOTE: In English, or only occurs before the last element in the series; preceding items are separated by commas.

Though both if and if can be used with the negative particle y to render 'or not', y is much more common. e.g.

"Did you see him, or not?"

☞ NOTE: 'or not' is preceded by a comma in English.

- Also see 'Correlative Particles'

Beach/shore/coast/seaside

Though closely related in that all four words refer to the edge of the sea, they cannot be used interchangeably. The most general word is **shore**, whereas **coast** is the usual word when talking about the edge of the sea on maps, in relation to the weather, etc.; the **beach** is part of the shore that is smooth and has sand (or shingle) on it. To put it differently, **coast** refers to a wider area of land than **shore**, which denotes a narrow strip, whereas not every area along the sea has a beach! **Seaside** implies both **coast** and **beach**.

In Arabic, سَوَاحِلُ (pl. (سَوَاحِلُ and شَوَاطَىُ (pl. (شَوَاطَىُ can be used for 'shore', but only the latter denotes 'beach', or 'seaside', though this can also be expressed simply by البُحُرُ ('sea').

"This year, we are spending our holidays at the seaside/coast."

"Let's go to the **beach** this afternoon!"

"They saw the ship coming into shore." (NOT: beach or seaside)

"At the coast/seaside, temperatures are going to rise over the weekend."

"I prefer living near the coast/seaside."

To become

In Arabic, this copula is usually rendered by صار (i) or أَمْسَى, أَضْعَى with أَمْسَى, أَضْعَى and أَسْسَى, أَضْعَى with أَمْسَى, أَضْعَى with إَمْسَتَى, أَضْعَى with إَمْسَتَى, أَضْعَى with إِمْسَتَى, أَضْعَى and أَمْسَى, أَضْعَى with إِمْسَتَى, أَضْعَى إِمْسَاءِ إِمْسَاءِ

"In the end, he became a very traditional artist."

"We became very close friends after his wife's death."

"They would have become enemies, if I had not told them how much they needed each other."

"I'm sure she will become a good painter."

☞ NOTE:

('to be in the morning', 'to become clear'), أَضَعَ 'to be in the morning', 'to become visible') and الله ('to spend the night') can also be used as content verbs. e.g.

"She'll spend the night/ sleep at her grandfather's house."

"The government's behaviour reveals its extremist attitude towards religious minorities residing in the country."

أَصْبَحَتِ الْحَقِيقَةُ وَاضِحَةٌ بَعْدَ وُصُولِ اللَّدِيرِ الْجَدِيدِ "The truth came to light when the new director arrived."

and ماز can also be used as auxiliaries of imminence (q.v.)

In a number of other cases, **to become** is conveyed in Arabic without having recourse to linking verbs. e.g. (u) ('to become big'; 'to become old'), (u) ('to become small'), (to become complicated'); (u) ('to become thin'); (a) ('to become fat'); (u) ('to become silent').

Before/in front of/opposite/facing/across

Before is usually used to indicate earlier than, already; in front of can only be used when talking about a place. Before (and not in front of) is used for lists, to mean in the presence of, and in a number of expressions (e.g. 'before my eyes'). In Arabic, before is generally rendered as which can be used for both time and place, with occurring with people only.

In front of is the opposite of behind and like opposite and facing means directly on the other side of (e.g. a road, river). When there is a sense of movement, only in front of is possible. Across also means on the other/opposite side of, but not necessarily directly opposite. In Arabic, 'in front of can be rendered by the following: قَالُ مُعَالِدُ مُعِلَدُ مُعَالِدُ مُعَ

"The man ran towards (NOT facing/opposite!) the bus."

"The building across the street has been broken into twice this week."

"We came in **before** anyone else."

"The box in front of the cupboard needs to be repaired."

"Faced with continuous attacks, an official source warned that the area would be turned into a living hell."

- NOTE: across can also mean 'from one side to the other', which, depending on the context is rendered in Arabic by الى آخر، عَبْرُ لَعُورُ فَوْقَ، عَلَى مِنْ جَانِب e.g.

"He ran across the street to see what was going on."

"The trousers lay across the bed."

"She is dragging along her stray buffalo across the iron track that cuts through the village."

Below/beneath/underneath/under

Below is the opposite of above and simply suggests a lower position or level. Both under and beneath mean 'directly under', but the latter implies distance; underneath, on the other hand, adds to the idea of touching, covering. Only the last two can be used in sentence-final positions. In abstract contexts, under tends to be preferred to below, under or beneath.

In Arabic, all three are generally rendered by وَرُنَ (or أَسْفَلَ with وُرِنَ being used when it involves rank, value, as well as age. e.g.

"If the watch is below/under a certain value, then you don't have to return it."

"There are many beautiful things below/beneath the surface of the sea."

"You will find the pen underneath/under the papers."

"The city centre came under the control of armed gangs."

"The occupying authority refused entry to the mosque to worshippers below the age of fifty."

Beside/besides

Beside is a preposition meaning *next to*, whereas besides is a conjunct (a word linking clauses/sentences) meaning *in addition to*, and is synonymous with 'moreover' and 'furthermore'. Both usually found at the beginning of a sentence. Beside is usually translated into Arabic by pesides is rendered as:

أَيْضاً فيما عَدا ذلكَ بالإضافة إلى وفؤق ذلكَ وإلى ذلكَ علاوةً عَلَى إلى جانِبِ فضلاً عَن

"Why don't you want to sit **beside** your brother?" لِمَاذَا لا تُريدُ أَنْ تَجُلْسَ إِلَى جُوارِ أَخِيكَ؟

"I don't enjoy painting. Besides, I was never good at it." لا أَسْتَمْتِعُ بِالرَّسْم، وَعَلاوَةً على ذلك ، لَمْ ٱحْسِنْهُ عَلَى الإطْلاقِ

"Who besides Sarah and Magda attended the party?"

"He gave me a lot of support and many other things besides!"

دَعَمَني كثيراً إلى جَانِبِ اُشْياءَ اُخْرَى كَثيراً أُعطاني إِلَى جانِبِ دَعْمه الْقَوي لِي اُشياءَ اُخرى كثيرةً فَضَلاً عَن دَعْمِهِ القَوي لِي فَقَدْ اُعْطَانِي/منحني أَشْياءَ أُخْرَى كثيرةً

Big/great/large

The main difference between these three words is that **great** is only used in abstract concepts, meaning 'very good', 'magnificent'. The difference between **big** and **large** is one of register, with the latter being more formal. In terms of meaning, there is no difference between the two.

In Arabic, the adjective کِبار اِها) is the usual word for 'big'/'large', with the most common term for 'great' being عظيم (pl. عظام). e.g.

"He came up with a **great** idea to save the company." طَرَحَ فَكَرَةً عَظِيمةٌ لِإنْقاذ الشُّركة

"There was a big/large fish lying on the table, ready to be cooked."

"The librarian could barely lift the big/large volume from the shelf."

"Harrods is a very big/large store in London."

"We went out for my birthday and had a great meal at the new Indian restaurant."

There are some idiomatic meanings and connotations that may lead to ambiguity:

• the Arabic کیر is often short for کیر الشن, i.e. 'old', rather than 'big' in the sense of size! In English, on the other hand, 'big' often denotes 'fat', in which case it should be translated by something like سَمِن e.g.

"She's a **big** woman."

"He is an old man and therefore deserves our respect."

• When کبر occurs as the first element in a genitive construction (إضافة), with the second element being in the plural, it is translated into English as 'chief-', 'head-'. e.g.

بُعِيرُ الأَطِبَّاءِ, 'head physician' ِكِيرُ الْأَطِبَّاءِ, 'chief justice/magistrate'

Border/frontier/boundary

"We crossed the **border** at midnight."

"The city boundaries are often difficult to define.

"The army arrived at the border with Israel (/ the Israeli border)."

"We were close to the city limits."

"The government announced its willingness to retreat to the June 1967 border(s)."

"Our University is trying to push back the frontier(s) [lit. 'horizons'] of science."

Both

In English, this should only be used when there are two notions or entities. In addition, one should also pay attention to parallelism in the grammar of the construction, especially when prepositions are involved; e.g.

"I was interested in both history and French",

OR

"I was interested **both in** history and in French" (NOT *I was interested both in history and French).

لقَد كُنْتُ مُهْتَماً بِكُلِّ مِن التَّارِيخُ وَاللَّغَةِ الفَرَنْسِيَّةِ لَقَدْ كُنْتُ مُهْتَماً بِالتَّارِيخِ وَبِاللَّغَةِ الفَرَنْسِيَّة كِلَيْهِما لَقَدْ كُنْتُ مُهْتَماً بِالتَّارِيخِ وَبِاللَّغَةِ الفَرَنْسِيَّةِ مَعاً

In some cases, Arabic uses الكل تعالى (fem. كل تعالى), which is followed by either a **definite dual noun** in the genitive (in an إضافة construction), or with a suffixed **pronoun**. Note that when when is in an إضافة, it agrees in gender with the noun it modifies, but **not** in case. e.g.

"He grabbed the book with both hands."

"We had a brief talk with both of them during the meeting."

It is important to stress that there is a nuance in the Arabic translations that is missing from the second English sentence. The latter Arabic sentence implies that we had a brief talk with each of them **separately**, whereas the former translation denotes a discussion with both of them **together!**

"Did you see both cars? No, I saw neither!" هَل رَأَيْتَ كِلتَا السَّيَّارَتَيْنِ؟ لا، كُمْ أَرَ أَيًّا مِنْهُما!

Bring/take

These two verbs are often confused; 'to bring' refers to movement towards the object, to take denotes movement away from it. In Arabic, 'to bring' is generally rendered by أَخْضَرَ إِلَى حَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى جَمَلَ لَـ/إِلَى جَمَلَ لَـ/إِلَى جَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى عَمَلَ لَـ/إِلَى e.g.

"I'll bring you some coffee in a minute."

"Why don't you take her home since it's rather late?"

"We took the reports to the sales department."

"After I was **brought** before the manager, I was **taken** to the meeting room." بَعْدَ أَنْ أَحْضَرُونِي إِلَى اللَّدِيرِ، أَخَذُونِي إِلَى قَاعَةِ الإجْتِمَاعاتِ

- NOTE that 'to take back' is rendered by a separate verb, such as اَسْتَرُخَعَ اسْتَرَدَّ,اسْتَعَادَ،أَعَادَ e.g.

"Saladdin took Jerusalem back from the Franks."

By/with

By is used to indicate the action or method involved in doing something, while 'with' refers to a tool. In Arabic the former is rendered by expressions denoting 'by means of': (+ gen.), عَرْمِنْ خِلالِ (+ gen.), عَرْمِنْ خِلالِ (+ gen.), عَنْ طَرِيقَة (+ gen.), عَرْمِنْ خِلالِ (+ gen.), عَرْمِنْ خِلالِ (+ gen.), عَنْ طَرِيق (+ gen.), also Note that 'by' is used in English when it involves modes of transport. e.g.

"We travelled by plane/car/bus/bicycle."

"The soldier was killed with a knife."

e.g. بواسِطَة/عَن طَريق. this context is more common than بواسِطَة/عَن طَريق.

"On arrival, they were taken to the hotel by coach."

"It was only with careful investigation that the crime was solved."

Can/may/might

These modals are all used to express the notion of possibility or doubt and are part of what is known as 'epistemic modality', which expresses a speaker's judgement regarding the veracity and/or certainty of a statement.

Strictly speaking, however, can should be restricted to ability, whereas the difference between may and might is that the latter conveys more doubt than the former. For instance, when one says that one might do something, this is more doubtful than when may is used; in other words, it is a more remote possibility.

In contemporary English, can is used in the same way as may, while still retaining its original meaning, which in some cases may lead to confusion. For instance, depending on the context, the sentence "You can do it", may mean "You are able to do it" or "You are allowed to do it." In Arabic, the distinction is conveyed as follows:

ABILITY

POSSIBILITY

"You can realize your wishes."

"The company can/is able to raise its production level."

"Hunger may lead to democracy." (= "It is possible that ...")

"These signs may interact in what is called the global catastrophe."

"The spread of the crisis may lead to some temporary economic disturbances."

▼NOTE: the noun following is in the accusative;

can be used with a perfect verb with present meaning. e.g.

"He may travel to Lebanon."

The following sentence illustrates a third meaning of may, i.e. permission, which may be rendered in a variety of ways. e.g.

"You may borrow the dictionary whenever you like."

"You may (or can) sit down now."

"May (or can) I come in?" (= do I have permission to come in)

Though in many cases **can** and **may** are interchangeable when conveying *permission*, they often are not, as in the following sentence, for instance, where **can** and not **may** is the only appropriate modal:

"You can't play such loud music in the middle of the night; the neighbours will call the police!"

When conveying possibility, can and may are not always interchangeable. e.g.

"He can't have known about her secret." [it was impossible for him to know]

"He **may** not have known about her secret." [it is uncertain that he knew] رُبُّا لَمْ يَكُنْ يَعْلَمُ/يَعْرِفُ بِسِرِّها

In other cases, it is clear that **can** does *not* reflect ability, as in the following sentence, where the action depends on a third party, not the speaker's ability. e.g.

"You can get your money back."

English epistemic modality can be rendered in a variety of ways in Arabic:

	Example 'The teacher may be in his office'	Construction	Phrase
(a.)	مِن المُمْكِن أَنْ يَكُونَ الأُسْتاذَ في مَكْتَبِهِ	+ Subjunctive	مِن المُّمْكِن أَنْ
(b.)	يُمُكن أَنْ يَكُونَ الأُسْتاذ في مَكْتَبِهِ	+ subjunctive	يُمْكِن أَنْ

(c.)	يَجُوزُ أَنْ يَكُونَ الأُسْتاذُ في مَكْتَبِهِ	+ SUBJUNCTIVE	يَجُوزُ أَنْ
(d.)	مِن الجَائِزِ أَنْ يَكُبُونَ الأُسْتاذُ في مَكتَبِهِ	+ Subjunctive	مِن الجَائزِ أَنْ
(e.)	يُرَجِّح أَنْ يَكُونَ الأَسْتاذُ في مَكْتَبِهِ	+ Subjunctive	يُرَجَّحُ أَنْ
(f.)	مِن الْمُرَجِّحِ أَنَّ الأَسْتَاذَ في مَكتَبِهِ	+ noun/PRON. suffix	مِن المُرَجَّح أَنُّ
(g.)	من/عَلَى الأَرْجَحِ أَنْ يَكُونُ الأَسْتاذَ فَي مَكْتَبِهِ	+ Subjunctive	من/عَلَى الأرْجَحِ أَنْ
(h.)	مِن المُحْتَمَل أَنْ يَكُونَ الأَسْتاذُ في مَكتَبِهِ	+ Subjunctive	مِن اللُّحْتَمَلِ أَنْ
(i.)	يُحْتَمَلُ أَنْ يَكُونَ الأُسْتاذُ في مَكْتَبِهِ	+ Subjunctive	يُحْتَمَلُ أَنْ
(j.)	رُبِّما كانَ الأُسْتاذُ في مَكْتَبِهِ	+PERFECT (with present meaning)/ IMPERFECT	رُگُا
(k.)	رُبِّهَا أَنَّ الأُسْتاذَ في مَكْتَبِهِ	+ noun/PRON. suffix	رُبُّمًا أَنَّ
(1.)	عَسِّى أَنْ يَكُونَ الأَسْتاذُ في مَكتَبِهِ	+ Subjunctive	عَسَى أَنْ
(m.)	عَسَى أَنَّ الأُسْتاذَ في مَكْتَبِهِ	+ noun/PRON. suffix	عَسَى أَنَّ

All of the above may convey possibility, with (f), (g), (h), (i) and (k) also denoting probability, i.e. an increased degree of possibility ('it is likely that ...').

In English, epistemic modality is unmarked for present or future. e.g.

"We may do it now/tomorrow."

It is important to note that **might** is also the past form of **may**, when it denotes *possibility*. If it refers to *permission*, the past is rendered by 'was/were allowed/permitted'.

[&]quot;He said she might use the laptop whenever she wanted."

"She was allowed/permitted to use my laptop whenever she wanted."

When there is remote possibility, **might** may be replaced by **could**. In other cases, a clear distinction is made, especially if a condition is implicit. e.g.

"She said that he might (or could) do it if she asked him to."

BUT:

"The teacher **might have** corrected his students' assignments." [= it is possible, but very doubtful]

"The teacher **could** have corrected his students' assignments." [= he wouldhave been able to do it (if he hadn't been ill, for instance)]

In Arabic, might is typically rendered by 🗯 + IMPERFECT.

☞ NOTE: in reported speech, may is replaced by might. e.g.

"I may be able to do it."

"He said that he might be able to do it."

"The film **may** begin any time." قَدْ يَبْدَأُ الْفِيلْمُ فِي أَيِّ وَقْتِ "I might (or sauld) have wen th

"I **might** (or *could*) have won the race, if I had trained harder." [but I didn't] لَو تَدَرَّبْتُ أَكثَرَ فَلَرُبَّمًا فُزْتُ بالسِّباق

OR

كَانَ مِنَ المُمْكِنِ/كَانَ عِقدُورِي الْفَوْزُ بِالسِّباق، إِنْ كُنْتُ قَدْ تَدَرَّبْتُ أَكْثَرَ

"He **might** not return to Beirut." [OR: 'Maybe he did not return to Beirut."] رُبُّا لَمْ يَعُدُ إِلَى يَيْرُوتَ

"You may laugh at him."

رُبِّمًا ضَحكَتَ منْهُ

"They may/might have said that; I'm not sure."

يُحْتَمَلُ أَنَّهِم قَدْ قالُو ذَلِكَ، فَأَنا لَسْتُ مُتَأَكَّداً رُبَّا قُالُو ذَلِكَ، فَأَنا لَسْتُ مُتَأَكِّداً رُبَّا كانُوا يَقُولُونَ ذَلِكَ، فَأَنا لَسْتُ مُتَأَكِّداً رُبَّا قد قُالُوا ذَلِكَ، فَلَسْتُ مُتَأَكِّداً رُبَّا قد قُالُوا ذَلِكَ، فَلَسْتُ مُتَأَكِّداً

"Electricity may (or can) kill.

يُمْكِنُ لِلكَهرَبَاءِ أَنْ تَقتُلَ قد تَقْتُلُ الكَهْرَباءُ مِنَ المُمْكِنِ لِلْكَهْرِباءِ أَنْ تَقْتُلَ

'She may (or could) have committed the murder, because she was in the village that night."

"If they don't receive any help soon, they may all get killed."

"He may come over to our house tomorrow evening."

"He might have been killed."

When these modals are negated, the meaning often changes slightly and may pose problems in translation. e.g.

"He may not accept the job offer because he doesn't want to move to London."

"She may not have gone to Beirut last year."

"It may not rain this afternoon."

"Things might not improve after the economic crisis."

"We might not have agreed without his assurance to provide the necessary funds."

"The teacher can't be in his office today."

→ NOTE: In the first sentence the teacher for what ever reason, is unable to be in the class, while in the second it negates the possibility that the teacher can be in the class.

"You can't have seen her yesterday because she was still in Paris then."

- Also see 'May/Maybe' and 'The Conditional'

Canal/channel

The main difference between these two words, both of which refer to stretches of water, is that 'canal' is man-made, whereas 'channel' is nature-made. In Arabic, both can be rendered by مُزع (pl. تُرُع الله), with تُرع الله (pl. تُرَع الله) being restricted to a drainage canal or ditch.

When talking about television, only **channel** is used, which in Arabic can be rendered either by قال or قال e.g.

'satellite television channel':

For radio, station is used in English. In Arabic, this is also rendered by فاعينة) e.g.

"Each of the three **radio stations** can broadcast to both the Middle East and Europe."

☞ NOTE: the following geographical proper nouns:

the English Channel؛ القَناةُ الإِنْكليزِيَّةُ

the Channel Islands :جُزُر القَناةِ (الإنْكلِيزِيَّةِ)

the Suez Canal :قَناةُ السُّويسُ

Classic/classical/classics/classicist/ classicism

The adjective classic can refer to one of the following:

(1) 'of the first rank'. e.g.

"a classic film"

فِيلُمٌ مُمْتازٌ فِيلُمٌ كلاسِيكِيٌ فِيلُمٌ رائعٌ فِيلُمٌ مِنَ الدَّرَجَةِ الأُولى

(2) 'typical'. e.g.

"a classic mistake'

خَطَأٌ نَمْطِيٍّ/مُتَوَقَّعٌ

(3) 'continuously in fashion'. e.g.

"a classic suit" بَدْلَةٌ لِكُلِّ النَّاسَاتِ

As a noun, classic denotes an author, text etc. of the highest excellence. e.g.

"Hamlet is a classic."

هامْلِتْ رِوايةٌ كلاسِيكِيَّةٌ هَامِلِتْ رِوايَةٌ رائعةٌ/مِنَ الدَّرَجةِ الأُولى هامْلِت مِن رَوائع الأَدَبِ الإِنْكليزِيِّ القَديم

The plural Classics refers to literature which is considered great. e.g.

"He read all the Classics."

لَقَدْ قَرَأَ جَمِيعَ الكُتُبِ الكلاسِكِيَّةِ لَقَد قَرَأُ أُمَّاتِ الكُتُبِ As a singular **Classics** is an academic subject focusing on Greek and Roman culture. e.g.

"He went on to study Classics at London University." لَقَدْ ذَهَبَ لِدِرَاسَةِ الكِلاسِيكِيَّات/الآدابِ اليُونانِيَّةِ وَاللاتِينِيَّةِ في جَامِعَةِ لَنُدَنَ

Classicism denotes the ideas and principles of ancient Greece and Rome, as well as a style in art and architecture in 18th-century Europe. e.g.

"Classicism attempted to combine both the ancient and modern."

The adjective classical refers to:

(4) 'Greek and Roman Antiquity'. e.g.

"Classical sculpture"

(5) 'serious, traditional' (music), as opposed to 'popular', 'light'. e.g.

'a classical composer'

(6) 'traditional' (science and art). e.g.

"classical economic theory"

☞ NOTE: Arabic prefers the borrowing کلاسیکي in cultural contexts.

Close/shut

In many cases both can be used; shut, however, cannot be used attributively. e.g. 'a closed door/eyes' (NOT *'a shut door'), nor to talk about roads, companies, etc. In addition, shut is more informal. e.g.

'The door was shut.

لَقَدْ أُغْلِقَ البَابُ كَانَ البَابُ مُغْلِقًا

"Don't forget to close/shut the door."

لا تَنْسَ أَنْ تُغْلِقَ البابَ/تَقْفِلَ البَابَ

"The factory closed (down) last year."

لَقَدْ أَوْقَفَ الْمُعْمَلُ أَعْمِالَهُ العامَ الماضِي

Common/joint

'Our common goal is to become the best in the field.'

"We'll have to put in a great deal of **joint** effort if we want to complete this task on time.'

تَضامَنَ = NOTE: 'to be jointly responsible'

It is important not to confuse this meaning of *common* with 'usual, ordinary', which tends to be rendered in Arabic by عاديّ , as in:

'This is a common view which many people would agree with.'

When common is used in the sense of 'ordinary' it can also have a pejorative meaning in that it denotes 'vulgar, unsophisticated'. e.g.

"She really is very **common** in the way that she speaks and behaves."

Comparative/superlative

Excluding separate forms such as 'worse/worst', the English comparative and superlative essentially come in two forms: the so-called inflectional comparative (e.g. simpler, fastest) and the periphrastic construction, which involves the use of more/most + adjective.

Traditionally, the latter is reserved for words of more than one syllable, though this 'rule' is commonly broken in the spoken language, where it is quite common to hear 'stupidest' or 'cleverest'. However, careful users of English avoid this in formal written language, where examples of this practice are only found for stylistic reasons, for instance, to add intensity.

Equally important to note is that the position of the adjective also plays a part, even if it consists of only one syllable; when the adjective follows the noun, the periphrastic construction is the one that should be used. e.g.

"Have you seen a kinder woman than her?"

"I have never seen a woman more kind."

Although in theory, the periphrastic construction can always replace the inflectional one, idomaticity should be the guiding principle.

In Arabic, the comparative and superlative come in two constructions:

1. The so-called 'elative' pattern [1], followed by the preposition [2], which expresses the English 'than'. The elatives do not show gender, number or definiteness agreement. e.g.

'S/he is older than your brother' ,هُوَ/هِيَ أَكْبَرُ مِن أَخِيك

"Love is more than just a word."

لَنْدَنُ أَكْثَرُ شُكَّاناً مِن مانْشِسْتِرَ

"London has more inhabitants than Manchester."

☞ NOTE:

Adjectives (usually those referring to colours or defects) that are already in the elative form but that do not have comparative meaning, do inflect for gender and number (with the patterns and plural, respectively), as well as definiteness. e.g.

It is possible to use the comparative without its comparator, i.e. without e.g.

"It is assumed that we'll play a greater role in the new company."

The adjectives have an additional implicit elative meaning and can thus mean 'good/better' and 'bad/worse', respectively. e.g.

"Prevention is better than cure." (lit. '... a thousand cures')

"Treatment is more harmful than the disease."

If two qualities of the same referent are compared, a resumptive pronoun must be affixed to the preposition : e.g.

