# REPORT OF THE DIRECTOR

## I. INTRODUCTION

I am pleased to announce that over 148,000 students from more than 2,250 schools participated in the 2008 AMC 8 contest. Many dedicated mathematics teachers provided an opportunity for students to participate in this national exam, and the Committee created an exam which was both “exciting and challenging”. A hearty thanks to all of you for continuing to recognize the fact that the AMC 8 plays a complementary role in support of the junior high/middle school mathematics curriculum.

## II. GENERAL RESULTS

This summary includes a listing of the results and awards associated with the 24<sup>th</sup> annual AMC 8, which was held on Tuesday, November 18, 2008. PLEASE NOTE THAT THE 2009 AMC 8 WILL BE HELD ON TUESDAY, November 17, 2009.

From the responses received from many of the contest managers, it is evident that the examination was once again well received by the students and teachers.

A comparison of the 2008 statistics shows that this year’s contest was comparable to the 2007. A total of 334 perfect scores were recorded (129 in 2007) while the national average moved to 11.45 (9.87 in 2007). The AMC 8 Committee is in its final stage of preparation of the 2009 exam and I expect it to be similar to the 2008 edition. A four-year statistical comparison of results is given in Section III.

We sincerely hope that your school administrators will continue to support your future requests for funds to enable your students to participate in this academic activity which is consistent with the standards set by the *National Council of Teachers of Mathematics*.

On behalf of the AMC 8 committee, I express my appreciation to all of the school contest managers and their associated teachers, school counselors and administrators for providing an opportunity for their students to participate in the 2008 AMC 8. I particularly would like to express my gratitude to those teachers who personally paid the fees associated with the contest. Their dedication to the profession is certainly noteworthy and beyond the call of duty.

## III. STATISTICAL ANALYSIS OF RESULTS A FOUR YEAR COMPARISON

Please note that the word “recorded” used throughout this section should be interpreted as indicating that the results are based on only the items that were mark-sensed by the students. Some of the students failed to mark items such as their grade or gender.

#### Average Score by Recorded Grade Levels

GRADE	2008	2007	2006	2005	2004	2003	2002
4 & 5	10.75	8.48	8.21	8.05	8.15	7.62	7.76
6	9.88	8.19	8.51	8.16	8.51	8.58	9.31
7	11.18	9.51	9.82	9.37	9.55	9.77	10.59
8	12.07	10.60	10.75	10.52	10.48	10.93	11.79

There were a total of 3,263 school winners at 2,296 schools, and the following number of certificates were sent to schools: Gold – 9,040, Silver- 11,396 Bronze- 14,068. While the AMC 8 is primarily intramural, the national results make some comparison at that level viable, but the examination, which has no established norms, is comparable to neither classroom nor placement tests.

## IV. SCHOOL PLAQUE/NAMEPLATES

The AMC 8 School Winner Plaque is a beautiful 9”x12” plaque with space for 12 engraved name plates with the names of your year-by-year school winners. Teachers who gave the AMC 8 (then known as the AJHSME) in the 1980’s and 1990’s will remember the AMC provided an initial plaque and a school winner plate each year to schools participating in the AMC 8. Comments

## **Report of the Director continued**

from teachers told us you missed having this recognition program for your math scholars. In your AMC 8 report from December 2008 you will find the web address that will allow you to order directly from our supplier. The AMC pays for the initial plaque and engraved name plate in the first year and the annual engraved plates in subsequent years.

### **V. 2008 STATE TOP STUDENT PLAQUE**

This year we are presenting 198 Top Student Plaque awards. This plaque is awarded to the top scoring student in each state, all of the U.S. Territories, and Canada. This student award program that began in 1991 will continue to be presented on an annual basis. You will note, this Summary contains photos of some of last year's awardees.

### **VI. AREA OF PARTICIPATION**

Participation in the AMC 8 extends beyond the USA. Registrations were received from APO/FPO Schools (Junior High or Middle Schools associated with U.S. military bases abroad), American schools associated with U.S. Embassies, U.S. Territories (Guam, Puerto Rico and the Virgin Islands), and foreign schools (including a group of from Taiwan, Canada, Singapore and other international schools), for a total of 18,114 students. Recognition is hereby given to those teachers abroad who have provided an opportunity for their students to participate in the AMC 8. A complete list of participating schools from foreign countries and U.S. territories is found in this summary. We are grateful to the Department of Defense for providing the financial support which enabled the students in its dependent schools to participate in the AMC 8.

### **VII. DATE AND FORMAT OF THE 2009 AMC 8**

The date of the 2009 AMC 8 is Tuesday, November 17<sup>th</sup>. The exam will again be a 40 minute, twenty-five question, multiple-choice contest. The scoring procedure will be the same as in 2008: one point will be given for each correct answer. Registration materials will be mailed to schools during the months of May, September, and October. If you wish to register now, a 2009 Registration Form has been included in this Summary on Page 237. We hope that your school will participate again in the 2009 AMC 8.

