## PHONICS AND ENGLISH READINESS PROGRAMME (ERP)

It is not enough to be fluent in English, but also to be aware of the right pronunciation and understanding of the language nuances. Keeping this in mind, Kidzee has designed a unique programme - Phonics and ERP. This programme is fully integrated into the curriculum, aiding the child with his fluency in the language and delivery of it. Developed in-house by Kidzee, Phonics and ERP is specifically created for the India context, thus eliminating any influence of US/UK accents. This emphasis on 'localisation' will help the child to appreciate and respect Indian culture instead of getting overtly influenced by western civilisation.

# School! Readiness

The curriculum at Kidzee is conceived in such a way that everything the child learns at the preschool prepares him for an easy transition into Grade 1. This Smooth Step towards a bigger future is accomplished via a series of activities that are woven into academic programmes.

## TECHNOLOGY-ENABLED LEARNING

In today's world, it is hard to ignore the influence and significance of technology in the education scenario. Understanding this, Kidzee has designed its curriculum integrating a healthy affinity towards technology. However, it is strictly monitored that technology is not overpowering the simplicity of learning. The teachers at Kidzee ensure that kids are not overtly getting attached to gadgets and gizmos, thus maintaining a perfect balance of technology-friendly learning.