"Students are more eager to get high marks than (they are) knowledge."

a periphrastic construction comprising elatives denoting increasing size or intensity, such as 'greater' ((isi), 'stronger' (lisi), followed by the verbal noun derived from the verb of the same root, with the noun being in the indefinite accusative of 'specification' (isi). This is obligatory when the adjective is a

participle (except if it is the active participle of a Form I verb); consists of more than three root consonants; or already has the elative form (such as those referring to colours and disabilities). e.g.

"There is a much more painful and sad crime."

"The responsibility appears to be **more** important and more complicated than before."

"She's more patient than I am."

"The home has become the least secure place."

"This story spread throughout the world as the video clip on Youtube was one of the **most** watched on the site."

"Norway is the second-most tolerant country in the world."

"China is the most populous country in the world."

"I am less diligent than she is."

"Depression is the most widespread illness of the age."

"The new Prime Minister is more astute than his predecessor."

• The same elative can also govern several adjectives, as in:

"Western scientists are not more intelligent, stronger or technically more advanced than scholars in the Arab world."

The comparison of equality is conveyed in Arabic by the following particles: مثل - عَلَى قَدْر - بقَدْر. e.g.

"She is just as pretty as her mother (sister)."

- The Arabic **superlative** still relies on the elative form, but differs in usage in that it is always definite, as a result of:
 - b the definite article; e.g.

a pronominal suffix; e.g.

"He's the oldest among them."

- the elative being the first element in a genitive construction (إضافة), with the second noun being
- i. singular indefinite; e.g.

"The dolphin is the most intelligent marine animal."

"As soon as possible."

ii. plural definite; e.g.

"The most expensive gifts in the shop."

The superlative can also occur with the indefinite pronoun 4, followed by a clause introduced by a preposition. e.g.

"The worst thing about writing plays is that you write something personal."

The superlative can also occur on its own, with the definite article, in a limited number of expressions. e.g.

"At least, they were sorry about what they had said."

Another difference with the comparative is that the superlative has feminine (نُعْلَى) and plural forms (masc. زُعُلَيات, fem. زُعُلَيات). However, in Modern Standard Arabic these are rarely employed, except in certain fixed expressions:

:بريطانيا العُظْمَي	'Great Britain'
:اسيا الصُّغْرَى	'Asia Minor'
:الحَرْبُ العُظْمَى	'The Great War'
:الدُّوَلُ الكُبْرَى	'The Great Powers, the Superpowers'
:القُرُونُ الوُسْطَي	'The Middle Ages'
:القُوَى العُظْمي	'The Great Powers, the Superpowers'
:أَمْرِيكَا الْوُسْطَى	'Central America'

→ NOTE: all of these superlatives are translated into English by ordinary adjectives. Other examples include:

الشَّرْقُ الأَوْسَط: 'the Middle East' 'the Near East' الشَّرْقُ الأَذْنَى: 'Alexander the Great' In order to express the English the+ COMPARATIVE... the + COMPARATIVE, which denotes 'in the same measure as', Arabic uses which takes a PERFECT verb, which can have a present or past meaning, depending on the context. e.g.

"The more you study, the greater your chances of succeeding."

"The further he progresses in his study, the greater the respect he earns/the more respect he earns/gets."

In journalistic writing, the second is often omitted. e.g.

"The more strict the director was, the more his staff hated him."

- NOTE: کلما should not be confused with کلما should not be confused with کلما which means 'all of'. e.g.

"I will not forget all of the things I saw in his house."

The conditional

The conditional is subject to fixed constructions in both English and Arabic, with constraints being imposed on the tenses in the protasis (the if-clause, containing the condition; and apodosis (the 'consequent', خواب). Essentially, the choice of constructions and particles (in Arabic) is governed by whether or not there is a real condition, on the one hand, and whether the hypothetical situation is possible or impossible (as in the case of a past hypothesis).

The choice of conditional construction depends on the kinds of conditions involved. Traditionally, these are divided into those that involve possibility that becomes reality when the condition is met (type I) and hypothesis, which is either realizable (type II) or not, if it refers to a past event (type III):

TYPE I (future conditional, i.e. real possibility):

In English, this is rendered by a PRESENT SIMPLE + FUTURE or PRESENT SIMPLE, whereas in Arabic the construction requires إِنَّ مَا اللهِ اللهِ اللهِ اللهِ اللهُ اللهُ

If I DO this, I WILL SUCCEED.

If you DO this, you SUCCEED.

إِذَا/إِنْ عَمَلْتُ ذَلِكَ نَجَحُتُ/فَأَنَّكُمُ مُسَوِّفَ ٱلْجُحَحُ اللَّا عُمَلْتُ ذَلِكَ يُمْكُنْ أَنْ ٱلْجُحَ إِذَا/إِنْ عَمَلْتُ ذَلِكَ يُمْكُنْ أَنْ ٱلْجُحَ إِذَا/إِنْ عَمَلْتُ ذَلِكَ فَرُبُمًا ٱلْجُحُ

TYPE 2 (non-past hypothesis, i.e. possibility):

In English, this type of conditional requires the SIMPLE PAST+ WOULD+ INF. In Arabic, # + PERFECT is used, with j introducing the apodosis, though other constructions are also found. e.g.

If I DID this, I WOULD SUCCEED. لَوْ عَمَلْتُ ذلك

نِّحَتْ (1) نِّحَتْ

- (3)
 النَجَحِت

 فسأَنْجُحُ
 فسأَنْجُحُ

 (4)
 الْجُحُحُ

 (5)
 الْجُحُحُ
 (2)

لَوْ عَمَلْتُ ذلك يُمْكِنْ أَن ٱلْجَحَ لَوْ عَمَلْتُ ذلكَ فَرُبَّمَا ٱلْجَحُ

TYPE 3 (Past hypothesis, i.e. impossibility)

The English construction is PAST PERFECT+ WOULD HAVE+PAST PARTICIPLE usually corresponds to the Arabic لَوْ كَانْ قَدْ followed by a PERFECT, with the apodosis being introduced by j, alongside other constructions. e.g.

If I HAD DONE this, I WOULD HAVE SUCCEEDED

لَوْ كُنْتُ قَدْ عَمَلْتُ ذلكَ لنَجَحْتُ لَوْ كُنْتُ قَدْ عَمَلْتُ ذلك لكانَ مِنَ الْمُمَكِنْ أَن أَلْجَحَ لَوْ كُنْتُ قَدْ عَمَلْتُ ذلكَ فَرُمَّا كنت سِأْلْحُحُ لَوْ كُنْتُ قَدْ عَمَلْتُ ذلِكَ فَرُمَّا كُنْتُ لَحَحْتُ

	English		Ara	bic	
	Example	Form	Meaning	Form	Translation
	If I DO this, I WILL SUCCEED	PRESENT+ FUTURE	Future conditional (= possibility)	إذا/إنْ PERFECT /	إذا/إِنْ عَمَلْتُ ذُلِكَ
	If you DO this, you SUCCEED	PRESENT+ PRESENT		INDICATIVE+	نَحُـٰثُ فأُنْحَـٰخُ
TYPE I				سـَ (سَوْفَ) INDICATIVE	سَوْفَ أَنْحَحُ سأَنْجَحُ
					إذا/إِنْ عَمَلْتُ ذُلِكَ يُمْكِنْ أَنْ أَخْمَ
					إذا/إِنْ عَمَلْتُ ذُلكَ فَرُمَّمَا ٱلْجَحُ
	If I DID this, I WOULD SUCCEED	SIMPLE PAST+ WOULD+ INF	Non-past hypothesis (= possibility)	لُوْ + PERFECT لَـُ	لَوْ عَمَلْتُ ذلك غَحْتُ لنَجَحْتُ فسأَنْجَحْ
TYPE					سَوْفِ الْجَحَ سَأَنْجَحُ لَوْ عَمَلْتُ ذلك يُمْكِنْ أن الْجُحَ لَوْ عَمَلْتُ ذلك
					فَرُبُّمَا أَنْجَحُ

	If I HAD DONE shis, I WOULD HAVE SUCCEEDED	PAST PERFECT+ WOULD HAVE+ PAST PARTICPLE	Past hypothesis (= impossibility)	لُوْ كَانَ قَدْ + PERFECT لـُ	أَوْ كُنْتُ قَدْ عَمَلْتُ ذلِكَ لنَجَحْتُ
					لُوْ كُنْتُ قَدْ عَمَلْتُ ذلك لكانَ مِنَ المُمْكِنْ الدُ أَثَرَ
TYPE III					لَوْ كُنْتُ قَدْ عَمَلْتُ ذَلِكَ فَرُبَّمَا كنت
					سانجُحُ لَوْ كُنْتُ قَدْ عَمَلْتُ ذِلْكَ فَرُبَّمَا

- ☞ NOTE: the Arabic perfect tense can denote both present and future possibility.
- The English **TYPE I conditional** can also be introduced by when, in which case it can be rendered in Arabic by wor عند with the protasis and apodosis tenses being in the IMPERFECT. e.g.

"If she rejects the decision, she'll be fired, won't she?" إِنْ هِي رَفَضَت القَرَارَ، سَوفَ تُفْصَلُ مِنَ العَمَل، أَلَيْسَ كَذَلِك؟

• in TYPE III, the tense in the apodosis can also be WOULD+INF. e.g.

'If you had not left the room to smoke a cigarette, you would know that the Paris branch was going to be closed.' (NOT: *'... had known')

✓ In English, would is used with if only in very formal requests. e.g.

"The management would appreciate it if you would be so kind as to leave the room in a tidy condition."

☞ if the apodosis precedes the protasis in Arabic, then the dandd are omitted. e.g.

"I would have taken a taxi to the airport if she hadn't picked me up."

☞ In a number of cases, the Arabic conditional particle is not translated into English.
e.g.

إِنَّ شَاءَ اللَّهِ

'God willing.' (NOT: *'If God wills')

إذا/إنْ شَرِبْتَ هذا فَسَتَمُوتُ

'Drink this, and you'll die.' (OR: 'If you drink this, you'll die.')

☞ The protasis with 🔄 is introduced by 🔞 if it contains an imperative or particle. e.g.

"If you see the manager, tell him that I shan't be going into the office tomorrow." إِذَا رَأَيْتَ اللَّدِيرَ فَأُخْبِرْهُ بِأَنِّي لَنْ أَذْهَبَ إِلَى الْمُكْتَبِ غَداً

- For win the case of I, the protasis introductory 1 is omitted. e.g.

"If she had finished the assignment, she would not have failed the test."

"If we had hurried up, we would not have missed our bus."

• (وَإِنْ لا >) وَالاً (فـ), meaning 'if not', 'or else', 'otherwise'. e.g.

"Do (m. pl.) your work, or else/if not there will be dire consequences!"

"She warned me to change or else there would be a separation."

"We must reconsider our position, if not (= otherwise) we'll lose the deal."

"This issue is preoccupying public opinion in the Middle East, if not the entire world."

- NOTE: "Were it not for/had it not been for" = (قولا (أقاً + noun/pronoun. e.g.

"The team would have lost were it not for the outstanding performance of the goalkeeper."

(= The team would have lost if it had not been for/had it not been for ...') لَوُلا الأَدَاءُ المُتَمَيِّز لِحَارِسِ المَرْمَى خَسِرَ الفَرِيقُ

"If I hadn't been ill, I would have come along with you."

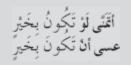

"If it wasn't for the fact that I was ill ..."

"If it wasn't for the fact that they are rich, they wouldn't be living in this area."

☞ NOTE: Arabic tends to prefer the **perfect** in the conditional, even where English uses a present or even future.

The particle is also used as a complementizer with the verbs is ('to like, wish') and is ('to hope'), in which case the uncertainty of the action or state is emphasized. e.g.

"I'd like you to help me."

"I hope you're fine."

- Also see 'Even If'

Confident/confidential/confident

Confident (adj.) means 'with confidence, self-assurance' (عَلَى ثِقَة، والتي); confidential (adj.) denotes secrecy and intimacy (سِرِّيّ); and confident (n.) is a person that one confides in, i.e. tells one's secrets to (اَنَّحِيةُ, pl. بَعَى). e.g.

"The Council is confident that Iraq is serious about cooperating with the UN."

"He is confident that hard work will yield the desired results."

"This is very confidential information that should not leave this company."

"He knows all her secrets since he is her confidant."

Conscious/consciousness/ conscience/ conscientious

Conscious means *awake* (i.e. not unconscious), or *aware*; in the latter case it is followed by the preposition **of**; **consciousness** denotes the state of being alert and awake; **conscience** refers to the sense of right and wrong that determines what a person does; **conscientious** is synonymous with **diligent**. e.g.

"As soon as he became conscious again/regained consciousness, the police interrogated him."

"I'm very conscious of the fact that we need to adopt a new sales policy."

"One should always be guided by one's **conscience** when making decisions in life." يَجِبُ عَلَى الْمَرْءِ أَنْ يُراجِعَ صَمِيرَهُ دَائِماً عِنْدَ إِتَّخَاذِ القَراراتِ فِي الْحَياةِ

"I always work very **conscientiously** because mistakes can cost the company a lot of money."

- NOTE: the following phrases when consciousness refers to 'fainting': يَفَقَدَ الوَعْي 'to lose consciousness', 'to faint' عادَ إِلَى /اسْتَعادَ /اسْتَرْجَعَ/ استردَّ وَعْيهِ 'to regain consciousness', 'to come round'

the following expressions:

'national consciousness' :الوَعْي القَوْمِي 'the subconscious' :ما وَرَاءَ الوَعْي 'the unconscious' :اللاوَعْي 'unconsciously' :عَنْ غَيْر وَعْي

Contemptible/contemptuous

Contemptible means 'worthy of contempt', while contemptuous (which collocates with the preposition of) denotes the showing or feeling of contempt, i.e. disdainful. In Arabic, this difference is rendered through active and passive participles of the relevant verbs, respectively. e.g.

"He really is a contemptible fellow."

"She was contemptuous of my actions."

Continual/continuous/ continuation/ continuance/continuity

Continual implies a sequence which is sometimes interrupted (<>> continuous, which means without interruption); continuation refers to the prolongation of an activity. Continuance implies duration, perseverance of an action, while in American English it is a legal term for a 'postponement' (or 'adjournment'), especially of a court case. Continuity stresses an uninterrupted connection. The translation into Arabic of all generally involves the verbs "" e.g.

"We continually tried to call the club chairman."

"I was working continuously, but I still wasn't able to complete everything on time."

"The Judge granted a **continuance** to the defence lawyer so that he could interview more witnesses."

"It was only thanks to the **continuity** of our efforts that we were able to achieve the desired results."

"One of the most important things to a bank in determining its loan policy is the **continuity** of management in a firm."

"After the war, there was a continuation of the peace process." لَقَدْ اِسْتَمَوَّت عَمَلِيَّةُ السَّلام بَعْدَ الحَرْبِ

"Broadly speaking, one may say that every child is legitimate which is born during the **continuance** of a marriage or within due time afterwards."

بِشَكْلٍ عامٍّ ، يُمْكِنُ لِلمَرْءِ أَنْ يَقُولَ بِأَنَّ الطَّفْلَ الشَّرْعِيَّ هُوَ الَّذِي يُولَدُ خلال الفَتْرَةِ التي كانَ فِيها الزَّواجُ قائماً أَوْ خِلالَ فَتْرَةٍ مُناسِبَةٍ/مَعْقُولَةٍ بَعْدَ ذلِكَ

Conversation/conversant

A **conversation** is a noun meaning discussion, while **conversant** (**with**) is an adjective synonymous with **familiar** (with). The former is rendered in Arabic as حوار مُكالة (if it involves talking over the telephone) or حَدِيث (which is also used for 'interview'), whereas the latter translates as one of the following: مراقف على مُلمّ به ماهر به رَحْبِير في مُطّلع على. e.g.

"During the interview, the journalist severely criticized the minister."

"Calls from a landline to a mobile are much cheaper in most cases than those between mobiles."

"You don't need to give her any explanation since she is **conversant** with the principles of mechanical engineering."

Correlative particles and conjuncts

In many cases, Arabic particles come in 'discontinuous' or 'split' form, in that there is a second – usually – obligatory element that has to be added later on in the sentence. This is of particular relevance to Arabic-English-Arabic translation since the same phenomenon is quite rare in English. We have already encountered some of them (see e.g. ALTHOUGH/...). The list below lists some other common ones, each with examples of the possible structures.

Translation	Example	Second term	First term
Will you be going to the cinema or the lecture?	أَتَذُهَبُ إلى السّينما أَمْ إلى المُحاضَرةِ ؟	أُم) North
Would you like to go out or watch television?	هَلْ تُرِيدُ الْخُروجَ أَوْ مُشاهَدةَ التِلفازِ؟	أۋ	
If you're going to the club, I'll come along.	إذا ذَهَبْتَ إِلَى النَّادِي فَسَائْهُبُ مَعَكَ	ف	إذا
Besides plays Shakespeare wrote many famous poems.	لقَدْ كَتَبَ شكسبير مَسْرَحِيًّات وَإلى جانِبِ ذلِكَ فَقَدْ كَتَبَ أَشْعاراً كَثِيرةً مَشْهُورةً	(e)	[+DEM] إِلَى جانِب
My father works at a bank, while my mother is a housewife.	والدي مُوَظُّفٌ في البَنْكِ أَمَّا وَالِدَتِي فَهِي رَبَّة بَيْتٍ	ف	أُمَّا
Either you pay the fine, or you'll have to go to jail.	إِمَّا أَنْ تَدْفَعَ الغَرامَةَ أَوْ تَدْخُلَ السَّجْنَ	أُوْ	إِمَّا
In the coming days there will either be an agreement between the government and the opposition, or a deepening of the crisis.	الأَيَّامِ الْمُقْبِلَةِ سَتَشْهَدُ إِمَّا إِتَّفَاقاً بَيْنَ الْحُكُومَة والْمُعَارَضَةِ وَإِمَّا تَفاقُماً في الأَزَمَةُ	وإمّا	
Either you agree to the new proposal, or you hand in your resignation.	إِمّا أَنْ تَقْبَلَ الْمُقتَرَحَ الجَديدَ وَإِمّا أَنْ تسْتَقِيلَ مِن مَنْصَبِكَ	وَإِمَّا أَنْ	إِمَّا أَنْ/أَنَّ
Either the teacher doesn't know, or he pretends not to.	إِمّا أَنَّ الأُسْتاذَ لا يَعْرِفُهُ وَإِمَّا أَنَّهُ يَتَجَاهَلُهُ	وَ إِمَّا أَنَّ	
Either he is really ill, or he's faking it.	إِمًّا أَنَّهُ مَرِيضٌ حَقاً أَوْ أَنْهُ يُتَمارَضُ	أَوْ أَنْ	

Either you come to me, or I'll come to you.	إِمَّا أَنْ تَزُورَنا أَوْ أَنْ أَزورَكَ أَنا	أَوْ أَنْ	
If he has enough money, he'll buy a car.	إِنْ كَانَ مَعَهُ مَالٌ فَسَوفَ يَشْتَري سَيّارة	ف	ٳڹٛ
Wherever you go in the world, you see scenes of misery.	أَيْنَما ذَهَبْتَ في العَا لِمِ فَسَتَجِدُ مَظاهِرَ البُواْسِ	(e)	أُيْنَما

Despite being ill, he still attended the meeting.	بِالرَّغْمِ مِنْ أَنَّهُ مَرِيضٌ فَقَدْ حَضَرَ الاِجْتِماعَ	(ف)	بِالرَّغْمِ مِنْ (أُنَّ)
Despite the lack of options, the labour market has witnessed great development	برَغْمِ قِلَةِ الإِمْكانِياتِ فَقَدُ شَهِدَ سُوقُ العَمَلِ تَطُوراً عَظِيمًا	(<i>i</i> c)	بِرَغْمِ (أُنَّ)
Since/as the weather is nice, we will go for a stroll in the park	بِما أَنَّ الطَّقُسَ جَميلَ فَإِنَّنَا سَنَدْهَبُ إِلَى النُّزْهَةِ في الحَديقَةِ العَامَّة	ٲٞڹٞ	ِمِا أَنَّ
There are many problems between Ali and Omar.	هُناكَ مَشاكِلُ كَثِيرَةٌ بَيْنَ عَلِي وَبَيْنَ عُمَرِ	<u>وَ</u> يَيْنَ	ؽؘێؙۛ
Wherever you go, you are made to feel welcome.	حَيْثُما ذَهَبْتَ فَسَتَجِدُ التَّرْحِيبَ	(ف)	حَيْثُما
Despite announcing its bankruptcy, the company is still paying its staff.	رغْمَ أَنَّ الشَّرِكَةَ أَعْلَنَتْ إِفْلاسَهَا فَإِنْها لا تَزَالُ تَدْفَعُ رَواتِبَ الْمُوَظَّفِينَ	(ف)	(رَغْمَ أَنَّ)

It becomes difficult to remember things, regardless of whether they are happy or painful memories.	يَصْعُبُ تَذَكَّرُ الأُمُورِ سَواءَ كَانتْ سَعِيدةً أَمْ مُوْلِلَةً	أَمْ	سَواءَ
The message has to be conveyed, either directly or indirectly.	يَجِبُ إِبْلاغُ الرَّسَالَةِ سَواءً تَصْرِيحاً أَو تلْمِيحاً	أۋ	سَواة سَواة
Everyone was there, both rich and poor.	حَضَرَ كُلُّ النَّاسِ سَواءَ أَغْنياءَ وَفُقَراءَ	وَ	
In addition to being a talented author, he is also a generous man.	إِنَّهُ كَاتِبٌ بِارِ عٌ وَفَوْقَ ذَلِكَ فَهُوَ إِنسَانٌ كَرِيمٌ	ن	فَوْقَ[+DEM]
Neither the first nor the second contestant could finish the race	لا الْمُتَسَابِقُ الأَوَّلُ وَلا الثاني تِمَكَنَ مِنْ إِنْهَاءِ السِّباق	وَلا	Л
I want nothing except my freedom.	لِا أُرِيدُ شَيئاً إلا الْحُرِّيَّة	Žĺ.	
It is not that I only like classical literature; I also like detective stories.	لا أُحِبُّ الكُتُبَ الأَدبِيَةَ القَديَمةَ فَحَسْبُ بَلُ الكُتُبَ البُولِيسيَّةَ أَيْضاً	فَحَسْبُ/ فَقَط، بَلْ أَيْضاً	
I have not been to China or to India.	لَمْ أُسافِرْ إِلَى الصَّينَ وَلا إِلَى الهِنْد	وَلا	بُ
If he had studied he would have succeeded	لَوْ دَرَسَ لانَجَحَ	١	لَوْ
If he studies he will succeed.	لَوْ يَدْرُسُ فَيَنْجَحُ	ف	
	لَوْ يَدْرُسُ سَوفَ يَنْجَحُ	سَوْفَ	
	لَوْ يَدْرُسُ سَينَجَحُ		
If he studies he may succeed	لَوْ دَرَسَ لَنَجَحَ	قَدْ	

If he had not studied, he would not have succeeded	لَوْ كُمْ يَدْرُسْ ما نَجَحَ	ما	
I do not agree with either solution.	لَنْ أَرِضَى بِهذا الْحَلِّ وَلا بذاك	وَلا	لَنْ
I am not going to seek advice from a solicitor, nor am I going to take any legal action against him.	َ نَنْ أَسْتَشيرَ الْمُحامِيَ وَلَنْ أَتَّخِذَ أَيَّ إِجْراءٍ قَانُونِيٍّ ضِدَّهُ	وَلَنْ	
I shall be going to Syria as well as to Lebanon. (I shall be going to both Syria and Lebanon)	لَنْ أُسَافِرَ إلى سُورِيا فَحَسْبُ بَلْ إلَى لُبْنَانَ أَيضاً	فَحَسْبُ/ فَقَط، بَلْ أَيْضاً	
This is merely a temporary situation.	لَيْسَ هذا إلا حَلاً مُؤَقَّتاً	Žĺ	لَيْسَ
Naguib Mahfouz's novels are famous not just in the Middle East, but all over the whole world.	إنَّ روايات نَحيب مَحفُوظ مَشْهُورَةٌ لَيْسَ في الشَّرْقِ الأَوْسَط فَحَسْبُ بَلْ في جَمِيع أَنْحاءِ العَالَمِ أَيْضاً	فَحَسْبُ/ فَقَط، بَلْ أَيْضاً	
His proposal is nothing more than a trick to foil the scheme.	لَيْسَ اِقْتراحهُ سِوَى حِيلةٍ لِلاِفْشَالِ المَشْرُوع	سِوَى	
The symptoms you are suffering from are not related to cancer or an ulcer.	الأُعْرِاضُ الَّتِي تَشْكُو مِنها لَيْسَ لَهَا عَلاقَةٌ بِالسَّرَطَانِ وَلا بِالقُرحَةِ	وَلا	
This is nothing but wastage.	ما هذا إلا مِياهُ الصَّرْفِ	ŽĮ.	ما
I want compensation instead of sympathy.	ما أُرِيدُ التَّعاطُفَ بَلُ أُرِيدُ تَعْوِيضًا	بَلْ	

No sooner did he see me, than he greeted me.	ما إِنْ رَآنِي حَتَّى سَلَّمَ عَلَيَّ	حَتَّى	ما إنْ
As soon as I heard the call to prayer, I stopped working.	ما أنْ سَمَعْتُ الأَذانَ حَتَّى أَنْهَيْتُ شُغْلِي	حُتَّى	ما أَنْ
It is only a few moments before the herds of buffaloes return to the area.	ما هِيَ إِلاَّ خُظاتٌ حتَّى عادَتْ جُمُو عُ الجَوامِيسَ إِلَى المِنْطَقةِ	حُتَّى	ما هِيَ إلاّ
Even though the method is scientifically sound, it's difficult to apply.	مَهْما كَانَ الْمَنْهَجُ سَلِيمًا مِنَ النَّاحِيَةِ العِلْمِيَّةِ فَإِنَّ تَطْبِيِقَهُ صَعْبٌ جِدَّاً	ۏ	مَهْما
Although the questions are difficult, I am certain he will pass.	مَعَ أَنَّ الأَسْتِلةَ صَعْبةٌ فَأَنا مُتَأَكِّدٌ مِنْ نَجَاحِهِ	ۈ	مَعَ أَنَّ
Although the situation is complicated, I am sure we'll succeed.	مَعَ أَنَّ الظُّرُوفَ مُعَقَّدةٌ إِلا أَنْنِي مُتَأَكَّدٌ مِنْ نَجَاحِنا	إِلاَّ أَنَّ	
Given the economic conditions, there is a need for rationalizing expenditure.	نَظَراً لِلظُّرُوفِ الاقْتَصَادِيَّة فَتَرشيدُ الاَنِفَاقِ مَطْلُوبٌ	ۈ	نَظَراً لِ

Credible/creditable

Credible means 'believable' (مُصَدُّق،مَوْثُوق); creditable is synonymous with 'praiseworthy, commendable' (مَصْدُور،فاضل، حَمُود، حَميد). e.g.