Completion of your registration as early as possible is always appreciated. Contest materials will be mailed in October and early November, so there is ample time for planning and completion of pre-contest activities. We would be most grateful if you would encourage neighboring schools to participate in the AMC 8.

The National Association of Secondary School Principals will continue to place the AMC 8 on its advisory list of contests and activities for 2009-2010.

## **Report of the Director continued**

### **VIII. ACKNOWLEDGEMENT**

We are fortunate to have dedicated staff members who fulfill the responsibilities associated with the entire examination process in a timely and efficient manner. One can imagine all of the expected and unexpected duties and operations which must be completed during the examination year. AMC staff members who worked on the 2008 AMC 8 include Marsha Conley, Rachelle Jensen, RuthAnn Royer, Elizabeth Claassen, Lynette White, Shelly Zysset, Sonia Freeman and Terri McKee. Our University student helpers are Wen Luo, Juan Davila, Keler Marku and Mary Rezac. I welcome this opportunity to commend their excellent work.

### **IX. STATE DIRECTORS, SPONSORS, DONORS AND COMMITTEES**

In this summary you will find a current list of the AMC 8 State Directors, sponsors, donors, members of the Committee on the American Mathematics Competitions (CAMC), and AMC 8 committee. In addition, the members of the American Mathematics Competitions (AMC) Panel are listed, and they are hereby recognized for submitting and reviewing potential problems for the examinations of the AMC. The work of the State Directors is significant to the success of the AMC 8. They send follow-up mailings and attend state mathematics meetings to give talks about the examination in order to encourage more schools to participate. The Directors and Panelists receive no financial compensation for their work. The CAMC recognizes these individuals for their outstanding dedication to the profession of mathematics educators.

Special recognition is given for the work of the AMC 8 and CAMC committee members. They devote considerable time, under the direction of Bonnie Leitch (AMC 8 Chair) and David Wells (CAMC Chair), reviewing examination policy, proposing problems, and developing the examination. The contributions of our sponsors and donors are hereby recognized. The significance of the examination is greatly enhanced by their continued support.

### **XI. RETIREMENTS**

This past August two AMC staff members retired, leaving a large hole in our group. Linda McCormick and Kay Michael decided it was time to shelve their last contest, so to speak. Their positive attitudes and cheerful smiles have been missed. We wish them good luck.

### XI. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA

The AMC office has been located at the University of Nebraska in Lincoln since 1970. For the past 38 years the University has made significant contributions in support of the American Mathematics Competitions including providing utilities, office space, and the use of university facilities.

### XII. FINAL COMMENTS

I welcome and appreciate your comments regarding this Summary and the procedures associated with the AMC 8.

## MESSAGE FROM THE AMC 8 CHAIR

Dear Teachers and Parents,

Thank you for the opportunity to share the 2008 AMC 8 Contest with your children. We hope that the experience has been a window into the world of mathematical excellence and fun.

More than forty math teachers and professors across the nation have worked for over a year to create the forty-minute contest your children wrestled with. We try to include puzzling, challenging, even curious and humorous problems in our 25-item mix.

Activities like our contest allow and encourage students to excel in an academic sphere. The contest is a rewarding experience where mathematical curiosity and skill are, we hope, stimulated. The series of contests sponsored by the American Mathematical Competitions is designed to inspire an interest in mathematics that will lead to academic success, scholarship and a rewarding career. Professionally and personally, competence in mathematics and mathematical understanding lead to success and an enriched life.

Of course, one of the best parts of the contest occurs right after your children have taken the test. Many times students' interest is highest then. We in the committee hope that you can use this opportunity to talk about math with your children. Use the alternate solutions to elicit creative approaches to the problems. Perhaps explain some new mathematical concepts to the younger middle school students who soon will be eighth graders. Talk about which problems were easier or harder for your children and why.

Finally, thank you for all you do daily to help your children reach their potential as people and as better mathematics students, no matter what their natural abilities. You are one of our nation's greatest resources for insuring all children a rich and rewarding future by promoting knowledge and understanding.

## MESSAGE FROM THE CAMC CHAIR

During the past year I was appointed as Chair of the Mathematical Association of America's Committee on the American Mathematics Competitions (CAMC). During my first year of service in that position, I have had many occasions to reflect on the vast number of people who help to maintain these competitions as unique experiences that students enjoy. If you are reading this, you have probably contributed to the success of the 24th annual AMC 8 Contest. You may be a student who participated in the contest. Perhaps you are a teacher who administered the contest or a State Contest Director who encouraged all the schools in your state to register for it. You might be a member of the AMC 8 Contest Committee or the AMC Advisory Panel, and in that role you might have posed problems for the contest or assisted in the editing at various stages of its construction. I want to extend my heartfelt gratitude to each of you. Thanks are also due to AMC Director Steve Dunbar and his capable and hard-working staff at the AMC office for the registration of contestants, the production, distribution and scoring of the contests, and the communication of the results. Special thanks go to AMC 8 Committee Chair Bonnie Leitch, who graciously agreed to extend her term of service by a year in order to oversee the creation of the 2008 contest. I also want to acknowledge my predecessor as CAMC Chair, Elgin Johnston, whose record of dedicated service will be difficult to match.