"These words are neither convincing nor credible."

"Everything was satisfactory thanks to the **creditable**/praiseworthy individual efforts."

→ NOTE: whilst the negative of credible is incredible, creditable can only be negated by 'not', i.e. not creditable (NOT *'un-/increditable').

Criticism/critic/critique/critical

Criticism refers to 'disapproval' (قف); a critic is a person whose job it is to evaluate books, plays, etc. (نقاد الم باقد). A critique can be synonymous with a review but tends to refer to an academic article or book criticizing something; critical is an adjective meaning 'crucial' (حاسم, حرج, فاصل) or 'a negative opinion' (usually followed by the preposition of;

"Al-Sharuni is a major literary critic, who reviews novels, plays and short stories."

"The French newspaper *Le Monde* published an article last week **criticizing** the politicization of Egyptian courts. The newspaper was **critical** of the decision made by the previous government."

"The book contains a **critique** on pre-Islamic poetry by the late Taha Hussein." يَحْتَوِي الكِتَابُ عَلَى مَقَالَةٍ أَدْبِيَّةٍ بِقَلَمِ الْمَرْحُومِ طَهَ حُسَيْن حَوْلَ الشَّعْرِ فِي الجَاهِلِيَّةِ

"This is the company that faced formidable chanllenges in a critical economic phase."

"The American University in Beirut played a critical role for many decades." لَعِبَت الجَامِعةُ الأَمْرِيكِيَّةُ فِي بَيْرُوتَ دَوْراً حاسِماً في عُقُودٍ مُتَعَدِّدةٍ

"The newspaper was **critical** of the decision made by the previous government." كَانَتِ الْجَرِيدةُ النَّقِادِيَّةُ/مُنتقِدَةً/نَاقِدةً لِقَرارِ الحُكُومةِ السَّابِقةِ

Cry/shout/weep/sob

Cry can mean either to shout or to scream (e.g. out of fear, surprise or pain) – in which case it is often followed by the preposition out – or 'to produce tears because of sadness'; 'to weep' is the formal equivalent of the second meaning of 'to cry', whereas 'to shout' simply means to say something in a very loud voice. 'To sob' means to cry in short bursts.

These are generally rendered into Arabic as follows:

to cry, weep	(علی ,over sth/s.o., بَکَی
	(i) صاح
to shout, cry (out)	(a) زَعَقَ
	(u) (often for help)
	i(i) (often for joyous reasons)
to sob	نَهْنَهُ
	(i) شَهَقَ
	(i) نَشَجَ
	(i) نَحَبَ (i)
	اِنْتَكَبَ

"He saw his father sobbing, the tears rolling down his cheeks."

"Nobody is crying over our children that are being killed on a daily basis."

"They were surprised when one of the occupants of the car **shouted**: 'The elections are rigged!'"

Note the figurative meanings of cry and shout in the following phrases:

- cry out + to+ infinitive/for + noun ('to be in great need of'). e.g.
 - **➣ NOTE** the following expressions:

أَشْهَقَ/انْفَطَرَ بالبُكاء, 'to break into tears', الثُهَقَ/انْفَطَرَ بالبُكاء

'to break into sobs' /'be on the verge of tears': أَجْهَشَ بِالبُكَاءِ

'to cry bitterly', أَكُى بُكَاءُ مُرًا

'to cry crocodile tears', بَكَى بِدُمُوعِ التَّمْساحِ

"This car is **crying out** to be cleaned!"

• cry off ('to cancel'). e.g.

"When the manager suffered a heart attack, they **cried off** holding the meeting." ٱلْغُوا الْإِجْتِماعَ لَمَا أُصِيبَ الْمُدِيرُ بِأَزْمَةٍ قَلْبِيَّةٍ

• shout down ('to silence someone by shouting at them'). e.g.

"The president of the council **shouted down** members of the opposition and threatened them with expulsion from the hall."

• shout out ('to announce in a loud voice'). e.g.

"The minister **shouted out** the results of the ballot." أَعْلَنَ الوَزِيرُ نَتائجَ القُرْعةِ بِصَوْتٍ عالٍ

Dare/dare say

Dare denotes having the courage to do something or to take a risk, and is translated into Arabic by جَسْرَ عَلَى (u), جَرُوَ على (v), جَرُوَ على (على على الله على ا

"When you come back, no-one will dare to behave in this way."

"Will there be anyone who dares to skive or feign illness?"

"He doesn't dare to commit the same crime again."

"Will they, unlike their fathers, dare to change this corrupt system?"

From a grammatical point of view, 'dare' (like 'need') can also be used as a modal, in which case it has only one form, and tends to occur only in negative contexts and in questions. e.g.

"He daren't visit his friend."

The expression 'I dare say (or daresay) ', which is only used in the first person singular, means 'I suppose' or 'it is (quite) possible that'. e.g.

"I dare say the main issue that gave rise to controversy and lengthy debate is that related to the nomination."

Definite/definitive

Definite denotes certainty and/or clarity; definitive is synonymous with final. In Arabic, قطعي or قطعي can be used to render both, with غد also being possible for 'definite'. e.g.

"It is necessary for the judge to render a definitive judgement in this matter."

"He couldn't get a **definite** reply, either negative or affirmative, before the meeting of the committee."

"The government has a definite responsibility."

Depend/dependent/dependant

The adjective derived from the verb to **depend** (= 'to rely on') is **dependent** (on), whereas **dependant** is a noun denoting somebody who relies on somebody else for food, money, etc. In Arabic, the usual verbs in this context are(علل معاللة, when it involves 'relying on someone for sustenance' (cf. عال and عللة, **dependants**). This is also the root of the word for 'family', عال as this means 'those who are dependent on someone for sustenance', whereas in some dialects (e.g. Egyptian) عند is a word for 'child'. In general contexts,

"The country's citizens were **dependent** (**up**) **on** cooperative societies." كَانَ المُواطِنُونُ مُعَوِّلِينَ عَلَى الجَمْعِيَّاتِ التَّعَاوُنِيَّةِ

"The factory relies on ethylene oxide and ammonia for its production."

The negatives **independence** and **independent** pose some potential pitfalls for the translator who may be tempted to render then as مُسْتَقِلٌ and أَمُسْتَقِلٌ; in fact, this translation is only possible in a political context. In the sense of not needing sustenance or support, they should be more appropriately rendered as غَير مُعُولٍ e.g.

"The scholar created the theory **independent of**/without relying on philosophy." كَانَ البَاحِثُ يُبْدعُ غَيْرَ مُعَوِّل عَلَى الفَلْسَفة

☞ NOTE: dependence is followed by on, while independent(ly) and independence take the prepositions of and from, respectively.

Disinterested/uninterested

Disinterested refers to impartiality (نَوَاهِدَ), whereas uninterested denotes a lack of interest or indifference (لا مُبالاة، عَدَمُ الاهْتِمام). e.g.

"A disinterested judiciary is the only guarantee for freedom in public life." نَزاهَةُ القُضاةِ هِيَ الضَّمانَةُ الوَحِيدَةُ للحُرِّيَّةِ في الحَياةِ العامَّةِ

"It is clear he is completely uninterested in this initiative."

"This was the result of negligence and **indifference** to the difficult conditions in which the people were living."

Distinct/distinctive

Distinct means 'clear' or 'separate from'; distinctive means 'serving to distinguish'. In Arabic, these may be rendered by and and e.g.

"This perfume doesn't have a distinct odour."

"Does she have any distinctive features?"

Disused/misuse/abuse

Disused means 'no longer used', misused denotes 'not used in the way it is supposed to be used', whereas abuse refers to 'maltreat'. 'injure' or 'insult'. e.g.

"Misuse of the equipment constitutes a health hazard."

"EU Ministers are set to impose sanctions over human rights abuses."

"The osteoporosis was the result of disuse of the bones."

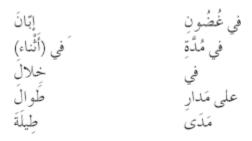

"He was summoned before the magistrates for sexual abuse."

- NOTE the expression to fall into disuse (not 'misuse'!), which is rendered in Arabic as: عَطُّلَ or عَطُّلَ or عَطُّلَ مَا اللهِ عَالَى عَالَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى اللهُ عَلَى اللهُ عَلَى اللهُ عَلَى اللهِ عَلَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى اللهِ عَلَى اللهِ عَلَى اللهِ عَلَى اللهِ عَلَى اللهُ عَلَى اللهُ عَلَى اللهُ عَلَى اللهِ عَلَى اللهِ عَلَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى عَلَى اللهِ عَلَى اللهُهُ عَلَى اللهُ عَلَى اللهِ عَلَى اللهُ عَلَى اللهِ عَلَى اللهُ عَ

During/for/in/since

Both during and in can be used to refer to periods of time; in is used to indicate exactly when something happened, while during is used to stress the idea of duration and when referring to an activity, rather than a period. For refers to how long something lasts. Since denotes the starting point of a period and tends to be translated into Arabic by

However, Arabic has a number of adverbs and adverbial phrases to render the same meaning of **during**, in and for:

e.g.

"he has worked here for five years."

[Note the use of the imperfect tense in Arabic!]

"The city will become pollution-free for (a period of) three months."

"during the whole of Tuesday"

"during the test"

"The students were talking during/throughout the lesson."

"We do not accept a presidency for life!" الأَنَّاسةَ مَدَى الحَياة!

Note that sometimes there are semantic differences, which means that, for instance, throughout and during are not always interchangeable; indeed, throughout carries a more intensive meaning. For instance, in the above example, the sentence with 'throughout' would imply that they talked incessantly, while the one with 'during' simply denotes that there was talking during the lesson.

"during the war for the liberation of Kuwait"

"for four days."

"during the Chinese Communist Party Congress which was previously held in Beijing"

Conversely, في مُدَّة is mostly used with numbers, and less with events. e.g.

"for a period of no more than two months"

The translation of the particle constitutes a particular pitfall for Arabic-speakers as it is rendered into English as since (marking the beginning of a period) or for (if it refers to the period). The second problem is that of tense in both cases; as the effects of the activity or event are still present today, they require a present perfect in English. e.g.

"She has been in Cairo since the beginning of the week."

"I have lived here for (NOT *since!) three years."

عِشْتُ هُنا مُنْذُ ثَلاثَةِ أَعُوامِ

Negative interference from Arabic often results in errors of the following type:

- * "He is a teacher since 1999." (cf. 1999 مَنْذُ عام 1999 أَسْتَاذاً مُنْذُ عام 1999."
- * "He has been a teacher since 1999."
- * "He's a teacher for twenty years." (cf. أَسْتَاذاً مُنْذُ عِشْرِينَ سَنَةً
- * "He has been a teacher for twenty years."

Each/every

Each is used when referring to the individual members of a group, every when considering a whole group, or when making general statements. Only each can be used before of, or after a subject. In Arabic, both are rendered by often followed by the preposition is e.g.

"Every six months."

"Each of them went out."

"Each of them is totally different from the other."

"The students each handed in their assignments."

Each other/one another

Contrary to popular belief, these two phrases, which express reciprocity, can be used interchangeably in English, despite the myth that **each other** can only apply to two people and **one another** to more than two. In Arabic, this is expressed in one of two ways, i.e. by a Form VI verb (e.g., 'to fight each other') or by means of which is a definite noun and therefore does not take the definite article (cf. 'd'.). It occurs either by itself (with or pronoun), with a second which then requires a pronoun, or is put in the accusative case ('dec.) e.g.

They wrote to each other every day."

"We understand each other /one another."

"And because of this, the inhabitants of the building do not know each other/one another."

"The balconies are arranged on top of each other/one another."

☞ NOTE:

- i. can only be used with when there is no preposition after the verb as in this case is treated like an object of the verb.
- ii. if a verb requires a preposition, the latter must come immediately after the verb. In addition, it is NOT possible to use in these contexts. e.g.

"They joined forces with each other."

iii. In Media Arabic, it is, however, not uncommon to find بغض with البَعْض. e.g.

"He prohibited them from using their forces against each other/one another."

"To be sure, the two injuries were related to each other/one another."

In Modern Arabic, it has become customary to add the pronoun, even with Form VI verbs. e.g.

"The government agencies are competing with each other/one another."

"These words contradict each other."

In some cases the English verb already has an inherent quality of reciprocity and it is possible, therefore, to omit 'each other/one another' in translation. e.g.

"This is a very important and busy road, which links several villages (with one another/each other)."

"All of them were mixed together (with each other)."

Also see 'Self'

Eatable/edible

Strictly speaking, **eatable** refers to food which is in a fit condition to be eaten, whereas **edible** (<> inedible) refers to food which is fit for human consumption. In practice, however, the distinction has blurred and both are increasingly used as synonyms. Note that only the latter can take a plural, **edibles**.

In Arabic, there is a similar difference with **eatable** being rendered by اللاَّكُل قَابِلٌ and **edible** by صالح للأكل e.g.

"There is a type of alfa that is edible."

"He said that the lamb (meat) was sound and eatable."

Economic/economical

Economic refers to the economy, whereas economical means using time or money without waste. In Arabic, the most usual translation for both is .e.g.

"He made it clear that the **economic** situation had an impact on may fields." أُوْضَحَ أَنَّ الحَالَةَ الاقْتِصادِيَّةَ تُوثِّرُ كَثِيراً عَلَى بَحَالاتِ عَديدة

"The reader will find a list of the ten most **economical** cars on the next page." يَجِدُ القارِئُ في الصفحة التالية قائمةٌ بٱفْضَل 10 سَيَّاراتٍ اِقْتِصادِيَّةٍ

Sometimes, **economical** can be translated, simply, as رَحِيصٌ ('cheap'). e.g. "What is the most **economical** way of travel?"

السَّفَرُ عُلَّ (lit.: 'what is the cheapest way of travelling?")

Effective/efficient/efficacious

Effective refers to the producing of an effect; efficient denotes action aimed at minimizing loss and waste of energy; efficacious is a formal equivalent of effective. The translation. The usual translations for effective are in and in the usual translations for effective are in the usual translations are also sometimes used to render efficient, though this is more properly translated by in the usual translated by in the u

"The government has carried out **effective** measures in order to deal with bribery." تَقُومُ الحُكُومةُ بِإِجْرِاءاتِ فاعِلةٍ في مُواجَهةِ الرَّشُوةِ

"Aspirin is an effective drug against headaches."

"The foreign trading policy of the countries in the Union has proven its great effectiveness."

"He was trained by efficient (or capable!) teachers."

"This is the most fuel efficient car."

Either/neither

Just like **both** (q.v.), **either** should only be used when two elements are involved. e.g. "either John or Sarah' (NOT *'either John or Sarah or David'). In formal English writing, **either** is followed by a singular verb. In Arabic **either** ... **or** is translated as: though in some cases a simple إِمَّا ... أَوْرِالِمَا لِمَا اللهِ اللهِ اللهِ اللهُ ا

"Either you are with us or against us."

"Either victory or death!"

"We are faced with two choices: either to accept these threats or to sign the document."

"It was either John or Sarah who attended the conference."

In the case of an exclusive choice of more than two elements, English uses commas, with 'or' preceding the last element; in Arabic, each element is preceded by \int e.g:

"He saw James, John, Sarah, Elisabeth or Peter – I'm not sure."

In order to render either of, أَتَّ مِن or أَيُّ مِن is used. e.g.

"Either of the employees." (OR: "One of the [2] employees']

"Either of them has to clean up the mess."

Neither is the negative of either and is subject to the same restrictions and rules in terms of number (only two) and agreement (singular verb). In Arabic, there are a number of possible constructions, the most usual of which is by repeating the negative particle with the coordinator ** e.g.

"Neither in London nor in Paris."

Neither the Hebron nor the Oslo agreement has been implemented.

Neither one is translated into Arabic by 15. e.g.

"Neither (one) of us can ride the horse."

"Neither (one) of them is in the house."

Whilst in English **neither...nor** offer an exclusive choice of only two elements, the Arabic construction can be extended to include an unlimited choice, which requires rephrasing in translation. e.g.

"The Egyptians didn't take part, nor did the Algerians, Tunisians and Moroccans." مَّ يُشارِكُ المِصْرِيُّونَ وَلا الجَزائرِيُّونَ وَلا التَّونِسِيُّونَ وَلا المَّونِسِيُّونَ وَلا المَّعارِبةُ

Note the difference in verb form in the two languages – affirmative vs negative – when either/neither and or/nor do not appear together. e.g.

"Have you done the homework? Neither/Nor have I." هَل عَمَلْتَ الواجِبَ ؟ كُمْ أَعْمَلْهُ أَنا أَيْضاً

Remember that either is used for also in negative sentences. e.g.

"I have **also** met him." قَابَلْتُهُ أَيْضًا

"I haven't met him either."

لَمْ أُقابِلْهُ أَيْضاً

Emigrate/immigrate/migrate

All imply movement of people from their native area to settle (usually) in a foreign place. The most general is **migrate** (> migrant); **emigrate** (> emigrant, emigré) means to migrate **out of** (a place), **immigrate** (> immigrant) denotes an **inward** movement. In other words, the distinction is one of perspective in the sense that one country's emigrant is another's immigrant!

In Arabic, the general verb to denote migration is نَوْحَ مِن /إِلَى (i, a) (< نَازِحٌ), while (مُهَاجِرٌ), strictly speaking, refers to emigration only, even if in modern Arabic it is also commonly used for immigration. e.g.

"He was born in Poland and emigrated as a child to France."

"He studied at the college of Ayn Tura in Lebanon before he left his (native) village and **emigrated** to Cairo."

"She was born in the United States and **immigrated** here with her mother who was of Egyptian origin."

"The island asked the European Union for help, especially in light of the increased number of **migrants** there." (Immigrants people who have immigrated.)

Note that مُهاجِرُون often denotes immigrants or migrants. e.g.

"We are second- and third-generation immigrants."

"The company's workforce includes many migrant workers."

Other nouns related to ('emigration) and (('place of emigration') both of which have a connotation of 'exile', and can often be rendered as 'flight'. In addition, is a technical term to denote diaspora (esp. the Arab one). e.g.

"The poet decided to visit his homeland Syria for the first time after his emigration (after he had emigrated) thirty-eight years earlier."

"The injustice is that of our sons' **flight** (fleeing) from war in the capital, from one district to another."

"Some Coptic émigrés (or: members of the Coptic diaspora) are calling for foreign intervention to protect their community."

"The Romantic movement was a revolution and its leaders were authors in the (Arab) diaspora."

مِحْرَةُ الْعُقُولِ ,NOTE the expression brain drain

Ensure/insure/assure

To ensure (US: insure) is close to guarantee and takes a clause as object; to insure means to protect against risk or loss. In an insurance context, to assure is the traditional verb used in British English for protection against the loss of something inevitable, which in practice means life assurance. However, the American English life insurance is increasingly being used.

In Arabic, all can be rendered by أَمْن/تأمين ('insurance'). e.g.

"Our **insurance** company prides itself on the fact that it is the oldest in the Arab world."

"Every individual is entitled to treatment under the national health **insurance** scheme."

"The Egyptian electricity network association entered into an agreement with networks from other Arab countries in order to **ensure/guarantee** the supply of electricity for all uses."

"I have taken out life assurance/insurance since I do try, as much as I possibly can, to ensure my sons' future."

"I'm one of those people who is no good at planning and life assurance/insurance, but I do try, as much as I possibly can, to ensure my sons' future."

Even/even if/even though/even so

In Arabic, 'even' is usually rendered by the particle , whereas the following noun appears in the same case as the one preceding . Note that ; can never take a suffix. e.g.

"She took everything, even the car."

"Even he rejected the initiative."

The difference between **even if** and **even though** is that the former denotes hypothesis, whereas the latter refers to an action that has actually taken place. Consider the following examples:

"Even if I agree to lend you the money, you still won't have enough for a new car." حَتَّى لَوْ وافَقْتُ عَلَى إِقْرَاضِكَ الْمَالَ، فَلَنْ يَكُونُ مَعَكَ مَا يَكفِي لِشِراءِ سَيَّارةٍ جَدِيدَةٍ

"Even though you were there, you didn't say anything when they were criticizing my performance."

In Arabic, both even if and even though can be rendered by the following:

POTE: Arabic tends to use in the perfect tense.

"I shall not say anything, even if they torture me."

"They will believe you, even if you don't provide the evidence."

These constructions can often also be translated as if only. e.g.

"I want to visit my mother in hospital, if only for an hour."

'Even so' is a conjunct, meaning 'yet' or 'nevertheless' and is rendered in Arabic by مَعَ أَنْ ,رَغْمَ ,بِالرَّغْم مِن ذلِكَ ,بِرَغْم or even, simply, as لَكِنَّ /لكِنْ e.g.

"He refused to lend me any money. Even so, he did agree to give me an advance on my salary."

☞ also see 'In Case/ In Spite'

Ever/never

Ever means 'at any time', whereas never signifies 'at no time'. However, in many cases they are used to denote the same, except that never occurs with affirmative verbs and ever usually (but not exclusively) in negative and interrogative sentences. Both generally occur with a (present) perfect tense, though in American English the simple past is commonly used. Both are rendered in Arabic by the adverbs with negative verbs. The last two can also translate as '(not) at all, in any way ...'. e.g.

"Women can never seduce men with their looks alone."

"He has never been outside his village in South Lebanon."

"We will never open the file, except after the negotiations have ended."

"I have **never** interfered in their affairs."

(OR: "I have not interfered in their affairs in any way.")

"The government's austerity programme never succeeded in reducing the budget deficit."

"This is the first time I have ever seen behaviour like this."

☞ NOTE: never and **ever** can even occur together to stress the intensive aspect. e.g.

"I will **never ever** forget this." لَنْ ٱنْسَى ذَلِكَ ٱبَداً

The use of ever (NOT *never) in superlative constructions. e.g.

"This is the most terrible thing I have **ever** seen." هذا أَفظَعُ ما شاهَدْتُهُ عَلَى الإِطْلاق

is used with past tenses, and with present and, especially, future tenses.

☞also See 'Already/Yet/Still'

Everyone/every one

In English, everyone, no one, everybody, someone, somebody, nobody are all followed by a singular verb. Every one stresses each individual person or thing in a group and is equivalent to 'every single one ...'. In Arabic, all are rendered by one e.g.

"Every one of them came with presents."

"Every one of them took his share."

"Every one of them is working towards achieving their goal."

"Every one of them is happy."

"Every one of the workers went on strike."

Exception (الاِسْتِثناءُ)

In English, the common exceptive expressions are except (for), but, with the exception of, bar, all of which can be used with both affirmative and negative clauses. Their main Arabic counterparts are الله بالمنطقاء بماعدا عنوا and الله بالمنطقاء بماعدا عنوا الله بالمنطقاء بماعدا والله بالمنطقاء بالمعادلة والمنطقاء والمنطقاء

- i. When y follows an affirmative, the exceptive noun is in the accusative, regardless of the case its position requires. Conversely, if y is used with a negative clause, the following noun has the inflection related to its position in the sentence;
- ii. The noun after is always in the accusative;
- iii. 💒 as the first element in a genitive (إضافة) construction;
- iv. The noun after is in the genitive;
- v. سوى as the first element in a genitive (إضافة) construction.

☞ NOTE:

in English, a negative construction with exception is often translated by means of an affirmative and the adverb only.

and سوى always follow a negative clause.

e.g.

"Everyone came, **except** (**for**)/**but** a secretary." [= "Only the secretary came."]

"He doesn't do anything **except/but** complain." [= "He only complains."] لا يَفعُلُ شَيتًا إِلاّ/بِاسْطِنَاءِ الشَّكُوَى

"I haven't seen anyone with the exception of/except Sarah." [= "I saw only Sarah."]

لَم أَرَ أَحَداً بِإِسْتِثْناءِ سارَةٍ/إِلاّ سارةً

"I haven't met him anywhere **except** in Tunis." [= "I (have) only met him in Tunis."]

"No-one remained in the hall **except** Hind." [= "Only Hind remained in the hall."]

"This is the best-selling product, bar none [= without exception]."

"I didn't eat anything except the cheese." [="I only ate the cheese."]

"He didn't continue his primary education **except** for a few years." [="He only continued his primary education for a few few years."]

"He didn't oppose anyone except a tyrannical government."

Exclamations (التَّعَجُّبُ)

The usual constructions in English are:

- What a ... e.g. "What a nice man!"
- PRON + TO BE + such ... e.g. "He is such a nice man!"

Arabic has a number of constructions to convey exclamation:

• مَا أَفْعَلَ followed by a noun. e.g.

'What a wonderful book!'

• المِنْة, followed by a (nominative) noun. e.g.

"What a nice man Muhammad is!"

When used with j and a (PERFECT) verb, it means 'how nice it would be if ...'. e.g.

"How nice it would be if he did it!"

• أَعْلُ + بـ followed by a noun. e.g.

"How good is Zayd!" [= 'Zayd is such a good man!']

. e.g . کَفَی + بہ

"Zayd is such a good teacher!"

Two dummy verbs, which appear in a frozen (3rd person masculine singular) form, i.e. ('how bad it is!') and ('how good it is!'), both of which can only be followed by a

noun in the nominative case, whereas they are generally not inflected for gender. e.g.

بِفْسَ الرَّجُلُ

"What a terrible man!"

بِفْسَ الْمَرُّ أَةُ

"What a terrible woman!"

بِمُسَ الْمُرْأَةُ زَيْنَبُ "What a terrible woman Zeinab is!"

بِنُسَ صاحِباً هو عَمْروُ "Amr is a terrible companion."

بِئْسَ الصَّاحِبُ إبر اهِيمُ "Ibrahim is the worst of companions."

Fairly/quite/rather/pretty

All these adverbs of degree mean 'not entirely'. Fairly, however, is less strong than quite (which in US English means 'very') and rather (which comes very close to 'very'). Pretty is the most informal and often means 'very'. Quite (not to be confused with the adjective quiet, which means 'not loud'!) can give rise to some confusion since, depending on the context, it means either 'not entirely' (and is then similar in meaning to 'fairly' or 'fully'). In Arabic, the translation of these four adverbs tends to involve to a local product of the second product of the se

"The results were fairly predictable."

"It is well-known that they rather feared the new technology."

"The conversation was pretty interesting."

"The composition of bee venom is **quite** [= fairly] complicated as it contains more than 80 components."

"I am quite [= very] sure he is incompetent."

"The play was quite good."

"He's quite [= fairly] fond of Maryam." (US)

Few/little/fewer/less/(lesser)

Few and little sometimes pose problems for a number of reasons.

Firstly, few is used for countables only and little with uncountables. e.g.

"This faction was formed very quickly, in the space of a few days."

"He is one of the few Arab thinkers who has a clearly defined philosophy."

"He left Egypt with a cultural landscape that was a **little**/slightly better than what it had been before his arrival."

There are very few films that convey real human feelings."

"There are **few** sanctions left after the improvement in relations between the two countries."

"He left us a cultural landscape that was a little /slightly better than what it had been before his arrival."

Secondly, whereas a few and a little have the positive meaning of 'some', few and little without the indefinite article have a negative connotation as they denote 'not enough'. e.g.

[&]quot;There was only little money left."

ما بَقِيَ مِن المَالِ قِلِيلٌ ما بَقِيَ مِن المَالِ إلاَّ قَلِيلٌ بَقِيَ هُناكَ قِلِيلٌ مِن المَالِ فَقَطْ

"He spends what/the little money he makes on alcohol and drugs."

"There were **few** cars on the roads."

The difference in usage in terms of countable/uncountable also applies to the comparatives less (uncountables) and fewer (countables). Lesser tends to be restricted to formal usage and occurs only in a small number of idiomatic phrases like "the lesser of two evils". In Arabic, (a) few and (a) little are rendered by it (pl. jul.), less/fewer by e.g.

"The Finance Minister pointed out that foreign loans represented **less** than 1 per cent."

"There were fewer seats up for election than there were in the House of Representatives."

"As one of the political analysts said: 'He is the lesser of two evils'!"

"They are lesser-known members of the British royal family."

→ NOTE: على الأقلّ 'at least'. e.g.

as the equivalent of English 'low' (especially in adjectival compounds). e.g.

ما هي فَوائدُ الْحَلِيبِ القَلِيلِ الدَّسَمِ؟ "What are the benefits of low-fat milk?"

Flammable, inflammable

In general English both terms denote that something may catch fire. However, in technical usage, only flammable is used in order to avoid confusion as inflammable may also be interpreted as 'not flammable'. For the same reason, the negative of flammable is non-flammable. In Arabic, the usual translation is a قابلُ للإشتعال as this is the translation of 'combustible', with non-flammable being rendered by غَرُ قَابلِ لِلإِشْتِعالِ للإِشْتِعالِ للإِشْتِعالِ للإِشْتِعالِ للإِشْتِعالِ للإِشْتِعالِ اللاِشْتِعالِ الللْشِعالِ الللهِ قَابلِيَةُ الاحْتِراقِ قَابلِيَةُ عَلَى الاحْتِراقِ قَابلِيَّةً الاحْتِراقِ قَابلِيَّةً عَلَى الاحْتِراقِ قَابلِيَّةً الاحْتِراقِ قَابلِيَّةً عَلَى الاحْتِراقِ قَابلِيَّةً عَلَى الاحْتِراقِ قَابِلَيْهُ الاحْتِراقِ قَابلِيَّةً عَلَى الاحْتِراقِ قَابلِيَّةً عَلَى الاحْتِراقِ قَابِلَيْهُ المَاتِيَةً عَلَى الاحْتِراقِ قَابِلَيْهُ المَاتِيَةً عَلَى الاحْتِراقِ قَابِلِيْهُ اللْعُرَاقِ قَابِلَيْهُ الْعُرَاقِ قَابِلَيْهُ الْعُرَاقِ قَابِلِيْهُ الْعُرَاقِ قَابِلِيْهُ الْعُرَاقِ قَابِلَيْهُ الْعُرَاقِ قُوبُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُهُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُهُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ قَابِلُونُ الْعُرَاقِ ق

"Methyl chloride is flammable when it comes into contact with air." كُلُورِيد الْمِيثِل قَابِلٌ لِلالْتِهابِ عِنْدَ خَلْطِهِ بِالْهَواءِ

"Helium is non-flammable, as opposed to the dangerous hydrogen." إِنَّ عَازَ «الهِلْيُوم» غَيْرُ قابِل للإشْتِعالِ خِلافاً عَن الغازِ الهِيدْرُوجِين الخَطِيرِ

"In addition, they used fuel which increased the flammability." بِالإضافَةِ إِلَى ذَلِكَ اِسْتَخْدَمُوا الوُقُود الَّذِي يَزِيدُ مِن القُدُرةِ عَلَى الإِشْتِعالِ

Note that the noun **inflammation** (بانهاب) is only used in medicine and refers to an infection, whereas **inflammatory** in non-medical contexts means 'inciting violence'. e.g.

"Lebanese circles have strongly condemned the **inflammatory** media campaigns organized by militants from abroad."

"There are plenty of medicines to treat an **inflammation** of the intestines." هُناكَ أدوية عَدِيدةٌ لعِلاج الْتِهابِ الأَمْعاءِ

The future (المُسْتَقْبَلُ)

In the Arabic tense system, the imperfect (النصارع) is used for both the present and the future; e.g. يَدُرُسُ الطَّالِبُ may mean either 'the student **studies/is studying**' or 'the student **will study/will be studying**.'

However, in MSA the particle or its abbreviation added to the imperfect is used to denote the future. Although they are often used interchangeably, careful users make a distinction between near (a) and distant (future, whereas is often imbued with a higher degree of certainty. In the absence of the particle, the context and/or the use of an adverbial is sufficient for the imperfect to be translated as a future tense in English. e.g.

"The vice-President will arrive tomorrow."

"The trees and flowers will bloom in spring."

"We'll go on a trip in two weeks' time."

In addition to 'WILL + INF.', the construction 'TO BE+ GOING + TO.' is also used to denote the future in English, particularly when it involves a planned action: e.g.

"I'm going to visit the museum next week."

The Arabic imperfect is also used to denote a 'future in the past' and the 'past in the future', the so-called **future perfect** (for events that take place before others in the future), which are expressed, respectively, by سَرُسُونَ يَكُونُ + IMPERFECT and (قَدْ) + PERFECT. e.g.

"He will have been waiting for an hour before she arrives."

"He will have had the necessary rest on Saturday."

"The character of Jerusalem will have completely changed so that negotiations will become sterile and pointless."

"He would go on to win the nomination of the Republican party."

In English, the future progressive (will + be + PART.) stresses the ongoing nature of an activity in the future and is translated into Arabic like a future simple or, more usually by سَرَاسَوْفَ يَكُونُ + PART. e.g.

"The Constitution will be sitting at the negotiation table and watching what is going on."

Genial/genius/genuine/ingenious/ingenuous

Genial means 'cheerful' (بَشُوش ،باشَ ،لطيف); a **genius** denotes an extremely talented person (عَبْقَرِيّة) or 'an exceptional talent'; **ingenious** denotes 'inventiveness' (عَبْقَرِيّة) and **ingenuous** is synonymous with 'innocent' or 'naive' (ساذَج). e.g.

"Every time she entered the office, she saw the **genial** face of the doorman." كُلُما دَخَلَت الْمُثَتَبَ وَجَدَت وَجُهَ البَوَّابِ بَاشًا

"In spite of this, he is a very **genial**/amiable/pleasant fellow." يِرَغْم ذَلِكَ فَهُوَ رَجُلٌ لَطِيفٌ جِدًا

"His literary genius stood out in his first novel."

"This device is an **ingenious** and simple invention for the dispensing of soap." هَذَا الجِهازُ اختراعٌ عبقريٌّ وَبَسِيطٌ لِلاسْتَغْناء عَن الصَّابُون

"Either she is ingenuous/naïve or acting in collusion with him." هِيَ إِمَّا سَاذَجَةٌ أَوْ مُتَوَاطِئةٌ مَعَهُ

Hal (مُلْ)/a (أَ)

In order to render Yes/No questions, Arabic requires the use of the question particles (اَعُونُ الْاسْتَقْمَامُ) for this purpose. Whereas both can be used interchangeably in a number of cases, is more restricted inasmuch as it cannot occur before a definite article or any word that begins with English, on the other hand, uses inversion of verb and subject for the same purpose and so neither of the Arabic particles appears in translation. e.g.

"Will you approve the proposal?"

"This is the truth, isn't it?"

☞ NOTE:

- the particle is **prefixed** to the first word of the sentence;
- in spoken or even formal discourse, these particles are often omitted as intonation marks the interrogative nature of the utterance. As a result, translators should be wary of 'classicizing' literary dialogue, for instance: e.g.

"Did he really do it?" (هَلْ) عَمَلَهُ فِعْلاً؟

Happen/occur/take place

Even if these three verbs are often used interchangeably, in careful usage take place is reserved for events that are planned, whereas happen and occur are used to denote unexpected events. As a result, it is unidiomatic to say 'The meeting happened yesterday', since meetings are usually planned and thus require the verb take place (or 'to hold'). A similar difference exists in Arabic, with being the common verb for happen, while take place is rendered by verbs like 'eio, 'ioan, ioan, io

"I don't understand what happened there."

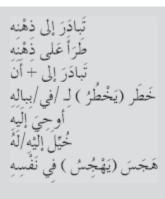

"Yesterday, the draw in the Arabic football championships took place/ were held."

"Last month the sessions of the sixty-fifth conference of the Cairo Academy of the Arabic Language took place/were held.

Also note the translations of 'it occurred to ...', in the sense of 'the idea suggested itself to ...'

- 'I/you... came to think...'
- 'it appeared to ...'
- 'it seemed to ...'
- 'the thought/idea came/occurred to...'.

In Arabic the following expressions are used:

e.g.

خُيلَ إِنَّ أَنْ مِن الضَّرُورِي أَنْ أُجِيبَ عَلَى إِتِّهاماتِهِ "It occurred to me that I should respond to his accusations."

السُّوالُ الَّذِي تَبادَرَ إلى ذِهْنِي هُوَ هَلْ كانوا يعَرِفُونهُ؟

"The question that came to mind is whether they knew him."

خُيِّلَ إِلَيَّ أَنَّكَ رَضَخْتَ لِلَطَالِبَهُ

"It seemed to me that you gave in to his demands."

Hardly/barely/scarcely/no sooner

Hardly and scarcely (like barely) mean 'almost not', 'with difficulty', and may be translated into Arabic by ما كاذر لا يكادر لم يقض قلما. e.g.

"The visitor had barely/scarcely left their house."

"Barely a day went by without insults and humiliations."

"Scarcely a month went by without demonstrations and protests."

"One of the results of this inquiry, which **hardly** came to light, was that the party had become bankrupt."

Note that, as these adverbs are already inherently negative, there is no need for another negative in the same clause in English. e.g.

"There was scarcely/hardly any (NOT *'scarcely/hardly no') bread left."

"The African newspapers barely/scarcely/hardly print more than thirty thousand copies."

When they mean 'immediately after', they are followed by when. No sooner is a synonymous expression, but is followed by than. In Arabic, these adverbs are expressed as follows:

			ما كاد
		IMPERF.+	لا يَكادُ
PERF. + (IMPERF.)	حُتَّى		لَمْ يَكَد
		SUBJ.+	ما إنْ
		JUSSIVE +	ي ري
PERF. +		على + VN	لَمْ يَمْضِ

e.g.

"No sooner had the man sat down than he jumped up (again) and made a dash for the room."

(OR: "The man had scarcely sat down, when he jumped up and made a dash for the room.")

"The ink was barely dry on one of the spying scandals, when another one appeared on the American scene."

"The ink was barely dry on one of the spying scandals, when another one appeared on the American scene."

"No sooner did the president read this report than he ordered that the situation be improved."

"The night was barely over when the press caravans started to move towards the capital."

"Barely two days passed after his speech when the book became a bestseller."

لْمْ يَمْضِ عَلَى خِطابِهِ يَوْمانِ حَتَّى أَصْبَحَ هذا الكِتابُ الأكْثَرَ مَبِيعاً

High/tall

High is the opposite of **low** and refers to the distance from ground level; **tall** is the opposite of **short** and actually means 'higher than average'. The former is used only for things, the latter for people and for things which are high and narrow. e.g.

"We climbed a **high** mountain." قَدْ تَسَلَّقْنا جَبَلاً عَالِياً

"Can you see that **tall** building over there?" هَلْ تُشاهِدُ ذلكَ الْمُنَى العالي؟

Arabic-speakers have to pay particular attention to not confusing **tall** with **long**, due to the fact that in Arabic both are rendered by فريلة in some contexts. e.g. شُعُور طَوِيلة, '**long** hair', رُجُلٌ طَوِيلٌ, '**tall** man'. In other cases, Arabic uses عالي to denote highness or tallness. e.g. 'a tall/high mountain', جَدُلُ عال .

Hire/rent/let/lease/charter

All of these refer to 'selling/buying the right to use something'. In British English, the distinction between **hire** and **rent** is based on the length of time (e.g. a couple of hours or a day); **hire** is used when it involves a short period of time, with **rent** denoting longer time spans. In American English, **rent** is used in both contexts.

Note that both verbs can be used by the person who owns the property and the one who borrows it. If you want to stress the fact of *selling* the use, it is possible to add the preposition **out**.

To let is used only for buildings in British English (AE: rent), whereas charter is restricted to ships or airplanes. Lease is similar to let or rent but is used only for buildings or vehicles. The noun lease refers to the rental contract.

Arabic does not make a distinction in terms of period of lease and uses the same verbs for all contexts: اُجُورَ رِاسْتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رِالْسَتَأْجَورَ رَاسْتَأْجَورَ رَاسْتَعُورَ عَلَيْهِ وَالْعَلَى وَالْعَالَى وَالْعَلَى وَلَيْعِلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَالْعِلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَاعِ وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعِلَى وَلَا عَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَلَى وَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَلَا عَلَى وَلَا عَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَلَا عَلَى وَالْعَلَى وَالْعَلَى وَلَا عَلَى وَلَا عَلَى وَلَا عَلَى وَالْعَلِي وَلَا عَلَى وَلِي وَلَا عَلَى وَالْعَلَى وَلَا عَلَى فَالْعَل

"He rented a flat (AE: apartment) with only two rooms."

"They rented out their land to the farmers."

"My colleague rented out his spare room to me."

"He hired/rented a car and went on a family trip to the mountains of Colorado." اِسْمَاْجَرَ سَيَّارةٌ وَذَهَبَ في زِيارَةٍ عَائِليَّةٍ إلى جِبالِ كولورادو

"The government delegation **chartered** a private plane for their European tour." اِسْتَأْجَرَ الوَفْدُ الْحُكُومِيُّ طَائرَةً خَاصَّةً لِجَوْلَتِهِ الأُورُوبِيَّةِ

"During the economic crisis he was forced to decrease the **rent** on the house substantially."

"He has not once paid **rent** on the flat he has been living in for the past three (consecutive) months."

"The owners of the institutions are complaining about the high costs of **renting** to shops."

F NOTE: for rent/hire, to let: للإيجار

Historic/historical

Historic means 'of great significance' or important from the point of view of history, whereas historical refers to) the science of) history. In Arabic, both tend to be translated as tended as tended as

"This theory generally leads to the concealment of the **historical** dimension of the text."

"They were inflicted a historic defeat during the world championships."

Holiday/holidays/vacation/leave

'Holiday' is the general word for 'a period of rest from work'. Some days are granted by law; these are known as 'public holidays' (some of which are known in British English as Bank Holidays). Note also that you go 'on holiday' (NOT *holidays). Also, a single day's holiday is referred to as a day off, which should not be confused with an 'off day' as this means a day when one is not feeling on top form! e.g.

"Christmas is a public holiday in all government institutions."

"In our country, employees get thirty days official annual holidays."

"His Highness the Emir attended the celebrations on the occasion of the Kuwaiti National Day.

'Vacation' refers to the long periods during which universities are closed. Note, however, that in American English it is also often used instead of the British English 'holiday' (e.g. 'on vacation'). e.g.

"Students are feeling frustrated during the summer vacation because of the paucity of recreational areas."

Soldiers tend to go 'on leave'. However, leave can also apply to other people in expressions like 'maternity leave' or 'sick leave'. e.g.

"The soldier is not allowed to travel abroad during his leave."

"As long as the **maternity leave** is justified by a medical certificate, the employer cannot dismiss the woman."

For the period during which parliament and the courts are not working, the word 'recess' is used, rather than 'vacation' or 'holiday'.e.g.

"The court **recess** runs every year from the first of July until the end of September."

- Though the latter is avoided by careful users since it is perceived to be a regionalism (Egypt) and as it is also the word used to denote an academic degree (cf. شهادة) or 'official approval', 'authorization', etc.
- **NOTE: do not confuse vacation with vacant, an adjective meaning 'empty, available' (e.g. a seat, position) and vacancy, a noun denoting an 'unfilled place (e.g. room in a hotel) or job'. Both are rendered in Arabic شواغر (pl. شواغر الما) or job'. e.g.

"Are there are any vacancies/vacant positions in the company now?" هَلْ هُناكَ وَظائفُ شاغِرةٌ/خالِيةٌ في الشَّرِكةِ الآنَ؟

"People in the city are not used to seeing vacancies in the hotels." النَّاسُ في اللَّدِينَةِ غَيرُ معتَادينَ عَلَى وُجودِ غُرَفٍ شاغِرة / خالِيةٍ في الْفنادِق

Human/humane

Human refers to 'human beings, mankind', whereas humane is synonymous with 'compassionate', and is related to humanitarian. In Arabic, both are rendered by إنْسانيُّ.

"Political disputes do not mean that there are arguments at the level of human relations."

"Islamic slaughter is not considered humane under French law."

"The humanitarian aid arrived in the stricken region, despite efforts by the terrorists to prevent it."

"Last month, there were calls for international measures to prosecute him for crimes against humanity."

Hyphens

As a general principle, hyphens are used in English in adjectival compounds premodifying (= appearing before) nouns to indicate a close relationship between items, often underscoring the fact that they act as one unit. e.g.

- 'well-known author' (a 'well known author' could be one who is well not ill and who is known). Note the absence of the hyphen in 'an author is well known', since there is no such ambiguity;
- 'blue-green eyes' (rather than eyes that are blue and green, they are a mixture of blue and green);
- 'physician-patient confidentiality issues';
- 'high-frequency sound waves';
- 'first-floor flat';
- 'kind-natured child';

Note that hyphenated adjectival compounds are generally not marked for plural. e.g.

- 'four-week holiday' (NOT *four-weeks holiday);
- 'six-kilogram box' (NOT *six-kilograms box);
- 'twenty-pound shirt' (NOT *twenty-pounds shirt);

Most hyphenated compounds consist of two elements, but it is by no means uncommon to have more than two. e.g.

- 'a well-thought-out theory'
- 'don't give me this little-Miss-touch-me-not attitude!'

In some cases the hyphen indicates other types of relationship between the elements. e.g.

- 'Arabic-English translation' ('translation from Arabic to English')
- 'The Cairo-Alexandria train' (the train from Cairo to Alexandria')

Hyphens are not traditionally used in Arabic and to this day occur only very rarely. Most of the above examples are translated in a more explicit manner, which often may mean by a single word. e.g.

أَمُواجٌ صَوْتِيَةٌ عَالِيَةُ التَّرَدُّدِ , 'high-frequency sound waves' , أَمُواجٌ صَوْتِيَةٌ عَالِيَةُ التَّرَدُّدِ , 'four-week holiday' , عُطْلَةٌ لاَّرْبَعَةِ أَسابِيعَ , 'six-kilogram box' مُسْدُوقٌ وَأُزْنُهُ سِّتَّةَ كِيلُوغِراماتٍ , 'blue-green eyes' , عُيُونٌ خُضْرٌ زُرُقٌ , 'blue-green author' , كاتبٌ مَعْرُوف

One of the few exceptions, where Arabic follows English practice is: رالتَرْ جَمَّةُ إِنْكَلِيزِيٌ عَرَبِيّ (English-Arabic translation'.

One should hasten to add, however, that this is considered non-normative usage by many and the preferred translation here would be:

If/whether

In addition to introducing conditions (q.v.), if is also used in reported speech with Yes/No questions, in which case it is often interchangeable with whether. In Arabic, they are often translated by إِذَا إِنَّ أَنَّ اللهِ (if there is more than one element) or, simply, by a prepositional phrase. e.g.

"I don't know **if/whether** he'll be there." لا أَعْرَفُ إِذَا كَانَ هُناكَ

"Do you know **if/whether** he'll be at home or at work?" هَلْ تَعْرِفُ إِنْ/إِذَا كَانَ فِي الْبَيْتِ أَمْ فِي الْمَكْتَبِ؟

In some cases, however, if is excluded and ONLY whether is allowed:

• Before 'to + infinitive'. e.g.

"I don't know **whether** to replace the computer." لا أَعْرِفُ إِنْ كَانَ يَنْبَغِي عَلَيَّ تغَييرُ الحاسُوبِ

• After a preposition: e.g.

"Everything depends on **whether** they will be able to sell the house." كُلُّ شَيءٍ يَعْتَمِدُ عَلَى مَّكَّنِهِم مِنْ بَيْعِ البَيْتِ

• in sentence-initial positions: e.g.

"Whether we agree (or not) is not important at this stage." إِنْ اِتَّفَقْنا أَمْ لا فَهَذَا غَيْرُ مُهِمٍّ في هذِهِ المُرْحَلةِ

with '... or not'. e.g.

"It doesn't matter **whether or not** he chooses to resign."

(اللهُ اللهُ الله

In case/in spite of

In case means 'to allow for the possibility that'; in case of is synonymous with 'in the event of'; in no case means 'under no circumstances'. In spite of (= despite) is a preposition meaning 'irrespective/regardless of'. The first three are translated into Arabic by means of a circumstantial clause (Jb), whereas in spite of is rendered by a construction involving Je.g.

"We have to issue austerity measures in case the government refuses the new proposal submitted by the opposition."

"The detention can in no case be more than three days."

"In case of rain, you can collect water."

"I don't understand the reasons for Britain's lack of sympathy with the Arab cause, in spite of the fact that their interests lie with the Arabs."

"In spite of the fact that the National Party won the elections, Scotland will remain part of the United Kingdom, with the Queen as its monarch."