The twofold mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. Although both parts of the mission are relevant to the AMC 8, it is primarily the first part that guides our thinking as we construct the contest. One purpose of the AMC 8 is to expose middle school students to new mathematical ideas, both by incorporating a broad sample of the topics accessible to them and by illustrating unusual methods of solution. A second, arguably more important, purpose is to generate excitement about mathematics by providing a positive mathematical experience. The AMC Philosophy and Purpose Statement points out that middle school students are "at a point where attitudes toward school and learning, and perceptions of themselves as learners are solidified." The success of the contest can be measured more reliably by the volume of the post-contest discussion among the contestants than by the average score.

We are always seeking new ideas to help us better carry out our mission. The mathematics teachers in the schools are among our most valuable sources of ideas. We welcome any thoughts you have that will help us improve the AMC 8, make the exam better fit your needs, and help us reach more students. We also have a critical need for middle school teachers on the AMC Advisory Panel. If you are interested in contributing or editing problems for our contests, please contact me at the address below. You can also visit us at the American Mathematics Competitions booth at this year's NCTM meeting in Washington, DC.

## SLIFFE AWARDS FOR DISTINGUISHED MATHEMATICS TEACHING IN THE MIDDLE SCHOOL

The Edyth May Sliffe Awards for Distinguished Mathematics Teaching in the Middle School were determined following the analysis of the 2008 American Mathematics Contest 8 (AMC 8). The winners are listed on the next few pages along with the schools and states they represent.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest to give awards to high school mathematics teachers whose teams perform well on the AHSME. Edyth Sliffe wanted to do this because her students had always done very well on the AHSME and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

In order to recognize junior high and middle school teachers, as well as high school teachers, the MAA Sliffe Award Committee in 1994 approved the establishment of a new set of awards begun in 1995. Five awards are given in each of the eleven regions associated with the AMC 8 to teachers of grade 8 or below. The selection of the award winners is determined by the following procedure:

The ranking of a school in a given year for the purposes of this Award is made on the basis of the sum of the three top student scores at the school. A list is prepared of those schools who ranked within the top one third of the schools within the region. For all those appearing in the lists for each of the past three years, the sum of the rankings for each of the schools for each of the last three years is calculated for each region. For example, for the awards given following the 2008 AMC 8, the rankings of the schools in 2006, 2007, and 2008 were calculated for each region. The mathematics teacher whose name was submitted from the eligible five top-ranking schools is declared the Edyth May Sliffe Award recipient for that region. A teacher can only win the award once.

The award-winning teachers receive a certificate, a \$100 cash prize, a one-year membership in the National Council of Teachers of Mathematics, including a subscription to *Mathematics Teaching in the Middle School*, and a Sliffe Award pin.

This Award serves as an excellent illustration of how a single person, in this case Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes in.

## AMERICAN MATHEMATICS CONTEST 10 AND AMERICAN MATHEMATICS CONTEST 12

The American Mathematics Contest 8 (AMC 8) is the first in a series of six contests that culminates in the United States of America Mathematical Olympiad (USAMO) and the International Mathematical Olympiad (IMO).

The second contest in this series is the American Mathematics Contest 10 (AMC 10), which began in 2000. Many schools had requested a mid level test, one that would target a student between the former AJHSME and the former AHSME (which was aimed at high school level, generally 11th and 12th graders). Thus we restructured the AHSME and came up with two new contests and names. The AMC 10 is designed for students who have not had, for example, Trigonometry and Logarithms but who have completed a formal course in Geometry. It is a 25 question, 75-minute examination.

The third contest is the American Mathematics Contest 12 (AMC 12). This examination was the first and in 2009 will have been administered for 60 consecutive years. The AMC 12 covers high school mathematics excluding calculus. It is a 25 question, 75-minute examination.

The purpose of these two contests is to spur interest in mathematics and to develop talent through the excitement of friendly competition at problem solving in a timed format. In order to challenge students of all grade levels and with varying talents, the problems range from easy to extremely difficult.

These tests, although directed at high school students (grades 9-12), are also recommended for students at lower grade levels who possess unusual mathematical ability. Consequently, all schools that participated in the AMC 8 were sent a 2009 AMC 10/12 Invitation Brochure. Schools will have a choice of dates because the AMC 10/12 Contest A is scheduled for Tuesday, February 9, 2010, and the AMC 10/12 Contest B is scheduled for Wednesday, February 24, 2010. Interested schools may elect to take both Contest A and B.

Students who have never taken the AMC 10/12 should look at copies of prior exams in order to set reasonable goals for themselves on their first attempt. A list of available prior examinations' ordering procedure can be found at the AMC website [www.unl.edu/amc](http://www.unl.edu/amc).