"The population made preparations for Ramadan despite the blockade."

"We find that the majority of Iraqi politicians remain optimistic, in spite of all the violence."

بِالرَّغْمِ من كُلِّ العُنْفِ (الذَّي يَحدُثُ في العِراق) فإننا نُلاحِظُ أَنَّ أَكْثَرِيَّةَ السِّياسِيِّنَ العِراقِيِّين مُتَفائلُونَ

Incredible/incredulous

Despite obvious similarities in form, these two words have quite different meanings: incredible (الا يُصَدُف) means hard to believe; incredulous (مُرْتَاب) showing disbelief. e.g.

"He told me an **incredible** story about how he was attacked by sharks." لُقَدْ حَكَى لِى قِصَّةً لا تُصَدِّقُ عَنْ كَيْفِيَّة مُهَاجَمةٍ أَسمَاكِ الْقَرْشِ لَهُ

"They looked at her with an **incredulous** expression on their faces." لقَد نَظَروا إلَيْهَا وَعلى وَجُوهِهم نَظْرَةٌ مُرتَابَةٌ

**NOTE: the opposite of 'incredulous', credulous is synonymous with 'naive', 'gullible'. e.g.

"Only someone as **credulous** as his mother would believe his inventions." لا يُمكِنُ إلا لشَخصِ في سَذَاجَةِ والدَتَهُ أَنْ يُصَدِّق إختراعَاتِه

Industrial/industrious

Industrial is related to industry, whereas industrious is synonymous with 'hardworking, diligent', which are rendered in Arabic by, respectively, and we e.g.

"The report refers to the need to set up **industrial** unions and to increase cooperation with the Ministry."

"If a pupil is industrious, he will get the secondary school certificate."

Information

The main issue in the use and translation of **information** is that in English it is an **uncountable**, so it is incorrect to talk about 'informations', whereas in Arabic it tends to be rendered by a **plural**, i.e. اخبار معلومات الشعلامات. e.g.

"The information desk is on the second floor."

"We have no **information** regarding foreign fighters on the outstkirts of the city." لَيْسَت لَدَيْنا أَيُّ مُعْلُومات عَن وُجُود مُقاتلينَ أَجانبَ عَلَى مَشارف اللَّدينة

"We have information (news) on the violent attack in the market place."

→ NOTE:

"The Minister for Information issued a statement at the press conference."

Interfere/interrupt/intervene

Interrupt (الْفَطَعُ [a] الفَطَعُ إله means to stop someone doing something for a short while; to intervene (داخل بُوسُطُ) means to enter into something (e.g. a dispute) in order to find a solution, and to mediate; interfere (تَدَخُلُ) refers to an unsolicited intervention which is considered irritating. e.g.

"Troublemakers **interrupted** the lecturer, who made as if he was going to be quiet and then resumed his talk."

"The National Security Council has to **intervene** in the dispute between the parties and the Intelligence Agency."

"The Organization of the Islamic Conference (OIC) will **intervene** between the two parties."

"The main thing is that the state should not interfere in economic activity."

Intolerable/intolerant

Intolerable is used for something which cannot be tolerated, although in informal English it means 'irritating'. Intolerant denotes a lack of respect for others, their beliefs, etc. In Arabic, they may be translated as مُسَامِح غَير and لا يُطاقُ/غير مُحَمَّل respectively. e.g.

"They responded to the **intolerable** provocation in an appropriate and lawful manner."

"He is a Muslim and an Arab and he will respond to **intolerable** provocation in an appropriate and lawful manner."

"During his university days he learned that the authorities are unjust and intolerant."

Note that in some contexts, غَيْرُ مُسَامِع can also be rendered by مُعَصِّبٌ, 'fanatical'. e.g.

"This view is part of an intolerant colonialist mindset."

Invaluable/valueless

In spite of the prefix —in, which generally has a privative function (like un-, or non-), invaluable does not mean 'without value', but rather the opposite, i.e. 'too precious to put a value on' (لا يُقَدِّر بِثَمَنِ الاَيْتَانُ). The absence of value is conveyed through the adjective valueless (بلا/بدُونَ قِيمَة). e.g.

"This painting is invaluable."

"Counterfeit money is valueless."

Judicial/judicious/judiciary/ judicature

Judicial (قضائية) is an adjective that refers to the courts, lawyers etc.; judicious (حَكِيةٌ, حَصِيفٌ) means 'prudent'; both the judiciary and judicature can be used to denote the body of judges in the courts of law (جَمَاعَةُ القُضَاةُ).

"They were getting closer to a solution after settling the disputes and the publication of the **judicial** rulings regarding the grievances submitted by the people."

"The same **judicious** equilibrium in his views was observed in his words on the Cold War that was raging."

"The Central Bank imposed a judicious loans policy."

"The union expressed the view of the **judiciary** on the ongoing struggle between the legal profession and the District Attorney."

Just/just now

As a time adverb, **just** is always used with a perfect tense. **Just now** can mean 'a very short time ago' or 'at this moment', and can be followed by a present progressive, simple past or present perfect. In Arabic, this is generally rendered by the use of the adverbial [+ PRON] and the PERFECT. e.g.

"We have just finished eating."

"He has just now driven onto the car park."

"I'm leaving the flat just now, so I'll be at your place in fifteen minutes."

PNOTE: the use of 'just' in the sense of 'only'. e.g.

"I'm just saying that you shouldn't shout at her like that."

Keep on ...

This progressive construction is translated into Arabic by some of the so-called 'sisters of ما زال /لا يَزال (a), عان: ظلّ and the **imperfect**. e.g.

"He **keeps on** writing and his pen does not stop (/ continues) detailing stories and novels on paper."

"We keep on considering participating in Parliament."

"He will keep on thinking like that until he arrives at the airport."

"She keeps on talking about the party's desire to win the local elections."

FNOTE: despite the past tense form of ما زال it has to be translated by a present in English.

Lawyer/solicitor/barrister

All these terms refer to someone who acts on someone's behalf to protect their interests in a legal context. In American English, the words lawyer, attorney (-at-law), counselor (-at-law) are used interchangeably. In England, however, the general term is lawyer, whereas solicitor and barrister refer to specific types of lawyers. Advocate is a term used in certain legal systems (e.g. Scotland) for lawyer.

Arabic has only one word for all of them, i.e. In practice, it is generally appropriate to translate this by the most generic term, i.e. lawyer.

"The two lawyers brought a case before the Administrative Tribunal of Mansoura."

أَقَامَ الْمُحامِيانِ دَعْوَى أَمامَ مَحْكَمَةِ القَضاءِ الإِدارِيِّ بِالمَّنْصُورَةِ

Let's ...

This so-called hortative imperative (a contracted form of 'let us'), is followed in English by an INFINITIVE; in Arabic, the usual construction is with the so-called ('the imperative lām') followed by the JUSSIVE, or by the interjection of ten followed by the preposition before pronouns. e.g.

```
لِنَدْهَبْ
"Let's go."

"Let's study French!"

هيًا بنا نَتَعلَّمُ الْفَرَنْسِية
```

With the imperative $l\bar{a}m$, it is possible to add \dot{a} , in which case the \dot{a} loses its vowel: e.g.

Another possible construction is with the (invariable) imperative وَفَعُ), which often occurs with a pronoun suffix: e.g.

Make/do

The distinction between *make* and *do* in translation is often confusing as in many cases both verbs are translated by the same words in Arabic, i.e. فَعَلَ (a) or عَمَلَ (i). e.g.

"I did my homework." عَمِلْتُ/فَعَلْتُ وَظَائِفِي/واجِباتِي

"She made the cake."

عَمَلَت/فَعَلَت الكَعْكَ

In both cases, the Arabic verbs are interchangeable.

However, when **make** expresses causality – the fact of making someone do something – the usual translation involves (a) as an auxiliary, which may occur with either perfect or imperfect verbs. e.g.

"These jokes will make you laugh."

تَجْعَلَكَ هذهِ النُّكَتُ تَضْحَكُ/هذهِ النُّكَتُ سَتَجْعَلَكَ تَضْحَكُ

"He made me the laughing-stock of the entire university."

جَعَلَنِي أُضْحُوكةً أمامَ كُلِّ الجامِعةِ جَعَلَنِي أُضْحُوكَةَ الجامِعةِ كُلِّها

Marine/maritime/nautical/naval

All these adjectives denote a connection with the sea, but tend to have their own collocates; 'maritime' is usually used when it involves shipping and navigation. e.g.

"The Phoenicians were a trading/mercantile and maritime/seafaring nation." كَانَ الْفِينَقِيُّونَ شَعْبًا تِجَارِيًّا وَملاحِيًّا

"The new maritime trade law will come into force next month."

Close to maritime in meaning, 'Nautical' collocates with, for instance, maps and speeds (e.g. 'nautical mile'). e.g.

"The maritime/nautical museum owns a large collection of old nautical maps." يَمْتَلِكُ المَّحْرِيُّ بَحْمُوعةٌ كَبِيرَةٌ مِنْ خَرِ انْطَ بَحْرِيَّة/مِلاحِيَّة قَدِيمة

'Naval' occurs in connection with the Navy (a country's warships, العَسْكَرِيَّة الْبَحْرِيَّة البَحْرِيَّة البَحْرِيِّة الْمِنْ الْمُعْرِيِّة الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمُعْرِيِّة الْمِنْ الْمِنْ الْمُعْرِيِّة الْمِنْ الْمِنْ الْمُعْرِيِّة الْمِنْ الْمُعْرِيِّة الْمِنْ الْمُعْرِيْنِ الْمُعْرِيِّة الْمِنْ الْمُعْرِيِّة الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمُعْرِيِّة الْمِنْ الْمُعْرِيِّة الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمِنْ الْمُعْرِيْلِ الْمِنْ الْمُعْرِيْلِيِيِّ الْمِنْ الْمِنْ الْم

"The government announced the projects aimed at strengthening the country's naval defence capability."

"These measures are intended to protect the marine environment."

"Fishermen are afraid of the depletion of marine wildlife."

"The marine/maritime shipyard was set up during the reign of Muhammad Ali Pasha."

BUT:

"The naval shipyard built the aircraft carrier for the French Navy."

The above shows that these adjectives are more likely to pose a problem in Arabic>English translation rather than the other way around since in Arabic all three can be rendered by معرفي , with معرفي also being possible when it involves transport(ation), though it primarily denotes navigation.

FNOTE: the use of the capital in 'Navy' when it refers to the military. In some expressions, it can refer to a non-military fleet of ships, in which case there is no capital. e.g. 'merchant navy', أُسُطُول جَارِيّ

Maybe/may be

Although they are near-identical in form, their usage varies considerably inasmuch as **maybe** is an adverb meaning 'perhaps' (زُعُّا, لَعَلَّى عُكِن/غُكِنَّ أَنْ), whereas **may be** is a verb phrase denoting 'it is possible that'. e.g.

"Maybe most of the articles in the new law are controversial." لَعَلَّ أَكْثَرَ مَوَادٌ القانُونِ الجديد مُثيرةٌ للجَدَل

"Maybe we have to wait until 27 May in order to find out the truth about the political identity of the country."

"Maybe she's hidden all the bags." رُبُّا قَد أُخْفَتْ كُلُّ الْحَقائبَ

"It may be difficult to forgive him, but he is your father." (= Maybe it's difficult...) عَكِنُ أَنْ يَكُونَ غُفْرانُ مُعامَلَتِهِ صَعْباًعَلَيْكَ ولَكِنَّهُ أَبُوكَ

Moral/morale

Moral can be both a **noun** and an **adjective**: as a noun, it refers to an ethical rule, with the adjective meaning that one acts in compliance with such rules (= **ethical**). **Morale** is a noun only and denotes 'mental confidence/strength'. In Arabic, the former is rendered by عُلْق (plural عُلُق (plural عُلُق (plural عُلُق), the latter by عُلْق (e.g.

"This principle has no moral/ethical basis."

"He refused to invest in the project or take any part in it since it violates moral/ethical principles."

"In their reflections and experiments, scholars have to take account of moral/ethical considerations."

"The victory will urge the players to enter the championships with heightened morale."

More/most/mostly

These three words are often confused. Furthermore, most, in particular, can have different meanings. e.g.

"I was most (= very) impressed by his performance."

"I was mostly (= particularly) impressed by his performance." [less by his clothes, for instance]

In comparisons, **more** and **most** should be distinguished in that **more** applies to two elements, **most** to three or more. Arabic makes no such distinction and renders both by means of a superlative construction. e.g.

"This is the more complex solution of the two"

"She is the most beautiful of the family."

For the more ... the more, see the 'Comparative'

Much/many

The difference between these two words is one of grammatical usage: **many** is used with countables, **much** with uncountables and is often interchangeable with 'a great deal'. In Arabic, both are rendered by the same adjective, i.e. e.g.

"It received interest and **much** (/ a great deal of) appreciation from world leaders and economists."

"Many cars will be put up for auction."

Also note the use of **much** as an adverb, meaning 'a great deal', 'a lot', which is also usually translated as e.g.

"The government did not achieve much."

The expression 'many + a + sing. noun' is a formal equivalent to 'many + plural noun'. e.g.

"Many a time, the public servants demanded a raise in salary."

"Many a student fell into this trap."

Nevertheless/notwithstanding

Nevertheless means 'in spite of that' and is synonymous with nonetheless. As we have seen (q.v. 'even so'), it is rendered in Arabic by: مِنْ ذَلكَ, رَغْمَ مِنْ أَنَّ مِنْ ذَلكَ, عَلَى الرُغْمِ مِنْ ذَلكَ, بِالرُغْمِ مِنْ ذَلكَ, وَغُمْ مِنْ ذَلكَ, بِالرُغْمِ مِنْ ذَلكَ, بِعْمِ مَعَ أَنْ, عَلَى الرُغْمِ مِنْ ذَلكَ, بِالرُغْمِ مِنْ ذَلكَ, بِالرَغْمِ مِنْ ذَلكَ, بِهِ إِلَيْ إِلَيْ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِللَّهِ إِلَيْهِ إِلَيْهِ إِلْمُ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلْمُ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ اللَّهِ إِلَيْهِ إِلِي إِلَيْهِ إِلْهِ إِلْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلْهِ إِلْهِ إِلْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلِي إِلِي أَلِي إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلِي إِلِي إِلْمِلْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ إِلَيْهِ

"Nevertheless, we shall be forced to go ahead with the plans."

"I'm none the less happier for having lost my job."

"She travelled to Egypt, doctor's orders notwithstanding."

Northeast/southeast/...

Whilst in English the combinations of the cardinal points come in a particular order, i.e. **north/south** preceding **east/west**, Arabic allows for either order, with the two elements appearing either in an or as a **noun phrase** in which the second item is a *nisba* adjective modifying the first. e.g.

"Eighteen people were killed by an explosion at a bakery in a city in the **northeast** of/northeastern Pakistan."

"The troops moved towards the **southeast** (NOT *eastsouth) of the country."

☞ NOTE:

- these compounds can also be spelled with a hyphen. e.g. northeast, south-west;
- when they refer to a specified geopolitical entity, rather than a general geographical area, the cardinal points are spelled with a capital in English. e.g. 'North-South dialogue' (حوار شمال جنوب) where 'North' and 'South' represent industrialized countries and developing countries, respectively. Similarly, North Africa (الشمالية افريقيا) refers to a clearly defined entity, i.e. Tunisia, Morocco and Algeria, but not Egypt, even though it is in the north of the African continent.
- The forms northeastern /-western and south-eastern/-western always refer to an undefined area and are thus not capitalized. In Arabic, both defined and undefined uses are translated identically. e.g.

'South Africa' (country): إفْريقِيا الجَنُوبيَّة

'southern Africa' (area in the south of the African continent): مِنْطَقَةٌ فِي شَمالِ إِفْرِيقِيا or جَنُوبِ إِفْرِيقِيا

'Southeast Asia' (geopolitical concept)/'southeastern Asia' (area in the southeast of the continent'): جُوبُ شَرِق آسِيا

"northern Africa' (area in the north of the continent): شمال إفريقيا

☞ NOTE: The English 'north /... OF...' is rendered in Arabic by the respective noun in a genitive construction: e.g.

"The region east of the capital was hit by the storm."

كانّت المِنْطَقةُ شَرْقُ العاصِمةِ مُصابةً بِالعاصِفةِ

Not long before ...

PERFECT	+ أَنْ حَتَّى	ما لَبِثَ لَمْ يَلْبَثْ
SUBJUNCTIVE	+ حَتَّى أَنْ	لايَلْبَثُ لَنْ يَلْبَثَ
PERFECT	+ حَتَّى	كَمْ يَمْضِ
SUBJUNCTIVE	+ حَتَّى	لَنْ يَمْضِيَ

e.g.

"It wasn't long before the militia responded to the attack on its headquarters." مَا لَبِفَتُ أَنْ رَدُّتِ الْكَتَائِبُ عَلَى اِقْتِحام مَقَرِّها

"It wasn't long before she discovered that he had not warned them of the danger."

"It wasn't long before the dollar fell back once again."

"It wasn't long before he joined the intelligence services."

"It doesn't take long before there is firing from all directions."

"She doesn't leave him unless she is forced to and it does not take long before she returns to him."

"It won't be long before he gets a grip on himself and realizes his responsibilities towards his wife and children."

"It wasn't (/ was only) two centuries before oil changed the face of the world."

"It will not be long before we're going to be forced to cooperate with that company."

Not only/just ... but also

This construction can be rendered in a variety of ways in Arabic:

(أَيْضاً) (كَذَلِكَ)			JUSSIVE+	ř
أَيْضاً	بُلْ	فَحَسْبُ	IMPERF. +	K
كَذَلكَ		/ + فَقَطْ	SUBJ. +	لَنْ
كدرتك			NOM. SENTENCE	لَيْسَ

e.g.

"He was **not only** a university teacher and educationalist **but also** a critic and a writer."

"This will **not only** be a failure of our policy **but** it will **also** dash our hopes of an independent country."

"It is **not just** a mistake ethically, **but also** – and above all else – unproductive." نَيْسَت خاطِئةً اِخْلاقِيّاً فَحَسْبُ بَلْ هِيَ، قَبْلَ كُلِّ شَيْء، غَيْرُ مُشْمِرَةٍ

Not to mention ...

This construction which is synonymous with 'let alone' or 'to say nothing of' is translated in Arabic by: ناهِيكَ عَنْ/مِن or بِغَضْ النَّظْرِ عَن ,فَضْلاً عَن .e.g.

"The Ministry cannot pay the pensioners, not to mention/let alone the unemployed."

"Five basic documents were submitted during the session, **not to mention** the interventions by the members of the Conference."

In Media Arabic, فَضَارٌ عَن can be followed by the complementizer أن e.g.

'Not to mention that the current situation in Iraq is transitory and isolated.'

NOTE: فَاللَّهُ وَ can also denote 'besides, furthermore'. e.g.

'Besides, he acquired significant in-depth expertise in this field.'

Number/figure/digit/numeral

Number refers to a quantity, as well as the symbol used to represent it, whereas digit and figure tend to denote only the latter, for which numeral is also used. In Arabic, is used for quantities, series, etc. with رَاوْقَامٌ (pl. وَأَوْقَامٌ) for the figure. e.g.

"The book didn't arrive because it was sent to the wrong PO Box number."

"She called him on the new (telephone) number."

"After the collision, the supervisor called all boats in, except for number five."

"You have to write the numbers in digits."

"Arabic numerals/digits go back to Indian numerals/digits."

"The swimming pool is in the shape of the figure nine."

NOTE: when it involves a series of a newspaper, magazine, etc., Arabic uses, which should be translated as **issue** in English. e.g.

"The article on the French expedition in Egypt was published in the eighth issue of the journal."

When used to denote an unspecified quantity, in the meaning of 'several', a number of is rendered in Arabic by عَدُّ مِن (never with the definite article!) or عِدْ مِن , which is used in apposition. e.g.

"The police arrested a number of/several thieves."

Note that the verb is in the plural in English:

"A number of workers are demonstrating in front of the company."

When there is reference to a specified group of items, the English construction involves the use of the definite article – the number(s) of –, whereas in Arabic the noun is used, in a genitive construction (اضافة). e.g.

"This Act is aimed at reducing the number(s) of youngsters not in employment."

Obligation

In English, this is expressed through a variety of verbs: must, have to, ought to, should. These can be classified according to degree and type of obligation. In terms of the former, the hierarchy is, in descending order of intensity, i.e. from strong (must – have to) to medium (should) and weak (ought to).

In addition, **must** and **have to** express different types of obligation, with the latter being used when it is imposed from without (external), and the former if it is by the speaker him/herself (internal): e.g. 'You have to lock the car doors' (because it's not a safe neighbourhood) vs 'I must remember to buy my mother a card for her birthday' (nobody is telling me to do this).

In Arabic, there is a similar set of distinctions, expressed through verbs, prepositions and adverbial constructions expressing necessity.

In order to express a strong obligaton (must, have to) the following can be used:

SUBJ.			يَجِبُ
+ أَنْ			يَتَحَتَّمُ
		عَلَيْهِ	یَتَعَیّْنُ ('it is incumbent) upon someone to ')
			يَتُوَجَّبُ ('it is necessary to…')
VN/نُأْ			منَ الواجِبِ ('it is a duty to')
VIN/O			مِنَ اللازِمِ
	عَنْ	لْهُ	لا مَنْدُوحَة ('it is imperative')
	٠	له ل	لا بُدَّ ('it is inescapable')
VN/نْأ	مِنْ		لَا مَفَرَّ ('it is inescapable')
		منه	لا مَناصَ ('it is unavoidable')

e.g.

"The curricula have to be designed with the children' ages in mind." يَجِبُ أَنْ تُوضَعَ الْمَناهِجُ ۖ الدِّراسِيَّةُ مع مُراعاةٍ عُمْرِ الأَطْفالِ

"The state which ratifies the agreement has to/must enforce it." يَتَحَتَّمُ عَلَى الدَّوْلَةِ الَّتِي تُصَدَّقُ عَلَى الاِتَّفاقِيَّةٍ أَنْ تُنَفِّذَها

"Turkey will have to/must achieve more tangible progress in order to accede to the European Union."

سَيَتَعَيَّنُ عَلَى تُرْكِيا أَنْ تُحَقِّقَ مَزِيداً مِنَ التَطَوُّرِ المَلْمُوسِ حَتَّى تَنْضَمَّ إِلَى الإِتِّحادِ الأُورُوبيِّ "What are the measures that **have to** be taken to avoid the crisis from spilling over into Lebanon?"

"Every journalist has to/must follow his conscience."

"Workers in this field have to/must broaden the concept of critical experiment."

"At the same time we have to/must realize that progress lies in creativity and technology."

"There **must** be a proper reading of the charter in order to reveal the real aims of the parties concerned."

"We also have to/must recognize that this development is dangerous for our defensive capability."

"Sometimes, we have to/must take decisions like these which are difficult for all of us."

In English, advisability is generally expressed by should and ought to, which may be rendered by (in descending order of obligation):

```
مِنَ الضَّرُورِيِّ أَنْ ('it is necessary that ...') مِنَ الضَّرُورِيِّ أَنْ ('it is desirable ...') يَتَبُغِي أَنْ ('it is advisable ...') يُسْتَحْسَنُ أَنْ ('it is proper, appropriate ...') يَجْدُرُ (بِهِ) + مصدر e.g.
```

"There should/ought to be a truly effective monitoring system."

"The committee should widen its scope."

"If these symptoms recur frequently, even after resting, you **should** seek the advice of your physician."

"People **should** take a good look at this historic period and ask themselves: 'Is this our future?'"

"Perhaps, that question should be put to him."

Occasionally, weak obligation can also be translated by مِنَ الأَحْسَنِ: e.g.

"I ought to think of this."

In addition to should and ought to, advisability is also rendered by had better, which, however, often has threatening undertones. In Arabic, this is often translated by e.g.

"The government had better approve the budget in order to avoid another crisis." يَتَعَيِّنُ عَلَى الْحُكُومة أَنْ يُوافقَ عَلَى الْمِزانية حَتِي تَتَمَكَّنَ جَّنُّب أَزْمةً جَديدةً

When **should** and **ought to** denote **expectation**, they can be used interchangeably with 'be **supposed to + INF**', which is best rendered in Arabic by + مِن الْفَتْرُ صُ أَنْ or يُعْتِرُ مُن can also be used in cases where the expectation is close to an obligation: e.g.

"An army of occupation is supposed to protect the lives of the people it has occupied."

يُفْتَرَضُ أَنْ تُوَمِّنَ قُوَّاتُ الإحْتِلال حَياةَ الشَّعْبِ الَّذِي إحْتَلتْها

"The Supreme Court is supposed to hand down its decision in mid-June."

"We don't know what we're supposed to do."

Should/ought to have + PART. is translated as كَانَ يَتُبْغِي أَنْ when it involves past expectation and as كَانَ مِن الواجِب عَلَيهِ أَنْ when it involves past obligation. e.g.

"The exam should have started at 8 am."

"The UN stressed that the government should not have accepted this situation."

"She **should have** asked herself: 'How are we going to work together in order to achieve our common goals."

Negative prohibition is rendered by mustn't, which is expressed in Arabic by المجبُّ الا

"You mustn't (/shouldn't) forget to move the furniture." [= You must remember to move the furniture.]

☞ NOTE

• The use of **needn't** to express **lack of necessity**, which can be translated into Arabic by the following:

"We needn't (/don't have to) attend the next meeting."

• The use of must be (have been in the past) to denote a degree of certainty:

e.g.

"The teacher must be in his office by this time."

"The teacher **must have been** in his office." [= It is very likely that he was in his office.]

☞ NOTE the following correspondences:

mustn't: يَجِبُ أَلا

needn't: لا يَجِبُ أَنْ

e.g.

"We mustn't (/shouldn't) forget to move the furniture."

"We needn't (/don't have to) stop feeling sorry for the victims of the attack."

لا حاجَة أَنْ يَتَوَقَّفَ تَعاطُفُنا مَعَ ضَحايا الهُجُوم

(صِيغَةُ المجُهُولِ) The passive

In terms of form, the Arabic passive distinguishes itself from its English counterpart by the number of possible constructions. The English passive voice is expressed by an auxiliary verb added to the past participle of a transitive verb. e.g. 'is eaten', 'will have been done'. Arabic, on the other hand, can render the passive by means of:

1. **Inflection:** most verb forms have a passive voice, but some do not (VII and IX), whereas others (V, VI) are extremely rare. e.g.

"Several guards were killed near the presidential palace."

"They were goaded to accept the agreement before the arrival of the delegation." حُرِّضُوا عَلَى قَبُول الاتَّفاقِيَّة قَبْلَ وُصول الوَفْد

"Experts were surprised that the percentage of people living in the countryside in Egypt amounted to 75 per cent."

"The teacher was invited to give private classes to the children."

2. Form I verbs that have inherent passive meaning. e.g.

"The report will be published to commemorate the liberation of the country."
سَيَصْدُرُ التَّقْرِيرُ بِمُناسَبَة ذِكْرَى تَّخْرِيرِ البِلادِ

3. derived verb forms that have inherent passive meaning (V, VII, VIII, IX). e.g.

"The remainder of the seats was distributed among the small parties."

"The student got upset when he saw the principal at the club."

"The agreement was concluded in Tunis."

"Multinational forces are spread all over the province."

"Faces were turned red, and heads bowed in shame."

4. an **auxiliary** (رَّحُ ,جَرَى), the so-called 'periphrastic' passive, which is a popular device in some types of Media Arabic. e.g.

"The goals of this strategy are being investigated."

"The final touches are being put to the 15,000 housing units."

Unlike the English passive voice, in which the agent or doer (the one performing the action) may be mentioned, the rules of Arabic grammar preclude this, though an exception is made for instruments, which are then introduced by the preposition *e.g.

"The letter was written with invisible ink."

In modern Media Arabic, it is not uncommon to find the agent expressed, in which case it is introduced by preposition or adverbials such as مُنْ فَرُفُ ('on the part of'), ('on behalf/the part of'). Despite its common occurrence, it is not considered normative usage and is frowned upon by careful users of Arabic. e.g.

"The debts were cancelled by the central banks."

"The truce was broken by the government."

"The three rebels were killed at the airport by the special anti-terrorist unit."

"He visited the American embassy there, and was received by one of the officials who welcomed the delegations."

☞ NOTE that the object of action is the SUBJECT of the verb and is thus takes the **nominative** case.

With **ditransitive** verbs, i.e. those that take two objects (as opposed to a verb and a preposition), the passive construction turns one of them into the (dummy) subject, whereas the other becomes the object and is thus marked in the accusative case. e.g.

"This kind of talk is considered an abominable insult in the Arab world."

"The general was given a present."

"The child was named Hind."

With **indirect transitive** verbs, the indirect object is maintained and no subject is expressed; as a result, the verb always remains in the third person masculine form. e.g.

"The criminals were convicted."

This peculiar feature also extends to the participle. e.g.

"the convicted criminals." المُجْرِمُونَ المَحْكُومُ عَلَيْهِم

In some instances, an Arabic passive must be translated by an **active** verb in English. e.g.

"He died two days ago." تُوُفِّيَ قَبْلَ يَوْمَيْنِ

In many cases the Arabic passive has **potential** meaning and is therefore often translated into English by an adjective ending '-able/ible'. This applies to both passive participles and finite verbs (most notably with a negative). e.g.

'audible' مَسْمُوع' audible' مَسْمُوع' ('drinkables'), 'beverages' مَسْرُوبات 'لا يُصْبَرُ عَلَيْه 'unbearable' يُعاشَرُ عَلَيْه 'unsociable' لا يُسْتَغْنَى عَنْهُ 'indispensable' لا يُسْتَغْنَى عَنْهُ 'innumerable'

respectable' مُحْتَرَمُ 'novable' مُحْتَرَمُ 'movable' الأَنْسَى 'undrinkable' الأَنْسَى 'unforgettable' الأَنْدَ حَضُّ 'countless' الأَنْعَدُ

The past (الماضي)

The past is essentially expressed in Arabic by the perfect (الماضي) tense (either with or without the addition of كان), while English has six past tenses: the simple past is used to denote a definite point in the past, or a past state; the present perfect reflects a period that started in the past and leading up to the present time; the past perfect denotes a past event taking place before another one in the past. The action in each of these can be stressed by the progressive aspect.

The Arabic-English correspondences may be presented as follows:

he did (Simple Past)	بر	definite point in the past
he has done (Present Perfect)	423.	period that started in the past and leads up to the present he had done (Past Perfect)
he has been doing (Present Perfect Progressive)		
he had been doing (Past Perfect Progressive)	NEX	event taking place before another one in the past
he was doing (Past Progressive)	ц	
he has been doing (Present	щ	stress on activity
Perfect Progressive)	XX.	

For the translator, the following points merit attention:

i. the **present perfect** and **present perfect progressive** can be expressed by means of the imperfect (indicative), especially with the particle is and a time adverbial, which denotes a period of time starting in the past and leading up to the present. e.g.

"I have been saying to him for a long time that he needs to study harder (be diligent in his studies)."

The present perfect progressive is also often translated in Arabic by means of (also see 'KEEP ON ...'). e.g.

"The declaration has been awaited for two weeks."

"This issue has been causing division and controversy since the foundation of the organization."

"He has been a revolutionary for forty years."

is also translated by a **present perfect** when it appears in a nominal sentence, often with an active participle. e.g.

"There has been much interest in voting in the elections since early morning."

"The picture has been clear to us for more than two months."

ii. کانَ يَفْعَلُ is translated as 'used to'. e.g.

"During his university days, he used to write comedies."

iii. The past progressive can also be translated by of and an active participle. e.g.

"He was coming from Alexandria, carrying a heavy suitcase."

iv. The past progressive often denotes simultaneity. e.g.

"He was lying when he said that he agreed to the request."

"The tank was destroying the centre of the town while two aircraft were circling over the suburbs."

"There is no doubt that the directors **knew** the predicament brought about by this type of production."

"He **realized** from the start that this operation was both unjust and tyrannical." كَانَ يُدُرِكُ مُنْذُ البِدايَةِ أَنَّ العَمَلِيَّةَ جائرة وَ وَطَالِمَةٌ

- v. The Arabic perfect sometimes has to be translated by a **simple present** in English:
- a. in certain conditional constructions (q.v.);
- b. In the case of verbs expressing a state. e.g.

c. With verbs expressing a desire, wish or decision (resultative). e.g.

vi. The Arabic perfect is translated by a **subjunctive (q.v.)** in English in certain wishing formulae. e.g.

vii. The **past perfect** can also be expressed by a periphrastic construction involving (نَا سَعَا أَنَّ) ('it preceded'), followed by a perfect tense. e.g.

"We had put forward the principal goals of the strategy in the previous article."

"The president referred to the fact that he had demanded that the Arabic summit be held at specific times every year."

- viii. The particles if and iff are often used with the past tense to denote aspectual differences and are rendered either by a simple past or a present perfect:
- a. near past. e.g.

"I saw her (only) fifteen minutes ago."

b. to stress the **completed** nature of the action, in which case one would often add the word 'indeed'. e.g.

"Egypt (has) (indeed) achieved a great victory in the African Nations Cup this year."

"The new law indeed came into effect yesterday."

Prefixes

The translation of prefixes – as well as suffixes (q.v.) – constitutes a particular problem in English to Arabic translation, rather than the other way around. Indeed, though Arabic has prefixes, infixes (elements added within the word stem) and suffixes, these are derivational and inflectional morphemes, which are limited in number. Consider the following examples (the affixes are in bold):

```
(clitic denoting place) + عَمِلَ ('to work') à 'place where work is carried out' à factory;
```

(clitic denoting instrument) + خفار ('to open') à 'tool for opening' à key.

English does not have infixes (elements added within the word stem), while many of the affixes are of foreign origin, especially Latin and Greek, that are not always easily identifiable and/or translatable. There are many cases where the affixation process is a mere historical fact, such as 'diagnosis' (> Gr. dia, 'through' and gnosis, 'knowledge'), which is no longer considered an affixated compound since neither of its two constituent components has survived as an independent morpheme in English. The Arabic translation, is a wholly native construct, devoid of affixes. This example shows that the translation of prefixes is not merely a question of morpheme-formorpheme rendition of the SL terms.

The translator should also be mindful of those cases where the same cluster is not, or ever has been, an affix, but is, rather, part of the root of the word. For instance, in 'epistle' (رسالة) the 'epi-' is not an added morpheme, whereas it is one in a word like 'epicentre'.

One may identify several possible methods of translation of English prefixated compounds into Arabic:

- 1. as a simple word e.g. 'to recreate' عَدَّدُ
- genitive construction (إضافة)
 e.g. 'overproduction', إفْراط (فرط) الإنْتَاج,
- prepositional phrase;
 e.g. 'subterranean', مَا سُطْح الأَرْضِ 'supernatural' فَوْقَ الطَّبِيعَةِ,
- 4. noun phrase (Adjective + Noun)

e.g. 'low-born', وَضِيعُ النَّسَبِ

- 5. compound:e.g. 'decentralization', المَرْكَزِيَّة,
- 6. noun phrase: noun + preposition + DEF noun e.g. 'subspecies', فَرْعَ مِن الْفَرْع, 'subspecies'

Generally speaking, most English prefixes are not rendered as clitics in Arabic, which is syntactically averse to compounding of this type, and instead prefers a genitive construction. A rule of thumb is that for recent coinings, there is a higher probability of the prefix being rendered by a separate morpheme in Arabic, than in words that are only etymologically affixated compounds, as in the case of 'eulogy'. In other words, if the prefix identifiably carries independent meaning, it is more likely that the Arabic translation will be a construct phrase (اضافة).

Several English prefixes may be rendered by the same Arabic term. e.g. 'contra-', 'counter-', 'anti-' all tend to be rendered by the noun (in preference to ()).).

The following table lists the principal ways to translate some common English prefixes:

	Variants	meaning	translation	cxample	translation
a-	,	privation	Y	'apolitical'	لا مرسيامري
anti-		against	مُضادً	'antibiotics'	ممضاذ خيوي
			خِيدادُ	'antisocial'	ضِدَّ النَّظَامِ الإِجْتِماعِيَ

	Variants	meaning	translation	cxample	translation
			ヹ	'undoubtedly'	پلارټې
			مِسْحَيُّ اد	'unfortunate'	سَيُّ وَ الْحَظَّ
			دون	'unlicensed'	دُونَ رُخْصَةٍ
-jun	,	single	وجيد	'uni-axial'	فرجيل الميخؤر
			أحادي	'unicellular'	اُحادِي اكْلِيْد
vice	k.	deputy	نائب	'vice-president'	نائب الرئيس

The main prefix-related issue in English is spelling inasmuch as prefixes are variously written together with the base, or with hyphenation:

e.g. 'nonsense', 'non-stop'.

☞ NOTE:

- 1. Generally speaking, the more established the affixated word, the more likely it is that the prefix is attached to the base;
- 2. When the prefix ends in a vowel and the base starts with a vowel, a hyphen tends to be used in order to avoid ambiguity. e.g. 'preeminence' (rather than *preeminence).

The present (الحاضر)

The main present tense in English is the **Simple Present**, which is used in order to denote:

• a state. e.g.

a general truth. e.g.

• an action taking place in he present, especially with non-action (stative) verbs. e.g.

"I need a car now." أُختاجُ إلى سَيَّارةُ الآنَ

• An habitual action. e.g.

"She **drinks** tea every day." . مَشْرَبُ شاياً كُلُ يَوْم.

"Ahmad always eats dinner at home."

The above examples reveal that the English **simple present** is generally rendered in Arabic by the imperfect or, in the case of a sentence containing the verb 'to be', by means of a nominal sentence.

The Present Progressive (also known as present continuous) denotes actions that are taking place at the moment of speaking or those that are considered to be temporary (e.g. 'You're smoking a lot'). It cannot be used with stative verbs. For instance, a sentence such as 'I'm owning a car' is grammatically incorrect. The present

progressive is translated either by the imperfect or an active participle (with intransitive verbs), or VN + 4 e.g.

"We are watching television so we can't go to the shop."

"I am coming/on my way."

أنا قَادمٌ

"The company is (currently) producing pens in its new plant."

"The opposition are organizing unprecedented demonstrations against the government."

"I leave/am leaving for London tomorrow."

The imperfect is **negated** by means of y. e.g.

"He is not writing/does not write."

The present progressive construction involving the active participle is negated by means of e.g.

"I am not travelling today

ت NOTE: Arabic-speakers should take care that the English present progressive is usually not used with 'to have' when it involves possession or an illness, in which case the present simple should be used: e.g. 'I have a headache' (عَدْدَى صُداعً),

NOT *'I am having a headache'; 'I have a car' (عَنْدِي سَيَّارةً), NOT *'I'm having a car'.

Presently/at present

Presently means 'in a short while' while at present means 'now'. The former may be translated in Arabic by عَنْ/بَعْد قَلِيل عَمَّا/عَنْ/مِنْ قَرِيب which are used with the imperfect, either with or without عَنْ/بَعْد قَلِيل عَمَّا/عَنْ/مِنْ قَرِيب. The latter is typically rendered by في الوَقْتِ الحَاضِر or الآن e.g.

"We will have a solution presently."

"I'll go to school presently."

"She is leaving at present."

"At present, the Israeli army is among the most powerful, best-trained and most advanced armies in the Middle East."

Price/prize

A 'price' is the amount of money one pays for something (رَالْمَانُ, إِلَّمَانُ, pl. رَالْمَانُ, pl. (prize' is something one wins in a competition, etc. (جَوالزُ اور جائزُ). (Price' collocates with the verbs 'to pay' (عَنَى (a)) and in Arabic also with 'to cost' عَلَقَ (a) whereas in English 'to cost' is used without the noun 'price'. 'Prize' collocates with 'to award' (عَسَلُ), 'to win' (اَحْرَرْ حَارُ (مِحَارُ (مَا (مَعَارُ (مَا مَعَارُ مِحَارُ (مِحَارُ (مِحَارُ (مَا مَعَارُ (مَا مَعَارُ مَعَارُ (مَعَارُ (مَا مَعَارُ (مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ مَرَامُ (مَا مَعَارُ (مَعَارُ (مَا مَعَارُ مَا مَعَارُ (مَا مَعَارُ مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ (مَا مَعَارُ مَا مَعَارُ (مَا مَعَارُ مَا مَعَارُ (مَا مَعَارُ مَا مَعَارُ مَا مَعَارُ مَا مَعَارُ مَا مَعَارُ (مَا مَعَارُ مَا مَعَارُ مَعَارُ مَا مَعَارُ مَعَارُ مَا مَعَارُ مَا مَعَارُ مَا مَعَارُ مَا مَعَارُ مَعَارُ مَعَارُ مَعَارُ مَا مَعَارُ مَعَارُ

"He won/received the Nobel Prize for chemistry."

"No matter how much it cost."

"She paid the asking price."

• NOTE: in the context of the stock exchange, بغن is used in preference to فقن e.g.

"Share prices have continued to rise at the stock exchange."

Principal/principle

Principal as a noun denotes the person in charge of a school (US), college, etc. (مُدِيرُ وَنَ، مُدَرِكُ، pl. مُدِيرُ); as an adjective, it is synonymous with 'chief', 'most important' (رئيسيّ). Principle, on the other hand, can only act as a noun, meaning something on which one bases one's beliefs or actions (مَبَادِئُ وَالْمَ اللّٰهِ اللّٰهُ اللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ اللّٰهِ اللّٰهِ اللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰهِ الللّٰ

"The **principal** opposition parties decided on a plan to put forward two joint nominees."

"There was an agreement on the principle of withdrawal."

Punctuation (عَلاماتُ تَنْقِيطِ)

In English, punctuation marks are extensively used to help convey meaning and grammatical function, and are, therefore, subject to a number of restrictions. In Arabic, on the other hand, Western-style punctuation is essentially a 20th-century invention, though some examples can already be found in the latter quarter of the 19th century.

In contemporary Arabic, punctuation is patterned on Western, especially English, principles, albeit with some permutations. The most striking observation with regard to punctuation in contemporary Standard Arabic is, however, its inconsistency, which at times borders on the chaotic as a result of idiosyncratic variations. Among the points that are relevant to the translator, one may mention:

• quotation marks (inverted commas, quotes; علامات افتاس) :in addition to enclosing the words quoted from someone else, these marks are used to enclose citation forms of words. In English, they tend to be represented by single or double inverted commas (''/"").

In Arabic, on the other hand, they are also used for emphasis, to enclose foreign proper nouns such as the names of companies (though not for cities, countries, etc.) or dialectal borrowings, where English would typically use italics, or nothing at all.

The form varies, ranging from angular double quotes of the type used in French («/»), to double English inverted commas, though the latter are increasingly rarely used for typographical reasons, i.e. the possible confusion with $tanw\bar{\imath}n$. e.g.

According to the CEO of Exxon Mobil the price of oil will have to be between 60 and 70 dollars per barrel.

Another member of the revolutionary army said: "We are ready to fight."

"There are two worlds: us/Us and them/Them."

You are accused of stealing a 'gas stove'.

"The wife that had been beaten entered and tripped on her long black malas."

"The deputy in turn announced the support of al-Sha'bi to al-Watani's interpellation and the participation by one of the members of the new bloc that support it."

The head of the security services blamed the media for the breakdown insecurity: "the Media inform people that there is a total absence of security, which encourages many to commit crimes."

- round brackets (فوسان): these are, confusingly, also used as quotation marks in Arabic for citations, even if the practice is these days restricted to religious references (especially Qur'anic). This usage also explains the expression 'between brackets', which is actually equivalent to the English 'between quotation marks/inverted commas'. In present-day formal Arabic, round brackets are predominantly used for:
 - (1) foreign proper nouns;
 - (2) foreign borrowings;
 - (3) titles of books, films, etc.;
 - (4) (foreign) abbreviations;
 - (5) parentheses, providing additional information, explanatory NOTEs, etc.

In translation, they are rendered as follows:

Arabic	English
foreign proper nouns	Omitted
foreign borrowings	Italics

titles of books, films, etc.	Omitted
(foreign) abbreviations	Omitted
parentheses	=

e.g.

And the Almighty said: "We have created all living things out of water."

"We spoke with the actress during the shooting of the soap Nur Maryam."

"The Rec.Sport.Soccer Statistics Foundation (RSSSF), which belongs to the International Football Federation (FIFA), was set up in 1994."

"We only managed to eradicate 71% of illiteracy at the end of 2010, whereas it was 40% in1980 and 25% in 1960, and probably even less in 1952."

• Exclamation (عَلامةُ النَّهُ) and question marks (عَلامةُ النَّهُ) according to English usage, these should not be used together, or only sparingly in cases where there is a genuine question and outcry. In Arabic, however, one finds that authors tend to correlate the intensity of the utterance with the number of punctuation marks. In translation, these must be reduced. e.g.

"Who is responsible, the police or the demonstrators?" مَنْ المَسْتُولُ: الشُّرْطة أَمْ المُتَظاهِرِونَ؟!

• Suspension points (ellipsis): consisting of three dots, these should be used only in literature in English to indicate a pause in speech or an unfinished thought. It should not be used as a replacement of 'etc.' ('and so on') at the end of a list. In contemporary Arabic, on the other hand, both form (number of dots) and usage differ dramatically in that they seem to be used at the end of lists or for emphasis, or, occasionally, even added to other punctuation marks (!). In English translation, the Arabic suspension points are generally omitted or replaced by another punctuation mark (typically a comma), except in cases where they comply with English usage. e.g.

"And so, at specific times, when I suffer these breakdowns, I stay in bed for a whole day."

"The reformers know what they want, whereas we..."

"Yes?"

نعم ؟!

Relative pronouns

The differences in usage and forms of relative pronouns in English and Arabic pose a number of problems in translation.

Essentially, a relative pronoun provides additional information about a noun (or a clause). In the case of a **defining relative clause** it involves essential information without which the sentence would not be clear. In English, the choice of relative pronoun is determined by

- (1) whether it refers to a place, human(s) or non-human(s);
- (2) the type of information it contains regarding the **antecedent** (the part of the sentence to which it refers);
- (3) the grammatical function of the relative pronoun in the clause;
- (4) the presence of a preposition.

This may be represented as follows:

	Subject	Object	Possessive	Prepositional Phrase (PP)
Human(s)	who/ that	whom/ who/that	whose	PREP+whom
Non- human(s)	which/ that	which/ that	whose	PREP+which
Place	where			

Consider, for instance, the following sentence:

"I saw the man, who was in the park, sitting outside the house."

In this case, the **who** refers to a person ('man') and is the **subject** of the relative clause, which provides additional – but non-vital – information. This type of clause is commonly known as a **non-defining** or **non-restrictive** clause and can be easily identified because:

- i. omitting it still yields a grammatically correct and semantically sound construction ('I saw the man parked outside the house.');
- ii. of the presence of commas.

Conversely, in 'The car that/which I saw in the park' the relative clause provides essential information, and is therefore known as defining or restrictive. Note that in this case, there is no comma, while the relative pronoun may be omitted. e.g.

"The man [person] who/that/NO PRON [= subject] was there." الرَّ جُلُ الَّذي كانَ هُناكَ "The man [person] whom/who/NO PRON [= object] we saw." الرَّجُلُ الَّذِي رَأَيْناهُ "The dog [non-person] which/that/NO PRON [= subject] is here." الكَلْبُ الَّذي هُنا "The dog [non-person] which/that/NO PRON [= object] we saw."

الْكُلْبُ الَّذي رَأَيْناهُ

"The man whose dog [possession] I saw." الرَّجُلُ الَّذِي رَأَيْتُ كَلْبَهُ

"The man in whose house [PP] I lived."

"The dog whose paw [possession] was hurt."

"The man to whom [OBJECT] I gave the book."

"The dog with which [PP] she came in."

Arabic, on the other hand, does not make a distinction in terms of (non-) humanness of the antecedent.

The basic distinction in Arabic relative clauses is based on whether the antecedent is grammatically definite or indefinite. Relative pronouns are used only for definite antecedents.

	Masculine	Feminine
Singular	الَّذِي	الَّتِي
Dual	الْلُتان	اللَّتانِ
	اللَّذَيْنِ	الْلَّتَيْنِ
Plural	الَّذِينِ	اللاتِي، اللَّواتِي

There are two further differences between Arabic and English relative clauses in that Arabic has:

i. pronouns denoting the dual. e.g.

"The two men **who** are in the hotel." الرَّجُلان اللَّذانِ في الفُنْدُق

"The two girls **who** are in the hotel." البِنْتانِ اللَّتانِ في الفُنْدُق

"I saw the two men **who** are in the hotel." رِزَأَيْتُ الرَّجُلَيْنِ اللَّذَيْنِ في الفُنْدُق

"I saw the two girls **who** are in the hotel." رِزَأَيْتُ اللِّنَيْنِ فِي الْفُنْدُق

ii. pronouns denoting the plural. e.g.

"The men who were in the house." الرِّ جالُ الَّذِينَ كَانُوا فِي البَيْتِ

"The two girls who are in the hotel." البّناتُ اللاّتي/اللّواتي في الفُنْدُق iii. the need for a so-called **resumptive pronoun** (known as عائد), which is necessary when the antecedent is the **object** of a **verb** or a **preposition**. e.g.

"I forgot the suitcase in the hotel (that) we are staying at." نَسِيتُ الْحَقِيبَةَ فِي الْفُنْدُقِ الَّذِي نُقِيمُ فيه

The use of the resumptive pronoun also explains why Arabic speakers often make the mistake of adding a pronoun in English relative clauses. e.g. *'This was the house that I lived in it", rather than, simply, 'This was the house that I lived in.'

When the reference is to a place, English uses where (or in which) and Arabic e.g.

"The prison where the dissidents were held."

▼ NOTE that ♣ has a fixed case ending.

Another area of possible pitfalls is that of **indefinite relative clauses.** English does not make a distinction when it comes to relative pronouns between an antecedent that is definite or not. e.g. 'the/a man who was there.' In Arabic, however, an antecedent that is grammatically **indefinite** does **NOT** take a relative pronoun. e.g.

"A man **who** was there." رَجُلٌ كَانَ هُناكَ

"A man that we saw there."

رَجُلٌ رَأَيْناهُ هُناكَ

Non-specific relative pronouns are those that do not have a specified antecedent:

Whichever(أُقِّ); whatsoever (أُقِّ/ما/ماذا/مَهْما); whoever/whosoever (مَنْ).

e.g.

"Sports strengthen your bones, whatever your age/no matter how old you are."

الرِّياضةُ تُقَوِّي عِظامَكَ أَيًّا كَانَ عُمْرُكَ

"Whoever said that is a liar."

مَنْ قالَ هذا فَهُوَ كَذَّاب

"Take whichever books you like, it's going to be a long flight."

"Whichever option you choose, it's still going to be difficult to win the contest." اَيًّا كَانَ اختيارٌكَ ، فسَيظَلٌ الفَوْزُ في المُسابَقةِ صَعْباً

Rise/raise

To rise is 'to go up' (ازهنی), whereas to raise means 'to make something go up' (عنی). An increase in salary is called a rise or a raise (!). e.g.

"The prices rose last week."

"The government raised prices last week."

Say/tell

In English, **say** is a transitive verb which does not have a personal object; **tell** is a transitive verb which is usually followed by a personal direct object. In Arabic, **say** is generally rendered by (قَالُ (+ إِنْ), tell by, for instance, عَكُى, عَدُّتُ مِحَدُّتُ أَخْرَ, حَدُّتُ أَخْرَ, و.g.

"I said that I was unhappy."

"He only said a few words to me."

"He was telling me what (had) happened to his family during the war."

"She tells us many stories about her childhood."

☞ NOTE: only say can be followed by a 'that'-clause in English: e.g.

"She said (NOT *told) that he was going home."

Self

In order to express reflexivity, English uses **self**, which is added to a pronoun. e.g. *myself, yourself, herself* ... In Arabic, this is conveyed through the word المنافق (pl. النافة), which means 'soul, spirit'. However, when المنافقة is the first element in an المنافقة construction, denotes **same.** e.g.

"I can't imagine myself in a world without paper, pens and books."

"She told herself that she was being truthful."

"He was injecting himself."

"We deserve to do this for ourselves."

"Instead of criticizing others, you should take a look at yourselves!"

"Don't be stingy on yourselves (f.pl.)."

"They(, themselves,) elected themselves."

"Don't disturb yourself."

• the use of المنافق to render 'self' in expressions such as:

• the expression 'in itself', ', فاتِه, e.g.

"This crisis, in itself, is harmful to the national interest." هذه الأَزْمَةُ في حَدِّ ذاتِها إِضْرارٌ بِالْمَصالِحَ الوَطَنِيَّةِ

"The people are not against an amendment of the constitution, in itself, but rather to the character of the changes."

الشُّعْبُ لَيْسَ ضِدَّ تَعْدِيلِ الدُّسْتُورِ في ذاتِهِ وَإِنَّمَا ضِدَّ نَوْعِيَّةِ التَّغَيُّراتِ

Sensible/sensitive

Sensible denotes intelligence (حَصِيف ,حَكِيم) whereas **sensitive** (حَسُّاس) involves emotions. e.g.

"His father was a **sensible** man who realized the importance of education." كَانَ ٱبُوهُ رَجُلاً حَصِيفاً يَعْرِفُ أَهَمَّيَّةَ التَّعْلِيم

"One of the female colleagues asked this **sensitive** question which was causing her great concern."

"Jojoba oil is excellent for people with sensitive skins."

Shade/shadow

These words cannot be used interchangeably in English, as **shade** denotes a place out of the sun, while **shadow** is the shape cast by an object, person, etc. In Arabic, both are rendered by الطُول (والله). However, when it involves a living being (especially a person or animal), **shadow** may also be translated by مُشَوح , أَشْبَاح . (pl. مُشَوّع). e.g.

"I saw him sitting in the shade of a tree near his uncle's house."

"I noticed a **shadow** moving outside the bedroom."

"Women continue to live in the shadow of men."

"The long shadow of the bear appeared suddenly."

In figurative context, si can also be used. e.g.

"Diplomacy should take place in the light of day/out in the open, not in the shadows."

☞ NOTE the following expressions:

• NOUN (+ GEN)/PRON: 'under the auspices of'. e.g.

"The project was completed under the auspices/patronage of the UN." مَمَّ المَشْرُو عُ مَّعُتَ ظِلٌ الأَمِ التَّحِدة

BUT: في طل can also mean 'in (the) light of' (!) ('in view of', 'considering'). e.g.

"The pharmacists' union believed that an increase in the price of medicines was not justifiable, particularly **in light of** the difficult economic conditions that people are living in."

- · مُنْفُ طُلُهُ 'his authority faded/decreased/(was) diminished/ dwindled'
- · shadow cabinet' وزارةُ الطُّلِّ

Some/any

Some is used in affirmative sentences, any in interrogative and negative sentences. e.g.

"I saw **some** of the students."

"Did you see any of the students?"

"I didn't' see any of the students."

► NOTE: the English 'some' and 'some of' are translated identically in Arabic, without the use of the latter: e.g.

'some (of the) ministers'

As the above sentences show, Arabic uses the same word, i.e. the noun which can be the first term in an إضافة or added with a pronoun:

"I have seen **some of** them."

In Classical Arabic, نفض can also mean 'one of'. e.g.

"One of the princes/a certain prince said this."

Often, some/any are not translated in Arabic. e.g.

'I'll bring you some coffee in a minute':

This is especially the case with negative and interrogative 'there was/were' (see THERE IS/ARE ...) constructions. e.g.

"Were there any students in the museum?"

"There weren't any tourists in the church."

- For the reciprocal use of , see 'EACH OTHER/ONE ANOTHER'

The English non-specification construction with 'any' in the sense of 'whatever' is rendered into Arabic by the use of the verb which occurs in the PERFECT. e.g.

"The new British Foreign Minister is looking forward to working with the countries of the region in any capacity."

"The new methodology will be implemented in any way."

- NOTE: 'in any case', which is equivalent to 'anyway', is translated as عَلَى افي كُلُ حالٌ /أَحُوالِ e.g.

"In any case, fanaticism affects individuals in all societies and religions." في كُلّ حالِ التَّطَرُّفُ يُصِيبُ أَفْرادَ كُلّ المُجْتَمَعاتِ والأَدْيانِ

Sometime/sometimes

Sometimes means 'with intervals'; sometime means 'at one time'. e.g.

"He was a **sometime** professor at Harvard." (= at one point in his career, he was a professor at Harvard)

"He sometimes acted like a professor."

Note the following expressions, which all mean 'sometimes ... sometimes', 'at times ... at other times ...':

"Things are sometimes conscious, sometimes unconscious."

"Sometimes/at times she chides me, other times she turns to me for help."

"Sometimes, it was on the list of terrorist states, and other times it was on the list of renegade states."

"He belittled him, sometimes openly, sometimes indirectly."

"He tried to hold on to power sometimes by using the sects, and sometimes by using the national identity."

حاوَلَ أَنْ يَقْبَضَ عَلَى أَزِمَّةِ الأَمْرِ تَارَةً بِإِسْتِخْدَامِ الطُّوائف وَطَوْراً بِإِسْتِخْدَامِ الهُوِيَّةِ الوَطَنِيَّةِ

Still

This adverb can have widely varying meanings, depending on context and use:

• 'now, or in the future as in the past': ما زال /لا يَوَالُ /('to not cease be') which can be followed by an adjective, noun (in the accusative) or verb in the IMPERFECT. e.g.

"It was still difficult."

"The chairs are still used."

"She still loves me."

"I'm still looking for you."

• 'until now': حَتَّى/إلى الآنَ. e.g.

"I still don't know his name."

'yet': مَعَ أَنَّ /مَعَ ذَلِكَ e.g.

"The newspaper apologized about the mistakes in the article, but he still sued them."

(المضارع المنصوب) Subjunctive

This is a mood (like the indicative or imperative), which is used with certain verbs and phrases, mostly conveying commands, suggestions ... e.g.

to advise (that) It is best (that) to ask (that) It is crucial (that) to demand (that) It is essential (that) to insist (that) It is imperative (that) to propose (that) It is important (that) to recommend (that) It is recommended (that) to request (that) It is vital (that) to suggest (that) to urge (that)

In English, it has its own conjugation, which is the simple form of the verb, i.e. the INFINTIVE form without to for all persons. e.g.

"It is imperative that you be there."

"They demanded (that) the government release the leader of the party."

In very formal (British) English writing, the subjunctive form can also be constructed with **should** + **infinitive**. e.g.

"It is necessary that he (should) go home early."

Although Arabic also has something which is also referred to as **subjunctive**, it has little in common with its English counterpart, either in meaning or in form. The Arabic **subjunctive** is used in the following cases:

• After particles denoting **purpose**: دِرَكَيْ رِنكَيْ عِلَى which are translated by **in order to,** so that;

• With is to negate the future (q.v.). e.g.

"So that the international community takes its responsibilities."

"The time has come for the citizen to know and take part in making difficult decisions."

"What are the instruments that can be used in order to reach the required objective?"

• After the complementizer in which introduces subordinating clauses with verbs or phrases expressing desire, intention, need, etc. (see 'AN/'ANNA/...).

Suffixes

As Arabic does not have English-style derivational suffixes, their translation often poses problems, in that there is never a one-to-one correspondence...

The following are the usual methods employed in translating English suffixated compounds into Arabic:

- genitive construction (إضافة). e.g. 'presidency', مُدَّةُ الرِّناسة
- noun phrase e.g. 'infallible', مُنَرَّهٌ عَنْ الخَطا 'drinkable', قابِلٌ للشُّرْبِ

Terms of address

The way one addresses people, or refers to them, is often highly culturally determined. Arabic not only has a greater variety of terms and references of address, they are also used in many more contexts than in English, where they are clearly in a state of decline. For instance, in contemporary English, it is quite common to address someone by their first name within minutes of meeting them (or even before!). This kind of familiarity is considered disrespectful in Arabic, especially if there is a difference in status and/or age. Conversely, English-speakers are often thrown or even embarrassed by the eulogic flourishes that are part and parcel of Arabic social intercourse...

At the same time, things are not uniform across the Arabic-speaking and English-speaking worlds either! For instance, while in Egypt it is obligatory to have some honorific, adapted to the person's perceived status, Tunisian practice is much closer to that of the West (France).

In translation, the rendering of honorifics is based on a number of things, the most important of which is the **context** (e.g. formal/informal) in which they are used, the **social relationship** between the participants and the **pragmatic intent** of the utterance (i.e. what is the intendent result on the part of the speaker).

When translating from Arabic into English, the honorifics will generally have to be toned down, or omitted altogether. Conversely, when translating from English into Arabic, these markers of respect must be added, so the target phrase will be an amplified version of the original.

Let us take, for instance, the generic which may sometimes be rendered as 'sir'. In most cases, however, it should simply be toned down to 'you', though in formal contexts an equivalent politeness formula may be required. e.g.

"She asked: are you a Copt?"

"What is your name?" (e.g. a student to a fellow student)

"What is your name, please?" (e.g. a colleague one meets for the first time)

"Excuse me, sir, what is your name please?" (e.g. a hotel receptionist to a guest)

Honorifics may even contain titles, such as [(denoting someone who has been on the pilgrimage) or (teacher, professor), even if the person in question is not

associated with the activity. e.g.

"Hajj Mustafa came into the room."

"Excuse me sir, where is the entrance(, please)?"

Even where both languages employ an honorific, cultural usage must be observed; for instance, it is usual in Arabic to use a title with the **first name**, whereas in English this is reserved for the **last name**: for instance, the reference to someone called 'Dr Sarah Johnson' will differ in the two languages:

"Dr Johnson agreed on this matter." (NOT * 'Dr Sarah...')

Arabic also has a wide range of **honorific formulae**, especially with persons of note. e.g.

When translating this sentence in official documents, it should appear as 'His Majesty, Sultan Qaboos bin Said al-Muazzam – may God preserve him and watch over him – '; in all other cases, it should be rendered as 'His Majesty, King Qaboos (bin Said al-Muazzam)'. Similarly, خلالة الليك ... الفَدِّي should be translated as 'His Majesty the King', rather than 'His Majesty, the dearly beloved King'.

For deceased people, the name is always accompanied by رَحْمَةُ اللهُ عَلَيْهُ ('<May> the Mercy of God be upon him') or اللهُ حُومُ (ثله late'), with the former following the name and the latter preceding it. e.g. (رَحْمَةُ اللهُ عَلَيْه).

In English these are translated at the first mention and subsequently omitted. There are also many expressions that are added to the names of historical figures – especially religious authorities – held in great esteem, such as رَضَى اللهُ عَنْهُ ('May God be pleased with him'), which accompanies the mention of the first four caliphs, i.e. the Rightly-guided or Righteous ones (العُمَر بن الخَطَّاب). Abu Bakr (رَعُمَر بن الخَطَّاب) 'Umar Ibn al-Khattab (رعُمَر بن الخَطَّاب) ('Uthman Ibn Affan (عَلَى بن أَبِي طَالِب) and 'Ali Ibn Abi Talib (عَلَى بن أَبِي طَالِب).

In practice, these should simply be omitted in English translation. In the case of the Prophet Muhammad, however, the formula that is used when uttering his name, 'May God pray for him and grant him peace'), is increasingly rendered by 'Peace Be Upon Him', abbreviated to 'PBU': e.g. "The Prophet (PBU) ...".

This usage should, however, be restricted to Muslim texts as it remains a highly 'foreignizing' device, rendering a text unnecessarily exotic. And so, while one would recommend adding the formula in texts aimed specifically at a Muslim readership, it would not be appropriate in general media texts.

When it comes to **official titles** in formal documents, there are issues of protocol and etiquette, and the table below includes the correspondences between titles in common use in both languages:

His Majesty (the) Sultan	(حَضْرَةُ) صاحِب جلالة السلطان
His Majesty (the) King	(حَضْرَةً) صاحِب الجلالة المَلِك
His/Her Majesty	(حَضْرَةُ) صاحِب/ـة الجَلالة
His/Her Royal Highness	(حَضْرَةُ) صاحِب/ة السُمُو المُلَكِي
His Excellency the President	فَخامةُ الرَّئيس
His Excellency the Prime Minister	صاحِبُ السَّعادةِ رَئيسُ الوُزَراءَ
His Highness, Shaykh, the Minister for	سُمُو الشَّيْخ وَزِيرُ
His Excellency, Shaykh, the Minister for	(حَضْرَةً) مَعالَي الشَّيْخ وَزِيرُ
His Excellency, the Minister for	(حَضْرَةً) مَعالَي وَزِير
His Excellency, (the) Minister	(حَضْرَةً) مَعالَي الوَزِير
His Excellency, the Ambassador	سَعادةُ السَّفِيرِ
His Grace the Duke	سُمُو الدُّوق
His Eminence (Cardinal)	نِيافةُ (الحَبر) (كَرْدِنال)

His Grace (Bishop)	نِيافةُ (الحَبْرِ) (أُسْقُف)
Shaykh (Islamic scholars)	فَضِيلةُ الشَّيْخِ
Shaykh (high-ranking Islamic scholars, e.g. rector and shaykhs of al-Azhar)	صاحِبُ الفَضِيلةِ الشَّيْخ
His Eminence the Mufti	سَماحةُ الْمُفْتِي

```
مَّمُوهُ ، 'His Royal Highness';
معالِيه, 'His Excellency' (for Ministers );
معالِيه, 'His Majesty';
معادتُكُم, 'Your Excellency' (for an ambassador )
```

There is/are ...

In view of the absence of a copula ('to be') in Arabic, these phrases sometimes pose problems in translation, as they can be rendered in a number of ways, depending on whether it involves a present, past or future, or whether the location is specified or not.

1. Present

• In affirmative sentences in the present tense, there is/are is usually rendered by or هناك or هناك e.g.

"There is a school in the centre of town."

• In interrogative sentences, 'there is/are' is rendered by the particles and (q.v.). e.g.

"Are there books in the house?"

• In negative sentences, the verb is used. e.g.

"There is no wood in the cellar."

• In negative interrogative sentences, نَنِينَ is preceded by the particle † e.g.

"Are there no pencils in the library?"

• When the place is not specified, هناك/هنالك must be added. e.g.

"Is there a mistake?"

"Is there no coffee?"

☞ NOTE: the use in English of 'no' rather than 'not' in the above sentences.

2. Past

• In affirmative sentences, the verb کان is used. Remember that its subject noun (انسم کان) is in the **nominative**, but its predicate (انسم کان) in the **accusative**. e.g.

"There was a student in the classroom."

• In interrogative sentences, کان is preceded by مَل or ١ e.g.

"Were there any lecturers in the restaurant?"

• In negative sentences, the negative of كانّ i.e. كانّ is used as a translation of 'there has/have not been', and ? ما كان for 'there wasn't/there weren't'. e.g.

"There were no/have not been any newspapers in the waiting room."

• In **negative interrogative** sentences, المنكن is used, preceded by [e.g.

"Was there no lighter on the table?"

• When the place is not specified, (ما كانَ/ لَمْ يَكُنْ) كان followed by مناكَ/هُمَالِكُ must be added. e.g.

"There was bread and meat."

أَكَانَ هُناكَ/هُنالكَ مَحلاَّتٌ؟

"Were there any shops there?"

لَمْ يَكُنْ/ما كانَ هُناكَ/هُنالِكَ دُخانٌ

"There was no/has not been any smoke."

"Was there no/Wasn't there any snow?"

3. Future

• In **affirmative** sentences, the imperfect of the verb کان is used with the future particle ﴿ , i.e. سَیْکُونُ e.g.

"There will be room service at the hotel."

• In **negative** sentences, the negative future of ن يكون i.e. ن يكون is used as a translation of 'there will not be'. e.g.

"There will not be (any) money in the bank."

• In interrogative sentences, سيكون is preceded by 1. e.g.

"Will there be (any) chairs in the hall?"

In negative interrogative sentences, the نَنْ يَكُونَ is preceded by { e.g.

"Will there not be (any) safety belts in the airplane?"

• Whenever the place is not specified, هناك/هناك must be added. e.g.

"There will be drinks there."

"There will not be (any) NOTEbooks."

"Will there be a swimming pool?"

"Will there not be an information desk?"

• In cases where the place is 'there', is put at the end of the clause in Arabic, whereas in English 'there' must be repeated. e.g.

"Is there no coffee there?"

• In impersonal constructions, the noun of کان is the subject (not the object!), as a result of which it is put in the nominative since it is کان اِسْم rather than کار (predicate). Compare the following sentences:

رَكَانَ هِنَاكُ دَلُو ۖ فِي الْحَدِيقَةِ 'There was a bucket in the garden.' ,كَانَ دَلُواً فِي الْحَدِيقَةِ

☞ NOTE: in negative and interrogative sentences, it is often necessary to add 'any' in English.

Time

Arabic has a number of translations for the various meanings of the word 'time':

As an abstract: رَأَزْمان (pl. (أَزْمان) or تَوْقيت e.g.

"Time was one of the things that occupied people's minds."

"The poll revealed that 80% of respondents supported the abolition of summer time in the country."

"The new episode of the (soap) series will be shown at 10 a.m. Greenwich Mean Time/GMT on Friday."

• Reference to a specific point or period: رَأُوْقَات (pl. رَأُوْقَات) or, in the case of an appointed time, تَوْقِت, مِقَات (pl. مَوَاقِيتُ Note that in some cases the English plural has to be translated by a singular in Arabic, or vice versa! e.g.

"He came in at the same time."

"I told you what happened at that time."

"I hope you arrive at the hotel on time."

"There was an increase in the demand for hard currency at specific times, especially at the end of the year."

كانَت هُناكَ زِيادَةٌ في الطَّلَبِ عَلَى العُمْلاتِ الصَّعْبَةِ فِي بَعْضِ الأَوْقاتِ، خاصَّةٌ في نِهايةِ العَام

ازدادَ الطَّلَبُ عَلَى العُمْلاتِ الصَّعْبَةِ في بَعْضِ الأَوْقاتِ، خاصَّةٌ في نِهايةِ العامِ

"The mothers were talking most of the **time**, without giving the child the opportunity to participate in the discussion."

كَانَت الْأُمَّهَاتُ يَتَحَدَّثْنَ مُعَظَمَ الأَوْقاتِ دُونَ إِعْطاءِ الطَّفْلِ فُرْصَةً لِلمُشارَكَةِ في الخَدِيثِ

"The telephone guide provides a service for the prayer times."

دَلِيلِ التِّليفُونات يَشْتَملُ عَلَى خِدْمَةِ التَّعَرُّ فِ لأَوْقاتِ/مَواقِيت/مَواعِيد الصَّلاةِ

"The post office opening times during Ramadan are from 8 a.m. until 5 p.m."

مَواقِيتُ/أَوْقاتُ عَمَلِ مَكاتِب البَرِيدِ في شَهْر رَمضانِ مِنَ الثَّامِنةِ صَباحاً إِلَى الخامِسةِ مَساءً

"It didn't happen at a specific time."

لَمْ يَحْدُثُ في وَقْتٍ مُعَيَّنِ

ُدُهُور .pl عُصُور، أَعْصر، أَعْصار), دَهْر .pl عَصر (pl عَصر، أَعْصر، أَعْصر، أَعْصر، أَعْصر، أَعْصر، أَعْصر،

"There is a lot of crime in modern times/the present day."

يَشْهَدُ الْعَصْرُ الْحَدِيثُ حَوادِثَ إِجْرامِيَّةً كَثِيرةً

"In Islamic cities in mediaeval times/during the Middle Ages, it was customary for the judge to go out to look at the New Moon."

"She was a great film star in her time."

كَانَتْ نَحْمَةً سِنِمَائِيَّةً عَظِيمَةً في وَقْتِها

"He was respected by the people of the **time**/his contemporaries." كَانَ أَهْلُ زَمانِه يَحْتَرمونَهُ

"Ten years is not a long time in the history of a people."

"My professor explained the benefits of geological knowledge which has contributed to human progress and civilizational development since ancient times/since time immemorial."

"He was a minister in the time of Muhammad Ali Pasha."

• NOTE: is also used to denote a long period of time. e.g.

"He has lived in exile for a long time/for ages.".

is also used to translate the English 'tense' (in grammar). e.g.

"You have to study the present tense before the past in French."

A single occurrence or repetition of an event: 55. e.g.

"This time, I'll forgive him."

"Many times/on many occasions, the government stressed that it needed more time to study the package of proposals."

☞ NOTE the following expressions:

"What's the time?"

كُمْ السَّاعَةُ؟

```
"in the course of time"
عَلَى مَرِّ الزَّمانِ
"through the ages"
عِبْرً/ عَلَى مَرِّ العُصُورِ وَالدُّهُورِ
"it's time to go"
حانَ وَقْتُ الذَّهاب
"we had a good time."
قَضَيْنا وَقُتاً كُمْتعاً
"next time"
المَرَّةُ القادمةُ
"another time"
مَرَّةٌ أُخْرَى/جَديدةٌ/ثانِيةً
"for the first/last time"
للمَرَّة الأُولى/الأَخيرة
"time and again"
مَرَّةً عَن مَرَّةٍ
مَرَّات
```

Time can also be used as a verb, meaning 'to measure the duration' or 'to determine the appropriate moment': e.g.

```
"to time a race"

دِّوُنَ/سَجُّل وَقْتَ الْمُباراةِ/السِّباق

"He timed the attack perfectly."

لقد وفِقَ في إختيارهِ وقتَ الهُجُومِ توفيقاً بالِغاً/أَحْسَنَ التَّوْ فِيق
```

Too

The rendering of this adverb in Arabic can sometimes be very problematic, particularly since there is no single word that conveys the same meaning. The most common translations involve the use of:

• the **elative** in the following constructions, all of which mean 'more than necessary':

- the verb أَوْرَطَ فِي ('to be excessive in') followed by a noun;
- the adverb أجداً

e.g.

"He is too young." هُوَ صْغَيرٌ جِدًّا

"He drinks too much."

"This car is two thousand pounds too expensive."

"It's too far."

BUT:

"Why did you park the car there? The restaurant is **too** far from here!" لاذا رَكَنتَ/وَقَفْتَ السَّيَّارةَ في هذا المَكانِ؟ المَطْعَم بَعيدٌ جِداً مِنْ هُنا "She talked too much." تَكَلَّمَتْ أَكْثَرَ مُمَّا يَنْبَغي "We are too old." نَحْنُ كِبارٌ في السِّن "I clearly arrived too early." مِنَ الواضِحِ أَنَّنِي وَصْلَتُ بِاكِراً جِدَّاً/أَبْكُرُ مِّمَّا يَنْبَغِي "He earns too little." إنَّ راتِبَهُ أَقَلَّ مِمَّا يَجِبُ "They're too close." هُمْ أَقْرَبُ مِمَّا يَجِبُ "There's too little food left." ما بَقِيَ مِن الطَّعام أَقَلُّ مِنَ اللازِم "It's too late."

▼ NOTE the following idiomatic phrases with too:

"It's not **too** bad." هُوَ يَئِنَ يَئِنَ

إِنَّ الوَقْتَ مُتَأَخِّرٌ جِدًا

"Not too much."

لَيْسَ بِمَا فِيهِ الْكِفاية/قَلِيلاً

"It's too good to be true."

أَغْرَبُ مِن أَنْ يُصَدَّقَ

The construction **too + adjective** + **for/to+infinitive**, is usually rendered by 'elative + أَنْ e.g.

"He is too young to vote in the coming elections."

"This is too dangerous for us."

"The circumstances were too sensitive to be mentioned."

Bear in mind that in English you cannot add 'too' to an adjective+ noun phrase; instead, you must use the construction 'too + adjective + indefinite article + noun'. e.g.

"This is **too** difficult a task for us to do." (NOT *this is too difficult task) هذه المَهَمّة أَصْعَبُ مِن أَنْ نَقُومَ بِها

It is important to highlight the common mistake made by Arabic speakers in the use of this adverb, when it is used as an intensifier. e.g.

"He loves her too much."

"She was too happy."

Unless the speaker wishes to convey a negative connotation, i.e. the love and happiness are excessive, the use of 'very' is more appropriate than 'too' in this context as what is meant is, respectively:

"He loves her very much." [= "He loves her greatly/a great deal."] ایُحِبُّها جِدًّا/کَثِیراً

"She was very/extremely happy."

Transliteration and transcription

Rendering characters from one script into another often gives rise to a raft of problems as in many cases there is no single accepted – and applied (!) – system. As like as not, scholars will use a different system from that employed in the media and non-specialized literature.

Arabic into English

Although transliteration and transcription are often used interchangeably, a distinction is sometimes made between the two, with transliteration referring to a one-on-one correspondence between the SL and TL characters, and transcription denoting the fact that sounds are rendered by characters in the target language that most closely resemble the original sounds. Either way, both are a form of romanization, i.e. the rendering of the symbols of another script in Roman characters (the Latin alphabet).

Perhaps the most damning argument against the 'broad' transcription is its inconsistency, with, for instance, authors quite happily using 'Saeed' and 'Aziz' in the same line, thus rendering the same Arabic sound (and character) φ in two different ways!

In addition, there are occasions when the same symbol is used to represent two different phonemes, as is the case for and both of which are sometimes confusingly represented by the apostrophe. The use of assimilation may also result in confusion for non-Arabic speakers, as in the case of arihla, for instance, for al-rihla (or ar-rihla).

However, when it comes to transcription, there is a school of thought which happily condones ambiguity of this type on the grounds that 'those who know the language will know what the word refers to, whereas it doesn't matter for those who do not know the language.' Proponents of this view further justify their approach by stating that transcribing 'correctly' is a labour-intensive task, which for the non-Arabic speaker is both difficult (if not impossible) and pointless. On the one hand, it is difficult to dismiss this view out of hand; for one thing, how is the non-Arabic speaker to know how to transcribe a word correctly (short of having it done by a specialist)? On the other hand, it is difficult to see how inconsistency and lack of riguour can do anything but detract from the quality of a text. Indeed, if one takes this argument to its logical conclusion, it does not matter either if there are spelling mistakes in a word, since people who can read should be able to correct the mistakes anyway!

The above shows the extent to which every Unicode¹ recommendation is breached, as the guidelines state that any transliteration system should be:

- ▶ *standard:* follow established systems (standards, authorities, or *de facto* practice) where possible, deviating sometimes where necessary for reversibility;
- complete: every well-formed sequence of characters in the source script should transliterate to a sequence of characters from the target script, and vice versa.
- ▶ predictable: the letters themselves (without any knowledge of the languages written in that script) should be sufficient for the transliteration, based on a relatively small number of rules.
 - ▶ pronounceable: the resulting characters have reasonable pronunciations in the target script. Simply mapping by alphabetic order could yield strings that might be complete and unambiguous, but the pronunciation would be completely unexpected.
- reversible: it is possible to recover the text in the source script from the transliteration in the target script. That is, someone that knows the transliteration rules would be able to recover the precise spelling of the original source text.

The main problem is that there does not seem to be an acceptable standard, despite very early attempts, such as those by the United Nations and the League of Arab States in 1972, which ensued from the first conference on Arabic transliteration held in Beirut.

'Narrow' transcription

It must be pointed out that the use of a given 'system' of transliteration/ transcription in many cases depends on the **target audience**. Indeed, a narrow transliteration, with its use of diacritics, may well suit scholars, but is highly inappropriate for a newspaper article (if only for the typographical problems this choice would entail).

And then, there is the problem of **recognized transliterations** of words, which poses a problem even in scholarly texts. For instance, it is highly unlikely that even in technical studies, would be transcribed as *imām*, rather than 'imam' in view of the fact that this word has been 'naturalized' in English, just as 'taco' or 'bikini', which were once as alien. The rule here would seem to be to let common sense prevail! One example is the transliteration of the name of the former Tunisian president (Habib) *Bourguiba*, which ultimately goes back to Bū Ruqayba, or even Abū Ruqayba. However, it is safe to say that neither of these would be recognized as referring to the same man!

However, there is not even a single scholarly system for the romanization on which all agree and which is applied throughout the field. Instead, there are a number of competing systems, albeit with minor variations on the whole, as the table below reveals:

Table 1: competing transcriptions

Arabic Letter	Continental European	UK	US
۶	9		
ب	Ь		
ن	t		
ث	Ţ	th	th
ح	ğ	j	j, <u>dj</u> , dj
ح	ķ		
خ	<u>h</u>	kh	<u>kh</u>
٥	d		
ذ	<u>d</u>	dh	<u>dh</u>
ر	r		
ز	z		

<i></i>	s		
ش	š	sh	<u>sh</u>
ص	ş		
ض	ģ		
ط	ţ		
ظ	Ţ.		
ع	с		
غ	ġ	gh	<u>gh</u>
ف	f		
ق	ķ	q	
<u>.</u>	k		
J	I		
٢	m		
ن	n		
٥	h		
و	w		
ي	j	у	

In terms of the vowels, the following picture emerges:

i. Short: a, i, u

ii. long: \bar{a}/\hat{a} , $\bar{\imath}/\hat{\imath}$, \bar{u}/\hat{u}

In the case of the long vowels, the symbols with the 'macron' (lengthening mark) tend to be used by English-speaking Arabists, whereas the symbols with the macron (i.e. lengthening mark) are those favoured mainly by French scholars. It is worth pointing out that in many cases no distinction is made in transcription between and in that both are represented by the same 'long a' symbol. Among the 'accepted' scholarly systems, it is only that of the American Library Association (ALA), which introduces such a distinction, i.e. 'ā' for 'standing alif', and 'â' for 'broken alif' (though it does not have a separate symbol for the so-called 'dagger alif', as in ...

Finally, it is not as if the narrow transcriptions are without problems; indeed, the use of digraphs to represent one phoneme, such as 'sh', 'gh' and 'kh', has rightly been called confusing to the reader who does not know Arabic, which runs counter the very principle of transcription since the object of the exercise is to make things accessible to the foreign reader. For instance, the reader might misinterpret raghaba as consisting of 'rag-haba' (i.e. two phonemes instead of one), just as the foreign learner of English may misread the English word 'haphazard' as 'hafazard' (considering the 'ph' to be like that in 'apastrophe').

Recommended 'narrow' (scholarly) transcription

The table below lists the rcorrespondences for Standard Arabic characters.

ş	,	ظ	Ž.
ب	b	ع	с
ن	t	غ	gh
ث	th	ۋ	q
ج	j	٤	k
ح	ķ	J	1
خ	kh	٨	m
٦	d	·C	n
ذ	dh	٥	h
ر	r	و	w
ز		ي	у
س	s		
ش	sh		
ص	ş		
ض	ģ		
ط	ţ		

☞ NOTE:

- 1. Alif: both and are transliterated ā.
- 2. tā' marbūṭa (ه) is rendered as -a in pre-pausal form) and as -at if the word is the first element in a genitive (إضافة) construction. e.g. mudarrisa BUT mudarrisat al-kulliyya.
- 3. suffix: ī-, fem. –iyya. e.g. qahrī, sirriyya.
- 4. نوین -un, -an, -in: darsun, darsin, darsan. !! In transcription, it is common not to transcribe the نوین, except in certain cases (e.g. jiddan)
- 5. The so-called **diphthongs**, the following are the common ways of representing them in the scholarly systems: (2 ay: 3) aw.
- 6. **Gemination** (تشدید), i.e. the doubling of sounds, is represented by a doubling of the relevant characters. e.g. *dubb*.
- 7. Assimilation (إِذْعَامِ) is not rendered. e.g. al-shams.
- 8. The **hyphen** is used to separate the article from its noun or adjective. e.g. al-gamar.
- 9. The numerals are rendered as 'Western' Arabic numerals: 1, 2, 3,... (rather than as 1,1,1).
- when preceded by a particle or preposition ending in a vowel, the vowel in the article is replaced by an apostrophe. e.g. bi 'l-qalam.
- When Arabic transcribed words appear at the beginning of a sentence, they are **capitalized**; if it involves a **proper noun**, this may entail capitalizing both the article, and the name. e.g. 'Al-Kindī...'; 'According to al-Kindī ...'

Transcribing the colloquial

Whilst the above applies to Standard Arabic, it stands to reason that transcription can and is also used to represent colloquial varieties of the language. In this case, the rule of thumb is that one should use the symbol which comes closest to the original pronunciation. For instance, in rendering a Palestinian pronunciation of al-Quds (Jerusalem), one may transcribe it as al-'uds (with the hamza symbol representing the pronunciation of 'q' as a glottal stop). Similarly, if it is important to render the Egyptian pronunciation, one would transcribe najm () as nagm.

The transcription of colloquial speech also involves the introduction of additional vowel characters. e.g.

Short vowels: **e**, **o** (for Standard Arabic 'a'/'i' and 'u', respectively) Long vowels: **ē**, **ō** (for Standard Arabic 'ay' and 'aw', respectively) Colloquial pronunciations can also affect personal names, sometimes to comic or embarrassing effect, as in the name 'Samina', which reflects the vernacular pronunciation of as/s/, with a girl named ('precious') becoming 'fat'!

'Broad' transcription

When it comes to the non-technical, non-scholarly 'broad' transcriptions – i.e. those without diacritical marks – the confusion increases exponentially. Indeed, one need only pick up a newspaper (or two!) to see the wide variety of inconsistent transliterations and transcriptions on offer. Nevertheless, it is the broad transcription which should be used if the text is aimed at what may conveniently be called a 'lay' audience, or the general public.

Here, too, simple rules may be proffered, in order of importance:

- i. recognized translation?
- ii. select transcription that is closest to the Arabic. e.g. Ahmad, rather than Ahmed.
- iii. economy of the number of characters, i.e. when possible choose one rather than several. e.g. balid (rather than 'baliid' or 'baleed'), Hasan, rather than Hassan.
- iv. consistency in representing the same word and sounds.

The above steps appear in hierarchical order, which means that (1) overrides (2), (3) and (4). So, the fact that 'Harun' is a recognized form of this ruler does not necessarily rule out the transcription of 'Julnaar' with 'aa', provided all other instances of 'long a' are rendered in the same fashion, since this complies with the **consistency** rule. The table below lists the recommended and recognized transliterations of some commonly encountered Arab first names:

Table 2: transliteration of common Arabic names

English Transliteration	Arabic
'Abd Manaf	عبد المناف
'Abd al-Hamid	عبد الحميد
'Abd al-Latif	عبد اللطيف

'Abd al-Muttalib	عبد المطلب
'Abd ar-Rahman	عبد الرحمن

Yusuf, Youssef, Youssif	يوسف
Zayd, Zeid	زید
Zaynab, Zeinab, Zeineb	زينب
Zahra, Zohra	زهرة

Proper nouns: 'translation' vs transliteration

Most modern history books written in English still refer to past French rulers by their anglicized names, and students learn about the exploits of *Francis* or *John*, instead of *François* and *Jean*. Similarly, the traditional rendering of $Ya^cq\bar{u}b$ bears little resemblance to its English counterpart *James*!

In the case of Arabic, one could conceivably apply this principle to names that also appear in the Bible, and so one would talk about *Abraham*, rather than *Ibrahim*, or *Mary*, rather than *Maryam*, *Joseph*, rather than *Yusuf*. Another category are names that are similar to English ones in form, such as *Sawsan* ('lily-of-the-field'), which, depending on the individual is sometimes rendered as *Susan*.

The recommendation here is NOT to translate, whereas an 'anglicized' rendering should prevail if it is available, so that for instance "whould be rendered as 'Sarah'.

In the case of Arabic transliterations of originally English, or French names, it is the original that should be preferred in translation. e.g. ميخائيل, 'Michel', BUT ميخائيل, 'Mikha'il'.

Sometimes, convention and historical practice take precedence over the above points. This is the case, for instance, in a number of Spanish place-names, which date

back to the Arab-Muslim occupation of part of the Peninsula (al-Andalus) : مُالِيطُلة (Toledo), عَرْناطة (Grenada), عَرْناطة (Eisbon), الشيلة (Seville), عُرْناطة (Cordoba), الشيلة (Barcelona), while the *Alham bra* is, of course, الخَمَراء A particularly interesting example of 'translation' is الجَمَل الأَسْوَد , which is the Arabic translation of the Latin etymon *Montenegro*, even if increasingly the media are referring to مَسْمِعْوِرُ instead!

English to Arabic transliteration

The issue of the transliteration of foreign words is just as much of an issue in Arabic, as it is in English, with what at times appears to be a 'free-for-all', with forms wavering between a transcription of the word as it is pronounced in the original language and a graphemic representation. e.g. انفاه ('Ingham') and شنهاي ('Shanghai'), vs ('Durham'). In many cases, the approach involves selecting the Arabic sound that best represents the original sound, though this is by no means the rule, as the above example of 'Ingham' shows, where the prenders a silent letter in English! If anything, variety seems to be the norm with شام ('Guatemala') co-occurring happily with

Similarly, there may be differences depending on the source language as in خارل vs. بخارلز, or برنارد vs. برنار vs. برنارد vs. برنار

In addition, transliterations, especially of proper nouns also vary according to the region, with local pronunications of Arabic sounds playing a determining role: for instance, in the case of 'English', which is usually rendered as reflects the realization in Egypt (and Oman) of \bar{z} as the first sound in the word 'go', rather than as the first sound in 'John', whereas in the case of 'Malaga', whereas in the case of 'Malaga', whereas in the Gulf and many parts of North Africa.

The following practices can be observed in the transliteration of foreign proper nouns (also see table below):

- originally short vowels tend to be lengthened. e.g. دانیال, 'Daniel';
- acceptance of a succession of consonants not otherwise allowed in Arabic. e.g. شغهاي, 'Shanghai';
- a significantly higher proportion of so-called 'emphatic' consonants. e.g. قنصل,
 'consul'.

A particularly interesting case in modern usage is the increasing neglect of 'classical' transliterations – many of which go back to Christian names; for instance, rather than 'Peter' or لوقا 'Peter' or' يُطرِي 'Peter' or' يُطرِي 'Luke', one is more likely to find يُطرِي and لوقا 'respectively, today.

One of the main problems in Arabic transliteration is that already encountered for English, i.e. recognisability; while برايثوايت, may be deciphered with some degree of ease as 'Braithwaite', other cases are far more obstruse. In this case, the following strategies are generally applied:

- 1. in all cases, the foreign name should be placed in brackets. e.g.
 كَتَبَ البروفسور (أَنْدِي سميث) مَقالَةٌ حَوْلَ الأَمْراضِ الباطنِيَّةِ

 "Professor Andy Smith wrote an article on internal medicine."
- 2. In scientific and technical texts, where it is important to specify technical terms or for sources to be recognized, the name is generally rendered in latin script within the Arabic text, either by itself, or in conjunction with an Arabic rendition. e.g.

هذه التوصية هي أهم ما تضمنته المراجعة الحديثة لتوصيات لجنة الخبراء في الكلية (Air Travel During نصمن عدد الأميركية لأطباء النساء والتوليد حول سفر الحوامل بالطائرات، والتي ستنشر تحت الأميركية والمياد (السفر الجوي خلال الحمل) Pregnancy عنوان (السفر الجوي خلال الحمل) كتوبر (تشرين الأول) لمجلة طب النساء والتوليد

Table 3: transliteration of common English names

English	Arabic Transliteration
Anne	آن
Charles	تشارلز
Daniel	دانیال
David	دايفد
Edward	إدوارد
Elisabeth	الميزابيث
Francis	فرانسیس فرنسیس فرنسیس جورج

Napoleon Bonaparte	نابليون بونابرت
Picasso	بيكاسو

^{1. =} the computing industry encoding standard, set forth by the Unicode Consortium (see http://www.unicode.org). For the transliteration guidelines, see http://cldr.unicode.org/index/cldr-spec/transliteration-guidelines.

^{2.} cf.A. Schimmel, Islamic Names, Edinburgh University Press, 1989.

Until/till/by

The time adverb **until** and its less formal abbreviated form **till** are used to talk about an ongoing state, whereas **by** refers to an action taking place at, or before a point in the future. In Arabic, **until/till** are generally rendered by (+ genitive) or (+ and by through (+ genitive)). e.g.

"We'll stay here until the evening."

"Up until now, the bank is still not certain whether the economy was affected by the international crisis."

"I hope you will be able to do it by Friday."

"She finished reading the book by the time the lecture started."

☞ NOTE: ﷺ can have a number of other meanings:

to the point of', 'up to', with the following noun being in the *genitive*. e.g.

"The investigators searched the building from the basement **up to** (including) the roof."

In this meaning, it may sometimes be interchangeable with عافي ذلك ('including'). e.g.

"The king called for the normalization of relations with Algeria, including the opening of borders."

يَدْعُو الْمَلِكُ إلى تَطْبِيعِ العَلاقاتِ مَعَ الْجَزَّائرِ بِمَا فِي ذَلِكَ فَتَحُ الْحُدُودِ

• 'in order to', followed by a subjunctive (cf. کي)). e.g.

"In order to realize the hopes and ambitions of the people in his country." حَتَّى تَتَحَقَّقَ آمالُ شَعْبِ دَوْلَتِهِ وطُموحاتُهُ

► For 'even', see 'EVEN/EVEN IF/...'

Wa (وَ) and fa (فَ)

Both these two conjunctions can mean 'and', but are mutually exclusive in a number of instances:

- i. Only is can be used in conditional constructions (with in) where it introduces the result clause [see 'AS/BECAUSE/SINCE/FOR'];
- ii. Only i can be used in the Jb construction (circumstantial clause) (q.v.);
- iii. Only j tends to be used when linking two (or more) nouns. e.g.

"I saw Salwa, Leila and Sally."

☞ NOTE: when there are more than two nouns, English prefers commas with and before the last item in the series.

iv. is preferred to link cause and effect or a sequential series of events, when it can sometimes be replaced by وَبَعْدُ ذِلكَ وَبَعْدُ ذَلكَ وَبَعْدُ لَكُ وَبَعْدُ أَلَى and so, 'and thus', 'as a result', 'therefore'. e.g.

"He failed the exam and (so he) had to leave the university."

"He left his office, got on the bus and/after which he went to his mother's house."

v. • often has contrastive meaning, in which case it may be rendered in English by yet or however. e.g.

"Her accomplice confessed, yet she insists on denying her involvement."

When/if

Though both of these adverbs are used in conditional sentences (q.v.), when is used when there is a degree of *certainty*. In Arabic, if is rendered by (or), when by (or e.g.

"If he gets here [it is not certain he will], I shall tell him what happened." لِذَا جَاءَ فَأَحْكِي لَهُ مَا حَصَلَ

"When he becomes managing director [it is certain that he will be], he will make a few changes."

"When the two astronauts return to earth from space."

Whether (it be) ... or

This expression, which means 'irrespective, regardless of ...' is translated into Arabic as:

e.g.

"The divorced wife observes *iddat* (the legally prescribed period waiting before contracting a new marriage) in her parents' home, **whether it be** close or far from the marital home."

"There is no such thing as unimportant art, whether it be locally or internationally."

In some cases, a simple coordinator can also be used. e.g.

"He will do it, whether he wants/likes to or not (willy-nilly)."

While/whereas

These two conjuncts both denote contrast between clauses and can often be used interchangeably; however, only **while** can also be used to express *simultaneity*, i.e. the co-occurrence of several actions. In Arabic, both may be translated by رفي حين أن ريّنا على/ which can also be used for simultaneity, or عني e.g.

"Foreign forces liberated the South, whereas/while the North was freed by domestic resistants.

"It was said that the total weight of the container was 20 tons, whereas/while it can only contain 15 tons of goods."

"He was reading while she was cooking dinner."

Will/shall

In traditional English grammar, will is used only with second and third persons, wheras shall is reserved for the first persons. In contemporary formal usage, however, this distinction is no longer maintained. Furthermore, the difference is often irrelevant as both are contracted to '11. e.g.

سَنَكُونُ هُنا "We shall/'ll be here."

يِّذْهَبُ إِلَى المُكْتَبَةِ غَداً في الصَّباحِ

"He will/'ll go to the library tomorrow morning."

In legal language, **shall** is used to express obligation with second and third persons. e.g.

"The employee **shall** be deemed to have been appointed under probation for three months."

Wish

Though the translation of the concept does not necessarily pose any problems, its grammatical form often does in translation. In English, the verb 'to wish' can occur in a number of constructions:

• + to + infinitive. e.g.

"I wish to see you."

• + finite clause. e.g.

"I wish we could afford to go to Paris."

• + that. e.g.

"I wish that I (had) told them he wasn't going to be there."

• + pronoun. e.g.

"I wish you were here."

+ preposition:

The main thing to note in the English examples is the use of the hypothetical pasttense, or **subjunctive** (q.v.). When referring to the past or the present, the use of the hypothetical non-past indicates that the action to which reference is made is entirely hypothetical. e.g. "I wish we knew how much they were making on the deal." [We don't know] أُوَدُّ لَوْ عَرَفْنَا كَمْ سَيَكسَبُونَ مِنْ هَذِهِ الصَّفْقَةِ

However, if the action refers to the future, it denotes possibility, even if it is unlikely. e.g.

"I wish you would go and visit your aunt next week on her birthday." [the visit may still take place]

In Arabic, 'to wish' can be expressed in a number of ways, depending on the meaning; as a hypothetical 'if only...!' (also expressed in very formal English by 'Would that...!'), or as an equivalent to 'like' or 'want'. e.g.

"Would that I knew/had known about his fraud!"

"If only I knew/had known..."

"I only wish I had known..."

Grammatically, this diversity can come in the guise of verbs and particles.

• The commonly used verbs are: رَغِبَ (يَرْغَبُ) فِي, مَتْنَى, اِشْتَاقَ ,رَجَا (يَرْجُو) اِرْنَجَى). Depending on the context, these may also do double duty for 'hope' or 'look forward to', or even 'want'. One of the main blackspots in English-Arabic translation is the presence and choice of prepositions in Arabic, where English does not require any. e.g.

"Israel wishes to obtain US assistance to implement its project."

"I wished (= had hoped) that the manager had/would have taken the necessary measures."

"I wish you hadn't said that."

"I wish I knew/had known what to say."

"She told me she wished you could come tomorrow."

"The minister is looking forward to more study of this proposal."

The Public Prosecutor hopes that the new law will solve the matter..."

"This was an alliance that the government neither wished/hoped for, nor expected..."

☞ NOTE:

- 1. if a verb is required after رُغْبُ في do not forget to addن . e.g.
- "According to the New York Times, America wants North Korea to toacknowledge its nuclear capability."
- "According to the New York Times, America wishes North Korea acknowledges its nuclear capability."

- 2. can have different meanings, depending on the prepositions with which it collocates:
 - a. + عَلَى + عَلَى to **prefer** something over something else. e.g.

b. + 'to dislike' (!). e.g.

"She dislikes talking about this subject."

- 3. the fixed expression with the passive, used as an adjective: لا يُرْغُبُ فِيهِ 'undesirable'
- the particle which is used for hypothesis only. e.g.

لَيْتَهُ كَانَ هُنا

'I wish he were here!'

لَيْتَ شِعْرِي

'I wish I knew!'

لَيْتَ الأَمْرِ إِقْتَصَرَ عَلَى هذا

"If only the order was restricted to this!"

لَيْتَ الْمُشْكلةَ تَقفُ عنْدَ ذلكَ

"If only the problem ended there!"

لَيْتَنِي قُلْتُ لَهُ

"If only I had told him!"

لَيْتَنِي أَسْتطِيعُ السَّفْرَ

"If only I could travel!"

☞ NOTE:

- 1. the noun following is in the accusative.
- 2. can be followed by 1 + suffix pronoun. e.g.

لَيْتَ لَكَ الْوَقْتُ

"If only you had time!"

3. in formal English the use of the old subjunctive form 'were' must be used in preference to 'was' as it involves a hypothesis. e.g.

"I wish I were a rich man."

Appendix I: Tenses

Overview

Tense	English		Arabic	
	Form	Example	Form	Example
Present simple	PRESENT	'He has dinner at eight.'	IMPERF.	يَتَعَشَّى في السَّاعَةِ الشَّمِنَةِ مَساءً
Present		'He is drinking coffee.'	IMPERF	يَشْرَبُ قَهْوَةً
